

Algebraic Notation

We group letters together

$$a + a + a$$

Means 3 lots of a

$$3 \times a$$

$$b + b$$

Means 2 lots of b

$$2 \times b$$

We use indices/powers

$$a \times a = a^2$$

(a squared)

$$b \times b \times b = b^3$$

(b cubed)

We do not use multiplication signs

$$3 \times a = 3a$$

$$6 \times b = 6b$$

$$a \times b = ab$$

$$a \times b \times c$$

$$= abc$$

We write division using fractional notation

$$a \div 2$$

Is written as

$$\frac{a}{2} \text{ or } \frac{1}{2}a$$

$$b \div 3$$

Is written as

$$\frac{b}{3} \text{ or } \frac{1}{3}b$$

A Concise History of Musical Notation John GREEN (Music Publisher.),1844 *A Music Notation Primer* Glen R. Rosecrans,1976 **Elements & Notation of Music** James Matthew McLaughlin,1902 Jim Blinn's Corner: Notation, Notation, Notation Jim Blinn,2003 In this third compendium of articles selected from his award winning column Blinn addresses topics in mathematical notation and cubic curves among other topics and shares the tricks he has uncovered through years of experimentation Twenty perplexing topics are addressed with solutions thoroughly illustrated in an award winning style **Music Notation** Mark McGrain,1990-07-01 Berklee Methods Learn the essentials of music notation from fundamental pitch and rhythm placement to intricate meter and voicing alignments This book also covers the correct way to subdivide rhythms and notate complex articulations and dynamics An excellent resource for both written and computer notation software **The Story of Notation** C. F. Abdy Williams,2014-01 An excerpt from the INTRODUCTORY SKETCH THE representation of musical sounds in writing called musical notation or simply notation from nota a mark or sign is a thing so commonplace so universal and apparently so simple that we are apt to overlook the fact that our stave with its variously shaped notes and all that goes to convey a composer's thoughts to the world are the outcome of centuries of experiments and gradual improvements Whether the Egyptians the Hebrews Chaldeans and other Semitic nations which had arrived at a certain degree of musical culture noted their music is not known it may be presumed that they did but up to the present nothing has been discovered of the nature of a musical semeiography It cannot be said that these nations were not yet sufficiently advanced to be able to invent a means of writing down the various sounds of voices and instruments the fact remains that as far as we know at present the Greeks were the only ancient European nation that did so and they made use of letters of the alphabet for this purpose as did the Hindus before them and the Western Europeans after them the Persians Other used numbers and a kind of stave of nine lines between which the numbers were placed while the Chinese used special signs for their pentatonic scale The history of our present notation begins with that of the Greeks who arranged their alphabet in groups of three letters to each tone thus showing the semitones and quarter tones The knowledge of this arrangement passed away until rediscovered in the nineteenth century by the labours of Bellermand Fortlage and others who have explained the notation tables given by Alypius Aristides Nicomachus Ptolemy Gaudentius and later writers The tables arranged according to tropes and modes show successions of letters apparently taken at haphazard to indicate the seven notes of the three kinds of scale the diatonic chromatic and enharmonic The Greeks also used a system of time signs two of which have survived to the present day in the long and short u signs placed over vowels in Latin grammars and they had means of representing accent so that their notation was as complete as the mediaeval tablatures of which we shall speak later or the modern tonic sol fa The first use of Latin letters for representing musical sounds is found in the writings of Boethius about A D 500 though it is a mistake to speak of the Boethian notation since he never used the letters to indicate

musical melodies **The Story of Notation** C. F. Abdy Williams, 1969 **From Notation to Music** Ralph J. Blauvelt, 2007

FROM NOTATION TO MUSIC tells the story of one composer's search for meaning in the musical notations of the late 20th Century. Radical departures from the traditional composer-performer relationship contributed to a re-evaluation of traditional notation. Ralph Blauvelt recounts his confrontation with these issues and the development of his own philosophy in the music he composed between 1964 and 1981. He traces the evolution of his ideas through more than eighty compositions. After working to master the notation of traditional music and the highly determinate notations of serial music, he describes the influence of Karlheinz Stockhausen on his first compositions with indeterminate notations. Studies with Lejaren Hiller and experiments with computer and electronic music inspired new compositions. With over 190 photographs and illustrations, Ralph Blauvelt describes his journey and the ideas that led to his text pieces and graphic visual scores.

The Story of Notation Charles Francis Abdy Williams, 1903 **Extended Notation** Christian Dimpker, 2013

Most of the extended instrumental playing techniques as well as electroacoustic music in general are still deprived of a conventional method of notation. In order to facilitate the utilization of these unconventional musical elements, a coherent and consistent notation system is developed in this work. Numerous extended techniques for playing string instruments, wind instruments, percussion instruments, keyboard instruments, and vocal techniques are therefore systematically explained and previous methods of notation discussed.
