Cartography Project has charted the course for scholarship on cartography bringing together research from a variety of
disciplines on the creation dissemination and use of maps Volume 6 Cartography in the Twentieth Century continues this
tradition with a groundbreaking survey of the century just ended and a new full color encyclopedic format The twentieth
century is a pivotal period in map history The transition from paper to digital formats led to previously unimaginable dynamic
and interactive maps Geographic information systems radically altered cartographic institutions and reduced the skill
required to create maps Satellite positioning and mobile communications revolutionized wayfinding Mapping evolved as an
important tool for coping with complexity organizing knowledge and influencing public opinion in all parts of the globe and at
all levels of society Volume 6 covers these changes comprehensively while thoroughly demonstrating the far reaching effects
of maps on science technology and society and vice versa The lavishly produced volume includes more than five hundred
articles accompanied by more than a thousand images Hundreds of expert contributors provide both original research often
based on their own participation in the developments they describe and interpretations of larger trends in cartography
