Of Minimal Things Rodolphe Gasché, 1999 Om begreppet relation fr mst inom fenomenologisk och existentialistisk filosofi *Of Minimal Things* Rodolphe Gasche, 2022 *Of Minimal Things* is an exploration and reassessment of the philosophical notion of relation In contrast to the scholastic ontological conception of relation as a thing of diminished being this book views relation as the minimal and elemental theme and structure of philosophy Drawing radical conclusions from the classical understanding of relation as a being toward another it argues that rethinking relation engages the very possibility and limits of philosophical discourse In the author s studies of Nietzsche and Benjamin Husserl and Heidegger Derrida and Blanchot relation is shown to be central to their thought and to undergo elaborations that escape the ontological categorial and formalist ways in which the concept has traditionally been interpreted Comprehending relation in terms of determination foundation mediatization translation or communication these authors are shown to draw out and refine a host of structural implications of the notion that unseat its formalist and categorial conception Studying the writings of Mallarmé and Kafka the author argues that rethought from and in light of the other to which a relation tends philosophy necessarily opens up to and is implicated in its others one such possible other being literature *The Primacy of Semiosis* Paul Bains, 2014-01-16 *The Primacy of Semiosis* provides a semiotic that subverts the opposition between realism and idealism one in which what have been called nature and culture interpenetrate in an expanding collective of human and non human

Choreographing Relations Petra Sabisch, 2011 *Choreographing Relations* undertakes the experiment of a conceptual site development of contemporary choreography by means of practical philosophy Guided by the radically empiricist question What Can Choreography Do the book investigates the performances of Antonia Baehr Juan Dominguez Xavier Le Roy and Eszter Salamon and the philosophical works of Gilles Deleuze and Félix Guattari It establishes a relation between these practitioners as an encounter in method and develops method as a singular material and experimental practice In view of these singular methods and the participatory relations to which they give rise *Choreographing Relations* offers a prolific inventory of arepresentational procedures that qualitatively transformed choreography and philosophy at the turn of the twentieth century **The Creature** Prasanta Chakravarty, 2021-09-30 *The Creature* is an invitation to follow the mechanics between power and pain which begets the creature Creatures confront power in and through conjunctures of radical

contingency The casual use of power is an exercise in distraction It is an abiding conundrum that those who endure affliction also exert it as a force over other living bodies in equal measure not as acts of vengeance or bad faith but through deeds of forgetful randomness To ensure social indemnity and security creatures exercise force over kindred embodiments through a process of collective mimicry In the bargain creatures begin to disfigure and distort each other The line between mutual slaughter and mutual embrace begins to blur Each transgresses its own soul At other times power is an opaque magisterial and disdainful style of conveyance It reveals itself out of nowhere But the steadfast creature is as resilient as it is vulnerable The more it endures the greater its perdurance Perduring creatures may sometimes gain a second sight forged out of a sense of lyricality love and abdication But is abdication or taking refuge in the wondrous sufficient to release all creatures from the fatal loop of power and pain Or will they have to slowly shed creaturely affliction by a rigorous process of decreation Sifting through the writings of Giambattista Vico Niccol Machiavelli Gabriel Tarde Miguel de Unamuno Jibanananda Das Lev Shestov Raymond Geuss Jean Starobinski Ernst Bloch Simone Weil Simon Critchley Sarah Kane and others this volume explores the creaturely predicament and its possibilities of freedom The five chapters in Book I lay down fundamental questions for the creaturely condition the question of mimicry the relationship between taking initiative and being hounded the bridge between senses and destitution and the vehemence of radical contingency Book II posits the question of skepticism fideism and their connection to resilience and generosity in creatures Book III is entirely devoted to various ways of conceiving the aesthetic through the tragic the epiphanic the catastrophic and through militant material eruptions Book II and III essentially delve into the sites of freedom that lurk within the condition of the creaturely Book IV is constituted of a single chapter on the subject of decreation it grapples with questions of attention anonymity and abdication **A**

Milieus of Minutiae Elizabeth Brogden, Christiane Frey, 2024-12-19 The long history of tiny matters in the sciences thought and culture From catastrophic weather and steady warming caused by the accumulation of carbon particles in the Earth's atmosphere to societies brought to a standstill by microscopic viruses the new millennium has reminded us of how the minutest of phenomena can have outsized effects This notion is one that has preoccupied the European and Anglo American cultural imaginary since at least early modernity Milieus of Minutiae brings together an interdisciplinary group of scholars to investigate various forms and appearances of minutiae prior to and beyond the advent of magnification The collection illuminates connections between the empirical practices and technologies with which minutiae have come to be associated and the broader more diffuse discourses from the philosophical to the artistic that have attended theories of smallness before and after Hooke's Micrographia Placing essays on Renaissance poetry Romantic fiction and matters of punctuation alongside essays on early modern germ theory and the optics of microscopic technology this rigorously framed volume extends from sixteenth century pathology to twentieth century architectural theory natural science to literature and art

Unbridled William Robert, 2022-02-14 A study of religion through the lens of Peter Shaffer's play Equus In Unbridled William Robert uses Equus Peter Shaffer's enigmatic play about a boy passionately devoted to horses to think differently about religion For several years Robert has used Equus to introduce students to the study of religion provoking them to conceive of religion in unfamiliar even uncomfortable ways In Unbridled he is inviting readers to do the same A play like Equus tangles together text performance practice embodiment and reception Studying a play involves us in playing different roles as ourselves and others and those roles as well as the imaginative work they require are critical to the study of religion By approaching Equus with the reader turning the play around and upside down Unbridled transforms standard approaches to the study of religion engaging with themes including ritual sacrifice worship power desire violence and sexuality as well as thinkers including Judith Butler Sigmund Freud Karl Marx Friedrich Nietzsche and Jonathan Z Smith As Unbridled shows the way themes and theories play out in Equus challenges us to reimagine the study of religion through open questions contrasting perspectives and alternative modes of interpretation and appreciation

