Goldberg, 2013-06-17 Postmodern Self Psychology the last volume of the Progress in Self Psychology series under the editorship of Arnold Goldberg charts the path of self psychology into the postmodern era of psychoanalysis It begins with Goldberg s thoughtful consideration of the several tributaries of self psychological thought in the decades after Kohut and continues with Mark Gehrie s elaboration of reflective realism as a self psychological way out of epistemological quagmires about the essential reality of the analytic endeavor Clinical contributions offer contemporary perspectives on clinical themes that engaged Kohut in the 1970s a study of the effect of moments of meeting on systems of pathological accommodation a reappraisal of empathy as a bi directional negation and an assessment of the diverse clinical phenomena that justify a prolonged understanding only phase of treatment The theory section of Volume 18 comparably charts the movement of self psychology toward a postmodern sensibility Contributors reappraise intersubjectivity theory as a contextualist treatment approach consistent with dynamic systems theory return to Kohut s concept of selfobject relationships with special attention to the separate subjective and intersubjective components of selfobject experiences and develop one of Kohut s early ideas into a theory of forward edge transferences that strengthen normal self development In all Volume 18 is a richly insightful progress report on the current status of self psychology and a fitting capstone to Arnold Goldberg s distinguished tenure as editor of the Progress in Self Psychology series **Progress in Self Psychology, V. 7** Arnold I. Goldberg, 2013-05-13 A special section of papers on the evolution current status and future development of self

Goldberg,2013-05-13 Volume 13 provides valuable examples of the very type of clinically grounded theorizing that represents progress in self psychology The opening section of clinical papers encompasses compensatory structures facilitating responsiveness repressed memories mature selfobject experience shame in the analyst and the resolution of intersubjective impasses Two self psychologically informed approaches to supervision are followed by a section of contemporary explorations of sexuality Contributions to therapy address transference and countertransference issues in drama therapy an intersubjective approach to conjoint family therapy and the subjective worlds of profound abuse survivors A concluding section of studies in applied self psychology round out this broad and illuminating survey of the field

Progress in Self Psychology, V. 9 Arnold I. Goldberg,2013-05-13 The Widening Scope of Self Psychology is a watershed in the self psychological literature being a contemporary reprise on several major clinical themes through which self psychology from its inception has articulated its challenge to traditional psychoanalytic thinking The volume opens with original papers on interpretation by eminent theorists in the self psychological tradition followed by a series of case studies and clinically grounded commentaries bearing on issues of sex and gender as they enter into analysis Two thoughtful reexaminations of the meaning and treatment challenges of chronic rage are followed by clinical papers that focus respectively on mourning alter ego transferences resistance to change and pathological identification Applied analytic contributions and a review of Goldberg s The Prisonhouse of Psychoanalysis round out a collection that testifies not only to the widening scope of self psychology but to its deepening insights as well **New Developments in Self Psychology Practice** Peter Buirski,Amanda Kottler,2007-10-23 It has been 35 years since the publication of Heinz Kohut s monumental book The Analysis of the Self in 1971 and in this period self psychology has undergone a vibrant and exciting evolution that has significantly influenced and expanded the range of psychoanalytic thinking While undergoing this change self psychology has kept the developmental importance of self object relatedness and the primacy of subjective experience as central tenets of the theory But where other theories of mind can tend to stagnate and resist innovations that transcend their founding figure Kohut s self psychology continues to grow in depth complexity and richness Indeed one of the great strengths of the self psychology movement has been the openness of the succeeding generations to push the theoretical envelope to entertain examine and integrate new understandings and perspectives New Developments in Self Psychology Practice gives voice to many of these developments reflected in its four sections The first section examines complexity theory attachment theory and

the work of the Boston Change Study Group The second section is concerned with the treatment of children while the third section examines various treatment modalities such as family therapy group therapy and supervisory process The final section looks at diversity difference and otherness within both the therapeutic dyad and therapeutic community and considers how shame enactments and traumatic experiences influence the therapeutic process

