The Globe on Paper Giuseppe Marcocci,2020-07-02 The age of exploration exposed the limits of available universal histories Everyday interactions with cultures and societies across the globe brought to light a multiplicity of pasts which proved difficult to reconcile with an emerging sense of unity in the world Among the first to address the questions posed by this challenge were a handful of Renaissance historians On what basis could they narrate the history of hitherto unknown peoples Why did the Bible and classical works say nothing about so many visible traces of ancient cultures And how far was it possible to write histories of the world at a time of growing religious division in Europe and imperial rivalry around the world A study of the cross fertilization of historical writing in the sixteenth and early seventeenth centuries The Globe on Paper reconstructs a set of imaginative accounts worked out from Mexico to the Moluccas and Peru and from the shops of Venetian printers to the rival courts of Spain and England The pages of this book teem with humanists librarians missionaries imperial officials as well as forgers and indigenous chroniclers Drawing on information gathered or said to have been gathered from eyewitness reports interviews with local inhabitants ancient codices and material evidence their global narratives testify to an unprecedented broadening of horizons which briefly flourished before succumbing to the forces of imperial and religious reaction

European expansion *Travellers and Cosmographers* Joan-Pau Rubiés, 2023-06-14 Joan Pau Rubiés brings together here eleven studies published between 1991 and 2005 that illuminate the impact of travel writing on the transformation of early modern European culture. The new worlds that European navigation opened up at the turn of the 16th century elicited a great deal of curiosity and were the subject of a vast range of writings, much of them with an empirical basis albeit often subtly fictionalized. In the context of intense literary and intellectual activity that characterized the Renaissance, the encounters generated by European colonial activities in fact produced a remarkable variety of images of human diversity. Some of these images were conditioned by the actual dynamics of cross-cultural encounters overseas, but many others were elaborated in Europe by cosmographers, historians and philosophers pursuing their own moral and political agendas. As the studies included here show, the combined effect was in the long term dramatic, interacting with the impact of humanism and of insurmountable religious divisions, travel writing decisively contributed to the transformation of European culture towards the concerns of the Enlightenment. The essays illuminate this process through a combination of general discussions and the contextual analysis of particular texts and debates, ranging from the earliest ethnographies produced by merchants travelling to Asia with Vasco da Gama to the writings of Jesuit missionaries researching idolatry in India and China, or thinkers like Hugo Grotius seeking to explain the origin of the American Indians.

Transnational Portuguese Studies Hilary Owen, Claire Williams, 2020-06-17 *Transnational Portuguese Studies* offers a radical rethinking of the role played by the concepts of nationhood and the nation in the epistemologies that underpin Portuguese Studies as an academic discipline. Portuguese Studies offers a particularly rich and enlightening challenge to methodological nationalism in Modern Languages, not least because the teaching of Portuguese has always extended beyond the study of the single western European country from which the language takes its name. However, this has rarely been analysed with explicit or critical reference to the transnational turn in Arts and Humanities. This volume of essays from leading scholars in Portugal, Brazil, the USA and the UK explores how the histories, cultures and ideas constituted in and through Portuguese language resist borders and produce encounters from the manoeuvres of 15th-century globalization and cartography to present-day mega-events such as the Rio Olympics. The result is a timely counter-narrative to the workings of linguistic and cultural nationalism, demonstrating how texts, paintings and photobooks, musical forms, political ideas, cinematic representations, gender identities, digital communications and lexical forms may travel, translate and embody transcultural contact in ways which only become readable through the optics of transnationalism. The 'Book' of Travels: Genre, Ethnology, and Pilgrimage, 1250-1700 Palmira Brummett, 2009-04-24 The early modern era is often envisioned as one

in which European genres both narrative and visual diverged indelibly from those of medieval times This collection examines a disparate set of travel texts dating from the thirteenth to the seventeenth centuries to question that divergence and to assess the modes themes and ethnologies of travel writing It demonstrates the enduring nature of the itinerary the variant forms of witnessing including imaginary maps the crafting of sacred space as a cautionary tale and the use of the travel narrative to represent the transformation of the authorial self Focusing on European travelers to the expansive East from the soft architecture of Timur s tent palaces in Samarqand to the ambiguities of sexual identity at the Mughul court these essays reveal the possibilities for cultural translation as travelers of varying experience and attitude confront remote and foreign or not so foreign space