Mathematics and Education in an AI Era Dragana Martinovic, Marcel Danesi, 2025-04-25 This book focuses on the potential contributions of Artificial Intelligence AI for enhancing mathematics education It includes rationales for an AI oriented pedagogical model such as interdisciplinarity and even sensitivity to crucial world issues such as climate change The chapters in this book highlight what the new age of mathematics education entails concretely covering themes from the utilization of AI directly into classroom pedagogy and the semiotic consequences of what this entails to how mathematics training can be tailored to get students to relate concretely to problems of climate change and to understand the relevance of the differences between symmetry and asymmetry as psychological constructs The overall picture we can glean from these chapters is not mere

eclecticism but an integration of disciplinary perspectives into a holistic framework that has great relevance and resonance for mathematics education in the age of AI

Ellipsis William S. Allen, 2012-02-01 What is the nature of poetic language when its experience involves an encounter with finitude with failure loss and absence For Martin Heidegger this experience is central to any thinking that would seek to articulate the meaning of being but for Friedrich Hlderlin and Maurice Blanchot it is a mark of the tragic and unanswerable demands of poetic language In *Ellipsis* a rigorous original study on the language of poetry the language of philosophy and the limits of the word William S Allen offers the first in depth examination of the development of Heidegger's thinking of poetic language which remains his most radical and yet most misunderstood work that carefully balances it with the impossible demands of this experience of finitude an experience of which Hlderlin and Blanchot have provided the most searching examinations In bringing language up against its limits Allen shows that poetic language not only exposes thinking to its abyssal grounds but also indicates how the limits of our existence come themselves traumatically impossibly to speak

Comparative Political Theory and Cross-Cultural Philosophy Jin Y. Park, 2009-06-16 *Comparative Political Theory and Cross Cultural Philosophy* Essays in Honor of Hwa Yol Jung explores new forms of philosophizing in the age of globalization by challenging the conventional border between the East and the West as well as the traditional boundaries among different academic disciplines The essays in this volume examine diverse issues encompassing globalization cosmopolitanism public philosophy political ecology ecocriticism ethics of encounter and aesthetics of caring They examine the philosophical traditions of phenomenology of Husserl Merleau Ponty and Heidegger the dialogism of Mikhail Bakhtin the philosophy of mestizaje literature and Asian philosophical traditions This rich comparative and cross cultural investigation of philosophy and political theory demonstrates the importance of cultural and cross cultural understanding in our reading of philosophical texts exploring how cross cultural thinking transforms our understanding of the traditional philosophical paradigm and political theory This volume honors the scholarship and philosophy of Hwa Yol Jung who has been a pioneer in the field of comparative political theory cross cultural philosophy and interdisciplinary scholarship In one of his earliest publications *The Crisis of Political Understanding* 1979 Jung described the urgency and necessity of breakthrough in political thinking as a crisis and he followed up on this issue for his half century of scholarship by introducing Asian philosophy and political thought to Western scholarship demonstrating the possibility of cross cultural philosophical thinking In his most recent publications Jung refers to this possibility as transversality or transuniversality a concept which should replace the outmoded Eurocentric universality of modernist philosophy Jung expounds that in transversality differences are negotiated and compromised rather than effaced and absorbed into sameness This volume is a testimony to the very possibility of

Literature, Autonomy and Commitment Aukje van Rooden, 2019-06-27 It is often argued that a new form of committed literature is needed Embracing the 18th century Romantic idea of aesthetic autonomy literature is believed to have turned its back to everyday social and political reality One of the central questions

occupying contemporary literary debates is therefore whether literary autonomy is essential to modern literature autonomism or should be abandoned anti autonomism Aukje van Rooden argues that the debate between autonomists and anti autonomists cannot be anything but a fruitless tug of war because it is based on a distorted historical picture In order to make sense of the social relevance of contemporary literature a new theoretical paradigm has to be formulated Literature Autonomy and Commitment not only offers an historical conceptual reconstruction of the Romantic paradigm and the theoretical impasse it has created but also sketches the outline of a new paradigm called the relational paradigm based on the relational ontologies developed in 20th and 21st century philosophy Beckett, Derrida, and the Event of Literature Asja Szafraniec, 2007 The late Jacques Derrida's notion of literature is explored in this new study Starting with Derrida's self professed inability to comment on the work of Samuel Beckett whom Derrida nevertheless considered one of the most interesting and exemplary writers of our time Asja Szafraniec argues that the shared feature of literary works as Derrida understands them is a double juridical economical gesture and that one aspect of this notion the juridical is more hospitable to Beckett's oeuvre than the other She then discusses other contemporary philosophical approaches to Beckett including those of Gilles Deleuze Stanley Cavell and Alain Badiou The book offers an innovative analysis of Derrida's approach to literature as well as an overview of current philosophical approaches to contemporary literature and a number of innovative readings of Beckett's work *Blanchot and Literary Criticism* Mark Hewson, 2011-09-01 An outstanding overview of Blanchot's importance to contemporary literary theory
