range of topics encompassed by tumor immunology and immunotherapy The papers presented in this volume were invited from experts in diverse areas of tumor immunology and closely related subjects There was an attempt to proceed logically from a consideration of the antigenicity of tumors and the use of monoclonal antibodies to examine specific antigens to a review of regulatory and effector mechanisms Immunological approaches to therapy were then considered systematically both for classical modes of immunotherapy and for the newly expanded categories of biological response modifiers or biomodulators Also included were papers on vaccination against cancer and on the analogy between the strategies for chemotherapy and immunotherapy
