Materials in Medication Charles G. Gebelein, Charles E. Carraher Jr., 2013-11-11 The art of using chemical agents for medication dates back into antiquity although most of the earliest examples used plants herbs and other natural materials The old Egyptian medical papyri which date from before 1400 B C contain dozens of examples of such medicinal plants and animal extracts In the Old Testament of the Bible we can find references to using oil to soften the skin and sores Isaiah 1 6 the use of tree leaves for medicine Ezekiel 47 12 and various medical balms Jeremiah 8 22 Not all these recipes were effective in curing the ailments for which they were used and sometimes the treatment was worse than the disease Nevertheless the art of using chemical derived agents for medicines continued to develop and received great impetus during the present century with the rise of synthetic organic chemistry One of the most vexing problems has always been to achieve specificity with the medications While some medical agents do indeed possess a relatively high degree of specificity most agents are far more systemic than would be desired Much of the research efforts to correct this deficiency has centered on modifying the chemical agents themselves Unfortunately there are severe limitations in this approach since minor modifications often drastically affect the therapeutic activity and can even render the drug completely ineffective or worse
