Alexander, 2015-12-31

Armor and weaponry were central to Islamic culture not only as a means of conquest and the spread of the faith but also as symbols of status wealth and power. The finest arms were made by master craftsmen working with the leading designers goldsmiths and jewelers whose work transformed utilitarian military equipment into courtly works of art. This book reveals the diversity and artistic quality of one of the most important and encyclopedic collections of its kind in the West. The Metropolitan Museum's holdings span ten centuries and include representative pieces from almost every Islamic culture from Spain to the Caucasus. The collection includes rare early works among them the oldest documented Islamic sword and is rich in helmets and body armor decorated with calligraphy and arabesques that were worn in Iran and Anatolia in the late fifteenth century. Other masterpieces include a jeweled short sword yatagan with a blade of watered steel that comes from the court of Sleyman the Magnificent a seventeenth century gold inlaid armor associated with Shah Jahan and two gold inlaid flintlock firearms belonging to the guard of Tipu Sultan of Mysore. Presenting 126 objects each handsomely photographed and richly documented with a detailed description and discussion of its technical historical and artistic importance this overview of the Met's holdings is supplemented by an introductory essay on the formation of the collection and appendixes on iconography and on Turkman style armor.

A Cumulative Bibliography of Medieval Military History and Technology Kelly DeVries,2001-11-01 There is perhaps no other more lively area for study in medieval history than medieval military history with its attendant and complementary field the

history of medieval military technology In the past twenty years it seems that more major scholarly inroads have been made in this field than in any other historical genre of medieval studies or chronological period of military history What this has meant is that it is now more difficult to keep up with all of the trends and sources in the field than ever before Hence the need for a reference work which covers what has previously been written and which in turn can assist the scholar both the more experienced academic and the beginner to improve his or her work in medieval military history or the history of medieval military technology Utilizing library catalogues bibliographies and footnotes this bibliography has compiled the most complete list of secondary references to works in medieval military history and the history of military technology It keeps fairly strictly to a geography which centers on conventional medieval boundaries Europe Byzantium and the Middle East However the chronology does differ from the conventional medieval dates Because of its influence on the early Middle Ages references to Late Antiquity especially to the military history and technology of the third and fourth century Roman Empire have been included For the opposite reason the influence of the Middle Ages on the sixteenth and early seventeenth centuries references to military history and technology up to 1648 have been included as well This is especially important in the study of the Ottoman Turkish Wars and Arms and Armor where the end of the fifteenth century as a chronological terminus makes little sense

Library Catalog of the Metropolitan Museum of Art, New York: Architecture D-Art Am Metropolitan Museum of Art (New York, N.Y.). Library,1980 **Brassey's Book of Body Armor** Robert C.

Woosnam-Savage,Anthony Hall,2001 Body armour has evolved along with advancements in technology and weaponry from the tunics of chain mail to the use of tough lightweight materials that stop bullets and protect against toxic weapons and radiation This fascinating story is brought vividly to life in this impressive full colour book as it examines how civilisations around the world have used and developed armour throughout the ages from the Egyptian scale armour of 1500BC to modern police and army riot gear *Warriors and their Weapons around the Time of the Crusades* David Nicolle,2024-10-28

The technological relationship between the three main civilizations of the Western world Byzantium the Islamic world and the West most particularly in the area of arms armour and military technology is a field of research for which Dr Nicolle is noted This volume deals principally with Western Europe and Byzantium which for many centuries learnt from the Muslims in these matters several articles also focus on military interactions in the Crusader states The work draws upon both written and archaeological sources but above all makes use of the depictions of war and military equipment in contemporary art to examine the interconnections across the medieval world
