The People's Network Robert MacDougall, 2014-01-08 The Bell System dominated telecommunications in the United States and Canada for most of the twentieth century but its monopoly was not inevitable In the decades around 1900 ordinary citizens farmers doctors small town entrepreneurs established tens of thousands of independent telephone systems stringing their own wires to bring this new technology to the people Managed by opportunists and idealists alike these small businesses were motivated not only by profit but also by the promise of open communication as a weapon against monopoly capital and for protection of regional autonomy As the Bell empire grew independents fought fiercely to retain control of their local networks and companies a struggle with an emerging corporate giant that has been almost entirely forgotten The People's Network reconstructs the story of the telephone's contentious beginnings exploring the interplay of political economy business strategy and social practice in the creation of modern North American telecommunications Drawing from government documents in the United States and Canada independent telephone journals and publications and the archives of regional

Ending Discrimination Against People with Mental and Substance Use Disorders National Academies of Sciences, Engineering, and Medicine,Division of Behavioral and Social Sciences and Education,Board on Behavioral, Cognitive, and Sensory Sciences,Committee on the Science of Changing Behavioral Health Social Norms,2016-08-03 Estimates indicate that as many as 1 in 4 Americans will experience a mental health problem or will misuse alcohol or drugs in their lifetimes These disorders are among the most highly stigmatized health conditions in the United States and they remain barriers to full participation in society in areas as basic as education housing and employment Improving the lives of people with mental health and substance abuse disorders has been a priority in the United States for more than 50 years The Community Mental Health Act of 1963 is considered a major turning point in America s efforts to improve behavioral healthcare It ushered in an era of optimism and hope and laid

the groundwork for the consumer movement and new models of recovery The consumer movement gave voice to people with mental and substance use disorders and brought their perspectives and experience into national discussions about mental health However over the same 50 year period positive change in American public attitudes and beliefs about mental and substance use disorders has lagged behind these advances Stigma is a complex social phenomenon based on a relationship between an attribute and a stereotype that assigns undesirable labels qualities and behaviors to a person with that attribute Labeled individuals are then socially devalued which leads to inequality and discrimination This report contributes to national efforts to understand and change attitudes beliefs and behaviors that can lead to stigma and discrimination Changing stigma in a lasting way will require coordinated efforts which are based on the best possible evidence supported at the national level with multiyear funding and planned and implemented by an effective coalition of representative stakeholders Ending Discrimination Against People with Mental and Substance Use Disorders The Evidence for Stigma Change explores stigma and discrimination faced by individuals with mental or substance use disorders and recommends effective strategies for reducing stigma and encouraging people to seek treatment and other supportive services It offers a set of conclusions and recommendations about successful stigma change strategies and the research needed to inform and evaluate these efforts in the United States *The People's Guide* Cline & McHaffie,1874
