Development and Crisis of the Welfare State Evelyn Huber,John D. Stephens,2010-04-15 Evelyn Huber and John D Stephens offer the most systematic examination to date of the origins character effects and prospects of generous welfare states in advanced industrial democracies in the post World War II era They demonstrate that prolonged

government by different parties results in markedly different welfare states with strong differences in levels of poverty and inequality Combining quantitative studies with historical qualitative research the authors look closely at nine countries that achieved high degrees of social protection through different types of welfare regimes social democratic states Christian democratic states and wage earner states In their analysis the authors emphasize the distribution of influence between political parties and labor movements and also focus on the underestimated importance of gender as a basis for mobilization Building on their previous research Huber and Stephens show how high wages and generous welfare states are still possible in an age of globalization and trade competition **OECD Economic Surveys ,2000** **OECD Economic Surveys:**

Privatisation in the European Union Judith Clifton,Francisco Comín,Daniel Díaz Fuentes,2003-07-31 At the end of the 1970s the prospect of privatising public enterprises which operated in sectors such as water telecommunications railways or air transportation seemed a thoroughly unappealing one in political terms Not even the future privatisation champion the British Conservative Party envisaged this kind of reform when it came to power in 1979 Only two decades later however privatisation had become a global fashion The EU region has been at the forefront of these developments What are the factors that explain this shift Judith Clifton Francisco Comín and Daniel Díaz Fuentes in Privatisation in the European Union reject the two dominant explanations provided in literature which include a simple Americanisation of policy and a varied privatisation experience without a common driving force Using a systematic comparative analysis of privatisation experiences in each country from the 1980s to the beginning of the twenty first century the authors show how the process of European integration and the need for internationally competitive industries have constituted key driving forces in the quest for privatisation across the EU As privatisation slows down at the turn of the millennium what future can citizens expect for public enterprises Privatisation in the European Union is essential reading for researchers students and policy makers interested in privatisation EU policy and the history of public enterprises Rethinking Economic Liberalization Jonah D. Levy,2025-01-09 In this innovative book Jonah Levy conducts an insightful investigation into economic liberalization and articulates a progressive alternative to neoliberalism compatible with the values and interests of leftist governments and parties OECD Economic Surveys: United Kingdom 2011 OECD,2011-03-16 The 2011 edition of OECD s periodic survey of
