**Publications in Operations Research** Operations Research Society of America, 1967      **Highway Noise; a Design Guide for Highway Engineers** Bolt, Beranek, and Newman, Bolt, Beranek, and Newman, inc, 1971 Various methods of assessing noise loudness and noise annoyance are reviewed and explained sources types and intensities of traffic noise are noted typical means of abatement and attenuation are described design criteria for various land uses ranging from low density to industrial are suggested and compared with the results of previous BBN and British systems for predicting annoyance and complaint and a design guide for predicting traffic noise capable of being programmed for batch and on line computer applications is presented in form suitable for use as a working tool A flow diagram describes the interrelationships of elements in the traffic noise prediction methodology and each element is discussed in detail in the text The text is presented of a tape recording that takes the listener through a series of traffic situations with such variables as traffic distance flow velocity distance outdoors and indoors and presence or absence of absorbers and attenuators      **Perspectives in Operations Research** Frank B. Alt, Michael C. Fu, Bruce L. Golden, 2006-12-26 A Symposium was held on February 25 2006 in honor of the 80th birthday of Saul I Gass and his major contributions to the field of operations research over 50 years This volume includes articles from each of the Symposium speakers plus 16 other articles from friends colleagues and former students Each contributor offers a forward looking perspective on the future development of the field      **History of Operations Research in the United States Army, V. 1, 1942-1962** Charles R. Shrader, 2006-10-05 Operations research OR emerged during World War II as an important means of assisting civilian and military leaders in making scientifically sound improvements in the design and performance of weapons and equipment OR techniques were soon extended to address questions of tactics and strategy during the war and after the war to matters of high level political and economic policy Until now the story of why and how the U S Army used OR has remained relatively obscure surviving only in a few scattered official documents in the memories of those who participated and in a number of notes and articles that have been published about selected topics on military operations research However none of those materials amounts to a comprehensive coherent history In this the first of three planned volumes Dr Charles R Shrader has for the first time drawn together the scattered threads and woven them into a well focused historical narrative that describes the evolution of OR in the U S Army from its origins in World War II to the early 1960s He has done an admirable job of ferreting out the surviving evidence shaping it into an understandable narrative and placing it within the context of the overall development of American military institutions Often working with only sparse and incomplete materials he has managed to provide a comprehensive history of OR in the U S Army that offers important insights into the natural tension between military leaders and civilian scientists the establishment and growth of Army OR organizations the use and abuse of OR techniques and of course the many important contributions that OR managers and analysts have made to the growth and improvement of the Army since

1942 In this volume Dr Shrader carries the story up to 1962 the beginning of the McNamara era and of America's long involvement in Vietnam The subsequent volumes will cover Army OR during the McNamara era its application in support of military operations in Vietnam and its significant contributions to the Army's post Vietnam recovery and reorganization ultimately leading to a victory after only 100 hours of combat in the first Gulf War in 1991 and the emergence of the U S Army as second to none in modern weaponry tactical prowess and strategic vision Decision and Value Theory Peter C. Fishburn, 1964 New Developments in Lasers and Electro-optics Research William T. Arkin, 2007 It is expected that ongoing advances in optics will revolutionise the 21st century as they began doing in the last quarter of the 20th Such fields as communications materials science computing and medicine are leaping forward based on developments in optics This new series presents leading edge research on optics and lasers from researchers spanning the globe *Integer Programming and Related Areas* C. Kastning, 2013-11-11 Integer Programming is one of the most fascinating and difficult areas in the field of Mathematical Optimization Due to this fact notable research contributions to Integer Programming have been made in very different branches of mathematics and its applications Since these publications are scattered over many journals proceedings volumes monographs and working papers a comprehensive bibliography of all these sources is a helpful tool even for specialists in this field I initiated this compilation of literature in 1970 at the Institut für Konometrie und Operations Research University of Bonn Since then many collaborators have contributed to and worked on it Among them Dipl Math Claus Kastning has done the bulk of the work With great perseverance and diligence he has gathered all the material and checked it with the original sources The main aim was to incorporate rare and not easily accessible sources like Russian journals preprints or unpublished papers Without the invaluable and dedicated engagement of Claus Kastning the bibliography would never have reached this final version For this reason he must be considered its responsible editor As with any other collection this literature list has a subjective viewpoint and may be in some sense incomplete We have however tried to be as complete as possible The bibliography contains 4704 different publications by 6767 authors which were classified by 11839 descriptor entries *Dictionary Catalog of the Department Library* United States. Hennart, 2013-03-09 In January 1992 the Sixth Workshop on Optimization and Numerical Analysis was held in the heart of the Mixteco Zapoteca region in the city of Oaxaca Mexico a beautiful and culturally rich site in ancient colonial and modern Mexican civilization The Workshop was organized by the Numerical Analysis Department at the Institute of Research in Applied Mathematics of the National University of Mexico in collaboration with the Mathematical Sciences

