Research contains eight reviews and the various indexes which facilitate its use and establish the connection with the previous volumes. The articles in this volume deal with teratogenesis, nephrotoxicity, bacterial resistance to *P. lactam*, antibiotics, eradication of diseases by vaccination, chirality and drug design, endogenous digitalis-like factors, erythropoietin and serotonin, 5HT antagonists. All these articles give an excellent overview of the respective fields of research. In the 33 years that POR has existed, the Editor has enjoyed the valuable help and advice of many colleagues. Readers, the authors of the reviews and last but not least the reviewers have all contributed greatly to the success of this series. Although the comments received so far have generally been favorable, it is nevertheless necessary to analyze and to reassess the current position and the future direction of such a review series. So far it has been the Editors' intention to help disseminate information on the vast domain of drug research and to provide the reader with a tool with which to keep abreast of the latest developments and trends. The reviews in POR are useful to the non-specialists who can obtain an overview of a particular field of research in a relatively short time. The specialist readers of POR will appreciate the reviews, comprehensive bibliographies and in addition they may even get fresh impulses for their own research.

Progress in drug research.
50.1998 Ernst Jucker, 1998. Progress in Drug Research is a prestigious book series founded in 1959 which provides extensive expert-written reviews on a wide spectrum of highly topical areas in current pharmaceutical and pharmacological research. Each volume contains fully cross-referencing indexes which link the volumes together, forming a virtually encyclopaedic work. The series thus serves as an important time-saving source of information for researchers concerned with drug research and all those who need to keep abreast of the many recent developments in the quest for new and better medicines. Volume 50 in the series includes: P. N. Kaul, Drug discovery: Past, present and future; M. Rohmer, Isoprenoid biosynthesis via the mevalonate-independent route: a novel target for antibacterial drugs; G. Edwards and A. H. Weston, Endothelium-derived hyperpolarizing factor: a critical appraisal; R. W. Rockhold, Glutamate involvement in psychomotor stimulant action; J. M. Colacino and K. A. Staschke, The identification and development of antiviral agents for the treatment of chronic hepatitis B virus infection; T. D. Johnson, Polyamines and cerebral ischemia.

Progress in Drug Research is a prestigious book series which provides extensive expert-written reviews on a wide spectrum of highly topical areas in current pharmaceutical and pharmacological research. It serves as an important source of information for researchers concerned with drug research and all those who need to keep abreast of the many recent developments in the quest for new and better medicines.

Advances in Drug Research, 1995-09-05. Volume 26 continues the trend of shorter, more frequent volumes. With Volume 25, the series gained a new co-editor, Urs Meyer. While retaining the commitment to publish chapters on therapeutic or chemical classes and on

general topics or concepts the series coverage has expanded to include methodological chapters and new areas of recognized or potential significance to drug research especially in molecular pharmacology *Progress in Drug Research* Ernst M. Jucker, 2012-12-06 Jay A Glasel Drugs the human genome and individual based medicine Vera M Kolb Herbal medicine of Wisconsin Indians Paul L Skatrud The impact of multiple drug resistance MDR proteins on chemotherapy and drug discovery John W Ford Edward B Stevens J Mark Treherne Jeremy Packer and Mark Bushfield Potassium channels Gene family therapeutic relevance high throughput screening technologies and drug discovery David T Wong and Frank P Bymaster Dual serotonin and noradrenaline uptake inhibitor class of antidepressants Potential for greater efficacy of just hype Satya P Gupta Advances in QSAR studies of HIV 1 reverse transcriptase inhibitors **Progress in Drug Research 56**, 2012-12-06

Founded in 1959 by its current Editor the series has moved from its initial focus on medicinal chemistry to a much wider scope Today it encompasses all fields concerned with the development of new therapeutic drugs and the elucidation of their mechanisms of action reflecting the increasingly complex nature of modern drug research Invited authors present their biological chemical biochemical physiological immunological pharmaceutical toxicological pharmacological and clinical expertise in carefully written reviews and provide the newcomer and the specialist alike with an up to date comprehensive list of prime references Each volume of *Progress in Drug Research* contains fully cross referencing indices which link the books together forming a virtually encyclopaedic work The series thus serves as an important time saving source of information for researchers concerned with drug research and all those who need to keep abreast of the many recent developments in the quest for new and better medicines *Progress in Drug Research / Fortschritte der Arzneimittelforschung / Progrès des recherches pharmaceutiques* Ernst Jucker, 2013-03-07

Volume 47 of *Progress in Drug Research* contains eight reviews and the various indexes which facilitate its use and establish the connection with the previous volumes The articles in this volume deal with inotropic steroids with chemokines and their involvement in a wide range of inflammatory diseases with the subclassification and nomenclature of α_1 and α_2 adrenoceptors with Chinese traditional medicine with drug targets in the molecular pathogenesis of asthma with cytokines and their therapeutic application in immunosuppression and immunostimulation with alter native medicine and with the potential use of calcium blockers in psychiatry These reviews and the quotations of original articles provide the reader with valuable information on several new developments in the world wide search for new and better medicines In 1959 when the Editor started this series of monographs it was his intention to help disseminate information on the vast and fast growing domain of drug research Already at that time it was not possible to follow the major individual publications in this field and the reader was thereby provided with a tool to keep abreast of the latest developments and trends This goal remained unchanged over the last 37 years and I believe that the reviews in PDR are useful to the non specialist who can obtain an overview of a particular field of drug research in a relatively short time *Progress in Drug Research* Richard M.
