Report of the Chief of Engineers U.S. Army United States. Army. Corps of Engineers, 1898 Includes the Report of the Mississippi River Commission 1881 19 **The Roman Peasant Project 2009-2014** Kim Bowes, 2021-06-04 This book presents the results of the first systematic archaeological study of Roman peasants It examines the spaces architecture diet agriculture market interactions and movement habitus of non elite rural dwellers in a region of southern Tuscany Italy during the Roman period Volume 1 presents the excavation data from eight non elite rural sites including a farm a peasant house animal stall work huts a ceramics factory field drains and a site of uncertain function here framed as individual chapters complete with finds analysis Volume 2 examines this data synthetically in thematic chapters addressing land use agriculture diet markets and movement The results suggest a different more sophisticated Roman peasant than heretofore assumed The data suggests that Roman peasants particularly in the first century BC AD built specialized sites distributed throughout the landscape to maximize use of diverse land parcels This has important implications for the interpretation of field survey data the estimate of rural demographics from that survey and assumptions about the long term changes to human settlement It also points to an important moment of agricultural intensification in this period a contention beginning to be supported by other studies The project also identified sophisticated systems of land use including crop rotation and an important investment in animal agriculture This work presents the first systematic data from Roman Italy for rural consumption tracking the fine wares made at a production site to local sites nearby This supports the largely theoretical problematizing of the so called consumer city model and suggests the potential importance of rural aggregate demand Movement studies based on finds from the sites themselves describe a more mobile population than anticipated engaged in quotidian and long distance movement patterns supported by the small but steady stream of imports and exports into and out of this seemingly liminal region The book concludes by addressing the implications of this new data for major questions in Roman social and economic history Report of the Chief of Engineers United States. Taft Court: Volume 10 Robert C. Post, 2023-11-09 The Taft Court offers the definitive history of the Supreme Court from 1921 to 1930 when William Howard Taft was Chief Justice Using untapped archival material Robert C Post engagingly recounts the ambivalent effort to create a modern American administrative state out of the institutional innovations of World War I He shows how the Court sought to establish authoritative forms of constitutional interpretation despite the culture wars that enveloped prohibition and pervasive labor unrest He explores in great detail how constitutional law responds to altered circumstances The work provides comprehensive portraits of seminal figures such as Oliver Wendell Holmes Jr and Louis Dembitz Brandeis It describes William Howard Taft s many judicial reforms and his profound alteration of the role of Chief Justice A critical and timely contribution The Taft Court sheds light on jurisprudential debates that are just as relevant today as they were a century ago *Annual Report of the Chief of Engineers to the Secretary of War for the Year ...* United States.
