Motivation, Intention, and Volition Frank Halisch, Julius Kuhl, 2012-12-06 In Honor of Professor Dr Dr h c Heinz Heinzhausen's 60th Birthday **Cognition in Human Motivation and Learning** G. D'ydewalle, Willy Lens, 2013-05-13 Published in the year 1982 Cognition in Human Motivation and Learning is a valuable contribution to the field of Cognitive Psychology *Biological Contributions to Crime Causation* T.E. Moffitt, Sarnoff A. Mednick, 2012-12-06 This book presents reviews of the literature and reports of new findings from research into biological correlates of criminal behavior The chapters are revised versions of talks given by participants in an Advanced Study Institute sponsored by the North Atlantic Treaty Organization and held in Castelvechio Pascoli in September 1986 It is our second edited volume on biology and crime The first book *The Causes of Crime: New Biological Approaches* was published in 1987 In the preface to that book we described the regrettable history of the pseudobiological research into social problems conducted by the Social Darwinists at the turn of the century We requested that that unfortunate legacy not inhibit responsible and scientifically sound investigations of biological and psychological variables in criminology today Evidence is mounting that shows that research limited to social and environmental variables cannot explain the behavior of the minority of criminal offenders whose criminal careers begin in adolescence and develop into recidivistic and violent assaults on society Certainly these offenders are few but epidemiological studies have found them to be responsible for an amount of crimes disproportionate to their small numbers As few 5 % of males commit over 50% of criminal offenses Intervention directed at these relatively few individuals could if successful dramatically reduce our growing violent crime rate The chapters in our earlier book showed that some biological variables do relate to this type of chronic offending *Social Situations* Michael Argyle, Adrian Furnham, Jean Ann Graham, 1981-04-09 Documents the authors own studies of real life social situations and reviews the other literature in the

field **Damnation and Deviance** Mordechai Rotenberg, 2018-10-08 The Calvinist view that man is predestined to be among the elect or the damned has profoundly influenced not only our views of criminals and deviants but also the theoretical basis of correctional methods and psychotherapeutic techniques In this provocative and original volume Mordechai Rotenberg examines the impact of Protestant doctrine on Western theories of deviance He explores the inherent contradiction between Protestant ethics with its view of human nature as predestinated and the people changing sciences Rotenberg presents empirical studies that show how people's tendency to label themselves and others as deviant can be predicted on the basis of their exposure to Western socialization He contrasts alienating individuals the result of competitiveness and exaggerated independence fostered by socialization in Protestant societies to the reciprocal individualism of Hassidic Japanese and other non Western cultures Examining the Protestant bias of Western behavioral sciences Rotenberg examines modern theories of deviance and proposes alternative models He compares traditional past oriented insight therapy grounded in Calvinist methods of introspection self torment and conversion with Hassidic notions of redemption and salvation Rotenberg provides important historical and sociological insights into the intellectual origins of modern theories of deviance His argument that Western behavioral science retains a Calvinist view of humanity will force most scholars to examine anew the assumptions and foundations of their own theories Gerald N Grob Rutgers UniversityA highly original work which should be of great interest to anyone concerned with relevant behavior It shows how macro definitions in a society tend to lead people to think about themselves and their ills in certain ways and thus to deviate in certain ways Richard A Cloward co author *Regulating the Poor The Functions of Public Welfare* Reversal Theory M. J. Apter, D. Fontana, S. Murgatroyd, 2014-02-25 First published in 1985 In the eight years since the publication of the first papers by Apter and Smith outlining the basic principles of the theory of psychological reversals interest in the theory has grown rapidly So within this book the emphasis is very much upon opening up fresh avenues and interests with a view to stimulating and guiding those psychologists who whether as academics or as practitioners are involved with reversal theory at any level Some of the papers are based upon material presented at the International Symposium on Reversal Theory held under the sponsorship of the Welsh Branch of the British Psychological Society in September 1983 while others have been written specially for this book The topics covered have been carefully selected to give a representative flavour of what reversal theory is currently about Developmental Disabilities Michael Lewis, Lawrence T. meetings The interdisciplinary set of speakers was matched by an equally diverse audience who represented almost every professional group concerned with the needs of disabled children and their families Because of the successful information exchange that took place a published volume of the proceedings was determined to be useful for others who were not able to attend To all those who toil to help developmentally disabled children and their families we dedicate this volume Michael Lewis Lawrence T Taft vii CONTENTS Introduction xiii Part I Sensory Development 1 Handicapped Child Facts of Life 3 Meitt B Low 2 Theoretical Issues in the Early Development of Visual Perception 9 Joseph F Fagan III and Patricia Ann Shepherd 3 Clinical Appraisal of Vision 35 Richard N

Cocking,K. Ann Renninger,2013-06-17 One of the paradoxes in developmental theory is the child's simultaneous intrapsychic and interpsychic development While the child is growing in mental capacity and struggling to define self behaviors are also being learned whose function is to integrate self into a social network which often means that egocentric behaviors are in conflict with sociocentric ones This theory draws upon processes that promote both individual and social growth into a unified theory of development A construct pertinent to almost all dimensions of psychological research psychological distance is conceptualized as either the distance between what the learner understands and what still has to be understood intrapsychic or ways in which others adjust information for the learner in order to be fully comprehended interpsychic Psychological distance appears to serve both organizing and explanatory functions across seemingly diverse sets of theoretical and research questions such as differentiation of self in personality development conceptual representation in cognitive development dialogue in the development of communication skills information processing in cognitive science regulatory mechanisms in the growth of control processes and concept formation in cross over areas of cognition learning and thinking skills This volume is based on papers presented as part of the Invitational Conference honoring Irving E Sigel Distinguished Research Scientist at Educational Testing Service In each of the chapters different models are utilized to account for the construct of psychological distance and as such to suggest extensions of Sigel's seminal work in this area Together these contributions form the basis of a discussion of psychological distance as a developmental construct a construct which permits serious consideration of individual differences as a function of both the process and the product of cognition and ecology **Medical and Health Care Books and Serials in Print** ,1997 *Studies in Decision Making* Martin Irle, Lawrence B. Wren,1991 In this book Thomas Wren uncovers and assesses the largely hidden philosophical assumptions about human motivation that have shaped contemporary psychological theories about morality Why do people care about being moral What motivates us to interpret our lives in

moral terms In this book Thomas Wren uncovers and assesses the largely hidden philosophical assumptions about human motivation that have shaped contemporary psychological theories about morality The traditional view is that truly moral men and women want to do what is right and good for its own sake However this internalist perspective has been eclipsed in recent psychologies of morality in favor of the view that people act morally for the same extrinsic rewards and punishments that supposedly motivate every other sort of human action Wren argues that it is possible to develop a social and behavioral science compatible with and even based on the conviction that morality is intrinsically motivated Beginning with behaviorism and social learning theory and moving on to the more cognitive approaches of psychoanalytic and cognitive developmental theories of moral experience Wren shows that these theories embody tacit but distinctive metaethical perspectives concerning the nature of moral judgment and what he calls moral care the tendency to think of reality in moral categories Wren points out that this tendency is conceptually distinct from a specific moral motive such as benevolence or loyalty He notes the difference between these two sorts of motivational tendencies in each of the psychological theories discussed and derives results that are themselves subjected to the test of whether they can be subscribed to in good faith by men and women who are not only theorists but also moral agents Wren s analysis of Piaget s theory is especially valuable and leads to a discussion of Kohlberg s later psychological work a discussion that will open new areas of inquiry to philosophers