Department at Rice University as were the previous ones in 1978 1979 1981 1984 and 1989 As were the third fourth and fifth workshops this one was supported by a grant from the Mexican National Council for Science and Technology and the US National Science Foundation as part of the joint Scientific and Technical Cooperation Program existing between these two countries The participation of many of the leading figures in the field resulted in a good representation of the state of the art in Continuous Optimization and in an over view of several topics including Numerical Methods for Diffusion Advection PDE problems as well as some Numerical Linear Algebraic Methods to solve related problems This book collects some of the papers given at this Workshop     **Advances in Factories of the Future, CIM and Robotics** M. Cotsaftis, F.

Vernadat, 2013-10-22 Productivity enhancement is a major concern for all manufacturing enterprises Productivity enhancement can be achieved in many ways and many facets of its problems have been investigated over the last decades A number of methods tools and technologies have emerged to efficiently increase productivity and rationalize management of manufacturing enterprises International experts from both academia and industry share their experiences in this collection of articles contributing to the latest advances in the many facets of productivity enhancement in manufacturing enterprises Themes and visions are detailed on factories of the future new management approaches manufacturing system integration and manufacturing information systems These technical areas can be grouped into four major sections Factories of the future Techniques and tools for automated manufacturing Robotics and Industrial applications The papers illustrate a pattern of valuable and interesting approaches to the fascinating problem of designing a new generation of robots with high enough performance capabilities to be used in an industrial context     **History of operations research in the United States**

Taylor, Onalee H. Johnson, 1974 Professional nurses have long been identifying and interpreting clues related to the gathering of information from which such decisions could be consistently drawn The organization systematization and clustering of such clues required an extensive search of what was meaningful to nurses in different clinical settings The research staff who designed the project as a contract to fulfill some basic goals for collecting disseminating and utilizing information data for patients records have spent 3 years refining an assessment tool with two major factors in mind First a guideline was needed to obtain the most accurate information possible about individual patients in the context of their families and the community Second an assessment tool was needed which was computer manageable in the sense that it could be adapted to an on line system of computer input and retrieval which would supply significant information to multiple sources Two major sets of assessment records have been developed from an exhaustive trial of forms in a variety of settings Consultation has been obtained from resources country wide to insure as broad a view as possible of the current efforts in the development of new record systems Faculty students and nursing service staff members in hospitals and community health agencies have participated in the trials of these forms in real situations *Advances and Applications of DSMT for Information Fusion. Collected Works, Volume 5* Florentin Smarandache, Jean Dezert, Albena Tchamova, This fifth volume on Advances and Applications of DSMT for Information Fusion collects theoretical and applied contributions of researchers working in different fields of applications and in mathematics and is available in open access The collected contributions of this volume have either been published or presented after disseminating the fourth volume in 2015 available at [fs.unm.edu/DSMTbook4.pdf](http://fs.unm.edu/DSMTbook4.pdf) or [www.onera.fr/sites/default/files/2015-DSMTBook4.pdf](http://www.onera.fr/sites/default/files/2015-DSMTBook4.pdf) in international conferences seminars workshops and journals or they are new The contributions of each part of this volume are chronologically ordered First Part of this book presents some theoretical advances on DSMT dealing mainly with modified Proportional Conflict Redistribution Rules PCR of combination with degree of intersection coarsening techniques interval calculus for PCR thanks to set inversion via interval analysis SIVIA rough set classifiers canonical decomposition of dichotomous belief functions fast PCR fusion fast inter criteria analysis with PCR and improved PCR5 and PCR6 rules preserving the quasi neutrality of quasi vacuous belief assignment in the fusion of sources of evidence with their Matlab codes Because more applications of DSMT have emerged in the past years

