A. M. L. Lever, Kuan-Teh Jeang, Ben Berkhout, 2010 There are three major types of human retroviruses namely HIV HTLV and endogenous human retroviruses This book presents the latest findings on the replication of these human retroviruses This book is unique in that there has been no comparable book that integrates the findings from the three known classes of human retroviruses Other books have focused on one of the three classes of human retroviruses individually An accomplished international team of contributing authors have combined their expertise to provide cutting edge findings in this important field The book will be a valuable reference for students researchers and medical professionals Progress in Animal Retroviruses International Association of Biological Standardization, 1990 **Recent Advances in Animal Virology**
Yashpal Singh Malik, Raj Kumar Singh, Mahendra Pal Yadav, 2019-11-14 This book discusses the prominence and implication of the viral diseases that are a major threat to animals around the globe A number of these diseases have also shown links with human populations which has implications for public health This book offers detailed and up to date information on viral diseases in livestock and poultry that were and or are still a problem Including cutting edge developments it also highlights several landmark contributions in the field of virology from India Additionally the book features tables and figures showing important clinical data and recommendations with references for further information It also explores the economic impact of viral diseases for farmers and the livestock industry providing several examples Further it presents the latest information on viral diseases in global context with a focus on state of art molecular tools for the development of diagnostics prophylactics and therapeutics Lastly the book also describes the challenges posed by the emerging and transboundary viral infections and our preparedness to counter them *National Library of Medicine Current Catalog* National Library of Medicine (U.S.), 1992 The Retroviridae Jay A. Levy, 2013-06-29 In this second volume in the series The Retroviridae the readers are treated to up to date reviews on these viruses which are found in a variety of animal species The volume begins with important observations on the general features of retrovirus entry into cells as determined by the viral envelope glycoproteins and the cell surface receptors Chapter 1 Aspects of this virus cell interaction form the basis for the variety of biologic effects associated with this virus family A timely review of the oncogenic feline viruses is included next Chapter 2 These viruses along with the avian and murine retroviruses Volume 1 Chapters 6 and 7 have provided valuable insight into cancer induction in other animal species including humans Two other major groups of retroviruses the lentiviruses and the spuma viruses are introduced in the present volume Initially these groups along with oncoviruses were the three subfamilies in the Retroviridae This complex virus family has now been reclassified into seven separate genera Volume 1 Chapter 2 Equine infectious anemia virus is the prototype for a lentivirus Chapter 5 One of the first viruses discovered in nature 1904 it was only relatively recently recognized as a retrovirus Lentiviruses are associated primarily with immunologic disorders

such as autoimmunity and AIDS Chapters 3 5 but their association with neurologic disease is also well established Chapters 4 and 5 and future volumes *Vaccines and Diagnostics for Transboundary Animal Diseases* J.A. Roth, J.A. Richt, I.A.

Morozov, 2013-04-18 Transboundary animal diseases TADs are a major threat to livestock They are highly contagious or transmissible and they have the potential to cause high morbidity and mortality in both susceptible animal populations and humans In addition not only are TADs detrimental to national economies they are also a serious threat to world food security This volume presents the proceedings of an international workshop on Vaccines and Diagnostics for Transboundary Animal Diseases that was held in Ames Iowa USA in 2012 Experts and scientists from academia industry and government reviewed the current status of vaccines and diagnostics for high priority TADs decision making and regulatory processes for veterinary biologics and the roles and responsibilities of government agencies The discussions also addressed achievements and gaps in vaccine and diagnostics development for 11 important TADs as well as the translation of research findings into licensed novel vaccines and diagnostics for high priority TADs *Animal Models of Disease* Cynthia Petrie Smith, 1994 *Animal Models of Retrovirus Infection and Their Relationship to AIDS* Lois Ann Salzman, 1986 *Animal Models of Disease* Tim Allen, 1995
