rather than program development Secondly they should be easily accessible to delegates and readers We felt that formal mathematical papers had plenty of other opportunities for airing and publication The second stream was the applied programme a set of formal presentations given by leading software vendors and consultancies It is clear that many advances in systems development are actually applied rather than research led Thus it was important for delegates to hear how leading edge companies view the State of the Art This was supported by a small exhibition area where certain vendors demonstrated the software they had introduced in the formal presentation