since the apparition of the fourth book of DSMT in 2015 the second part of this volume is about selected applications of DSMT mainly in building change detection object recognition quality of data association in tracking perception in robotics risk assessment for torrent protection and multi criteria decision making multi modal image fusion coarsening techniques recommender system levee characterization and assessment human heading perception trust assessment robotics biometrics failure detection GPS systems inter criteria analysis group decision human activity recognition storm prediction data association for autonomous vehicles identification of maritime vessels fusion of support vector machines SVM Silx Furtif RUST code library for information fusion including PCR rules and network for ship classification Finally the third part presents interesting contributions related to belief functions in general published or presented along the years since 2015 These contributions are related with decision making under uncertainty belief approximations probability transformations new distances between belief functions non classical multi criteria decision making problems with belief functions generalization of Bayes theorem image processing data association entropy and cross entropy measures fuzzy evidence numbers negator of belief mass human activity recognition information fusion for breast cancer therapy imbalanced data classification and hybrid techniques mixing deep learning with belief functions as well *Spectrum Sharing in Wireless Networks* John D. Matyjas, Sunil Kumar, Fei Hu, 2016-11-17 *Spectrum Sharing in Wireless Networks* Fairness Efficiency and Security provides a broad overview of wireless network spectrum sharing in seven distinct sections The first section examines the big picture and basic principles explaining the concepts of spectrum sharing hardware software function requirements for efficient sharing and future trends of sharing strategies The second section contains more than 10 chapters that discuss differing approaches to efficient spectrum sharing The authors introduce a new coexistence and sharing scheme for multi hop networks describe the space time sharing concept introduce LTE U and examine sharing in broadcast and unicast environments They then talk about different cooperation strategies to achieve mutual benefits for primary users PU and secondary users SU discuss protocols in a spectrum sharing context and provide different game theory models between PUs and SUs The third section explains how to model the interactions of PUs and SUs using an efficient calculation method to determine spectrum availability Additionally this section explains how to use scheduling models to achieve efficient SU traffic delivery The subject of the fourth section is MIMO oriented design It focuses on how directional antennas and MIMO antennas greatly enhance wireless network performance The authors include a few chapters on capacity rate calculations as well as beamforming issues under MIMO antennas Power control is covered in the fifth section which also describes the interference aware power allocation schemes among cognitive radio users and the power control schemes in cognitive radios The sixth section provides a comprehensive look at security issues including different types of spectrum sharing attacks and threats as well as corresponding countermeasure schemes The seventh and final section covers issues pertaining to military applications and examines how the military task protects its data flows when sharing the spectrum with civilian applications

The Knowledge Management Yearbook 2000-2001 John A. Woods, James Cortada, 2013-05-13 The Knowledge Management Yearbook is the most current and comprehensive resource available for knowledge management professionals no other source of information so thoroughly surveys the state of the knowledge management discipline and industry and how they impact businesses and other organizations Featuring both definitive articles and cutting edge knowledge management techniques and research contributed by authorities The Knowledge Management Yearbook covers the nature of knowledge and its management knowledge based strategies knowledge management and organizational learning and knowledge tools techniques and processes The reference section includes a set of up to date directories detailing on line knowledge management resources KM publications and organizations and notable KM Quotes The glossary of KM terms is increasingly perceived by the industry as a benchmark by which this evolving discipline is defined The Knowledge Management Yearbook is an indispensable volume for any professional helping to shape his or her organization s knowledge strategy
