Of Human Values:

The Nature of Human Values Milton Rokeach, 1973 Milton Rokeach's book *The Nature of Human Values* 1973 and the Rokeach Value Survey which the book served as the test manual for occupied the final years of his career. In it he posited that a relatively few terminal human values are the internal reference points that all people use to formulate attitudes and opinions and that by measuring the relative ranking of these values one could predict a wide variety of behavior including political affiliation and religious belief. This theory led to a series of experiments in which changes in values led to measurable changes in opinion for an entire small city in the state of Washington. *Understanding Human Values* Milton

Rokeach, 2008-06-30 This volume presents theoretical, methodological and empirical advances in understanding and also in the effects of understanding individual and societal values. **Human Values and Ethics** Prof. Bhushan Manchanda, This book has been designed for the undergraduate and postgraduate programmes in different fields such as Social Sciences, Management, Engineering, Architecture, Agriculture, Medical, Pharmacy and others in such a way that it covers both the theory, conceptual foundation as well as the illustrative cases and offers authoritative approaches to Human Values and Ethics. The prime need of Value Education is to understand human aspirations, to develop the student's personality and character and to ingrain values towards tolerance, dignity, morality, decency and respect in life. The main objectives of the promotion of Human Values are to create awareness, conviction and commitment to values for improving the quality of life of the people through education and for advancing their mental, physical and emotional well-being. On the other hand, the values of social justice, integrity, trust, respect and commitment are at the core of Ethics that are accepted standards and guiding principles of personal, social and business behaviour. Codes of Ethics are to help and guide members in performing their job functions according to sound, socially responsible and consistent ethical principles. **Human Values** A. N. Tripathi, 2009

Varieties of Human Value Charles William Morris, 1956 The present study begun in 1945 is in part the outgrowth of my earlier book *Paths of Life* published in 1942. In that book's interpretation of religious attitudes and ethical systems, past and present, three basic dimensions of value were postulated and seven possible value patterns were analyzed in terms of those dimensions. The seventh of the patterns or life orientations had never been manifested by a major social group but it was felt that the pattern held promise for man's future. Such an analysis of patterned dimensional human values seemed worthy of sustained and critical investigation. The belief that a scientific study of values might also advance the enterprise of the humanities was in part related to the philosophical tradition of American pragmatism. Peirce, James, Dewey, Mead and Lewis were major influences on my thinking and they had all believed that evaluations were much like scientific judgments and with some variations that a scientific study of values and evaluations not only was possible but would be of service to man in his characteristic activity as valuer. It seemed desirable to put this philosophic position to a serious empirical test. Preface p vii