Progress in Self Psychology, V. 16 Arnold I. Goldberg, 2013-06-17 Volume 16 of Progress in Self Psychology How Responsive Should We Be illuminates the continuing tension between Kohut's emphasis on the patient's subjective experience and the post-Kohutian intersubjectivists' concern with the therapist's own subjectivity by focusing on issues of therapeutic posture and degree of therapist activity Teicholz provides an integrative context for examining this tension by discussing affect as the common denominator underlying the analyst's empathy subjectivity and authenticity Responses to the tension encompass the stance of intersubjective contextualism advocacy of active responsiveness and emphasis on the thoroughgoing bidirectionality of the analytic endeavor Balancing these perspectives are a reprise on Kohut's concept of prolonged empathic immersion and a recasting of the issue of closeness and distance in the analytic relationship in terms of analysis of the tie to the negative selfobject Additional clinical contributions examine severe bulimia and suicidal rage as attempts at self-state regulation and address the self-reparative functions that inhere in the act of dreaming Like previous volumes in the series volume 16 demonstrates the applicability of self psychology to nonanalytic treatment modalities and clinical populations Here self psychology is brought to bear on psychotherapy with placed children on work with adults with nonverbal learning disabilities and on brief therapy Rector's examination of twinship and religious experience Hagman's elucidation of the creative process and Siegel and Topel's experiment with supervision via the internet exemplify the ever-expanding explanatory range of self psychological insights

Progress in Self Psychology Arnold Goldberg, 2007-07-01 *Progress in Self Psychology, V. 19*

Mark J. Gehrie, 2013-05-13 The contributors to Explorations in Self Psychology volume 19 of the Progress in Self Psychology series wrestle with two interrelated questions at the nexus of contemporary discussions of technique How authentic and relationally invested should the self psychologically informed analyst be and what role should self-disclosure play in the treatment process The responses to these questions embrace the full range of clinical possibilities Dudley and Walker argue that empathically based interpretation precludes self-disclosure whereas Miller argues in favor of authentic self-expression and against the self-psychologist's frustrating attempt to decenter from frustration or anger Consideration of the utility of a consistently empathic stance continues with Weisel Barth's clinical presentation and the discussions that it elicits about management of her patient's primary destructiveness Lenoff's critical rereading of Kohut's Examination of the Relationship Between Mode of Observation and Theory and Rieveschl's self-psychological work with adolescents and Neville Symington's theory of narcissism Contributions to applied analysis explore topics as diverse as an exchange of dreams between John Adams and Benjamin Rush Mann's Death in Venice the films of Ingmar Bergman psychotherapy of the elderly and disabilities

in the sensory motor integration in children And Volume 19 concludes with Constance Goldberg's candid and enlightening reminiscence of Heinz Kohut a very complex man with whom to be in a relationship **Progress in Self Psychology, V. 15**

Arnold I. Goldberg, 2013-06-17 Volume 15 of Progress in Self Psychology conveys the rich pluralism of contemporary self psychology with respect to a central theoretical and clinical issue the nature of the self and the manner in which it can best be studied This topic is initially addressed through a series of papers reassessing selfobject transferences and the selfobject function of interpretation It is then approached via the theory of psychoanalytic technique with papers that focus on boundaries and intimacy and on Surface Depth and the Isolated Mind And it culminates in two case studies that elicit animated discussion delineating different perspectives intersubjective motivational systems and self selfobject on the self in relation to the therapeutic process Two studies comparing Melanie Klein and Heinz Kohut a discussion of how current cultural attitudes affect parenting a relational view of the therapeutic partnership and an integration of Silvan Tomkins's affect theory with self psychology add breadth to this timely and provocative collection Volume 15 includes additional letters from the Kohut Archives and a moving account of Kohut's struggle with his own impending death **Progress in Self Psychology, V. 1**

contextualist treatment approach consistent with dynamic systems theory return to Kohut's concept of selfobject relationships with special attention to the separate subjective and intersubjective components of selfobject experiences and develop one of Kohut's early ideas into a theory of forward edge transferences that strengthen normal self development In all Volume 18 is a richly insightful progress report on the current status of self psychology and a fitting capstone to Arnold Goldberg's distinguished tenure as editor of the Progress in Self Psychology series *Progress in Self Psychology, V. 12* Arnold I.
