## **Progreb In Drug Research Volume 28 Progreb In Drug Research:**

*Progress in Drug Research / Fortschritte der Arzneimittelforschung / Progrès des recherches pharmaceutiques*  
JUCKER,2013-03-13 The present 18th volume differs from previous volumes insofar as with the exception of two contributions it is exclusively concerned with problems of a single field namely Tropical Medicine This was occasioned by the International Symposium on the investigation and treatment of infectious tropical diseases held in Bombay in January 1974 and organized by the editor in collaboration with the Minister of Health of the State of Maharashtra Dr Rafiq Zakaria the Director of the Hafl kine Institute Dr B Gaitonde and with Dr J N Banerjee Dr S K Bhattacharya and Mr P D Souza The Hafl kine Institute celebrated on this occasion the 75th year of its existence and everyone entrusted with the organisation of the Symposium considered themselves fortunate to have been able to help in strengthening the contacts between Indian and foreign research workers in the hope of in this way making a contribution to the fight against infectious tropical diseases The editor hopes that the present 18th volume will represent comprehensive information on the topics treated at the Symposium the 19th volume which will soon appear is concerned with the same area so that the two volumes together should give a good picture of the many still unsolved problems The editor would also like to take this opportunity of expressing his gratitude to his collaborator Dr A Niif who as usual performed valuable services in working over the manuscripts *Progress in drug research. 49.1997* Ernst Jucker,1997 From the contents A C Brater and M D Murray The effects of NSAIDs on the kidney A G Edwards and A H Weston Latest developments in potassium channel modulator drugs A M R Juchau and Y Huang Chemical teratogenesis in humans Biochemical and molecular mechanisms A S P Gupta Studies on cardiovascular drugs A G Polak Antifungal chemotherapy An everlasting battle A O Valdenaire New insights into the bioamine receptor family *The Evolution of Drug Discovery* Enrique Ravina,2011-04-18 The discovery and use of medicines is just as fascinating a human scientific endeavor as space flight or the tracing of human evolution It is also the everyday task of hundreds of thousands of pharmacists pharmaceutical chemists and researchers worldwide Based on his profound knowledge of past and present paradigms in the development of medicines Enrique Ravina takes the reader from the very beginnings of pharmacology to the multibillion dollar business it represents today Recounting the often spectacular successes and failures of innovative drugs as well as the people who discovered them he brings abstract science to life in anecdotal form For anyone with a more than superficial interest in the science of drugs and all those interested in knowing how drugs have been developed how they have reached us and became part of our daily life This book is beautifully illustrated containing many rare and historical photographs of drugs and their discoverers and abounds with references to the primary literature listing seminal publications alongside more modern reviews for readers seeking further details With a Foreword by Hugo Kubinyi **Progress in drug research. 50.1998** Ernst Jucker,1998 Progress in Drug Research is a prestigious book series founded in 1959 which provides extensive expert written reviews on a wide spectrum of highly topical areas in current pharmaceutical and

pharmacological research Each volume contains fully cross referencing indexes which link the volumes together forming a virtually encyclopaedic work The series thus serves as an important time saving source of information for researchers concerned with drug research and all those who need to keep abreast of the many recent developments in the quest for new and better medicines Volume 50 in the series includes P N Kaul Drug discovery Past present and future M Rohmer Isoprenoid biosynthesis via the mevalonate independent route a novel target for antibacterial drugs G Edwards and A H Weston Endothelium derived hyperpolarizing factor a critical appraisal R W Rockhold Glutamate involvement in psychomotor stimulant action J M Colacino and K A Staschke The identification and development of antiviral agents for the treatment of chronic hepatitis B virus infection T D Johnson Polyamines and cerebral ischemia **Progress in Drug**

**Research**, 2012-12-06 Hypertension is one of the cardiovascular diseases which is most common throughout the world It is generally defined as an elevation of systolic and or diastolic arterial blood pressure which is 120/80 mm Hg in normal situation A value of 140/90 mm is generally accepted as the upper limit of normotension Hypertension with certain risk factors such as hypercholesterolemia diabetes smoking and a family history of vascular disease pre disposes to arteriosclerosis and consequent cardiovascular morbidity and mortality The treatment of hypertension leads to reduced risk of hypertensive renal failure haemorrhagic stroke myocardial infarction and cardiac failure In most cases the cause of the hypertension can not be clearly defined Such hypertension is termed as essential hypertension In a few cases 5-15% the hypertension is secondary to definable causes such as renal artery stenosis a pheochromocytoma or an endocrine disorder This type of hypertension is known as secondary hypertension Although the exact etiology of essential hypertension is still not well known the following factors are supposed to play causative roles **Progress in Drug Research** Ernst
