Lower Atmosphere Of Solar Flares Relatio:

Possible Relationships Between Solar Activity and Meteorological Phenomena William R. Bandeen, Stephen P. Maran, 1974 Possible Relationship Between Solar Activity and Meteorological Phenomena William R. Bandeen, Stephen P. Maran, 1975 A symposium was conducted in which the following questions were discussed 1 the evidence concerning possible relationships between solar activity and meteorological phenomena 2 plausible physical mechanisms to explain these relationships and 3 kinds of critical measurements needed to determine the nature of solar meteorological relationships and or the mechanisms to explain them and which of these measurements can be accomplished best from space

Solar-Terrestrial Relations Leonty Miroshnichenko, 2023-05-24 This book presents a brief review of modern concepts of the Sun Earth problem and proposed physical mechanisms of solar terrestrial relations STR This field covers a wide range of fundamental and actual applied problems of paramount importance Space Weather radiation hazard in space functioning of space borne and ground based technological systems heliobiology etc It is also closely tied with some general gnosiological problems The author provides state of the art information about existing problems and discusses different channels for extraterrestrial influences at the up to date level electromagnetic waves and fields total solar irradiance solar wind energetic solar particles galactic cosmic rays cosmic dust etc Some of the well known and suggested STR effects and corresponding physical mechanisms are illustrated by several examples In particular a number of different external signals in observed changes of terrestrial climate and weather are considered Especially an expected impact of geophysical disturbances on the accuracy of some precise physical measurements and experiments is analysed Due attention is paid to the heliobiological aspects of STR Particular emphasis is on the multifactor nature of magneto biological effect MBE its non stationary and non linear behaviour The author also discusses main features of different physical mechanisms electromagnetic fields ionising radiation triggers rhythmic and resonances in solar terrestrial systems and their applicability to the Sun Earth problem The most of them are still needed in more sophisticated theoretical development and experimental confirmation The main goals of interdisciplinary studies in this field are to determine partial impacts of solar geomagnetic variability on the terrestrial environments and estimate separate relative contributions of different factors into various STR phenomena The book is based on lectures given on advanced undergraduate level and will also benefit newcomers physicists and engineers to the field
