Managing Innovative Projects and Programs H. James Harrington, Sid Ahmed Benraouane, 2022-07-15 It has been estimated that over 75% of the innovative projects that begin through the Innovation Management System IMS are either failures or they failed to produce the desired results The biggest wastes most medium to large size organizations face are the waste of money time reputation opportunity and income that these failures are costing them Following this book s recommendations could reduce this failure cost by as much as 70% The purpose of this book is to provide a step by step procedure on how to process a medium or large size project program or product using an already established IMS that considers the guidance given in ISO 56002 2019 Innovation Management Systems Standard Often the most complicated complex difficult and challenging system used in an organization is the IMS At the same time it usually is the most important system because it is the one that generates most of the value adding products for the organization and it involves most of the key functions within the organization The opportunity for failure in time and the impact on the organization is critical and often means the difference between success and bankruptcy Throughout this book the authors detail the high impact inputs and activities that are required to process individual projects programs products through the innovation cycle Although this book was prepared to address how medium to large projects programs and products proceed through the cycle it also provides the framework that can be used for small organizations and simple innovation activities Basically the major difference between large and small impact innovation projects is that the small projects can accept more risks require less formal documentation use simpler communication systems and require fewer resources It s important to remember that the authors are addressing an existing IMS rather than trying to create an entirely new one Currently this is the only book geared for professionals responsible for managing innovative projects and programs using ISO 56002 2019 Innovation Management Innovation Management System Guidance to provide a comprehensive management strategy and step by step plan and ISO 56004 Innovation Management Assessment Guidance It provides a comprehensive analysis of what is required from the time an opportunity is recognized to the time the customer is using the innovative product The book also introduces a new Process modeling cloud service that allows you to drill down 5 levels from the system level to the job description level and includes free access to many of the book s best practice Process models

Remote Projects Bianca Harrington, AI, 2025-02-21 Remote Projects offers a vital guide for navigating the complexities of managing virtual teams a necessity in today's evolving business landscape The book addresses key challenges such as building team cohesion among distributed teams and mastering communication strategies tailored for virtual interactions It emphasizes that without a strong team foundation clear communication and adaptive processes remote projects risk delays and miscommunication Notably the book highlights how adapting proven management principles to virtual environments is crucial moving beyond simply replicating in office practices online The book takes a proactive approach beginning with establishing the foundations of effective remote team management It delves into communication strategies providing guidelines for using digital tools to foster transparency and manage conflict Then the central chapters focus on adapting agile methodologies for remote teams offering advice on sprint planning and daily stand ups in a virtual setting By integrating insights from organizational psychology communication studies and information technology Remote Projects provides a holistic perspective on the challenges of remote project management The book emphasizes practical evidence based strategies rather than abstract theories and offers tools that project managers can immediately use It draws from academic research industry best practices and case studies This approach makes complex concepts accessible and ensures readers can easily apply the book's principles to their own projects fostering high performing teams and successful project outcomes

Applied Software Project Management Andrew Stellman, Jennifer Greene, 2005-11-18 If you're looking for solid easy to follow advice on estimation requirements gathering managing change and more you can stop now this is the book for you Scott Berkun Author of The Art of Project Management What makes software projects succeed It takes more than a good idea and a team of talented programmers A project manager needs to know how to guide the team through the entire software project There are common pitfalls that plague all software projects and rookie mistakes that are made repeatedly sometimes by the same people Avoiding these pitfalls is not hard but it is not necessarily intuitive Luckily there are tried and true techniques that can help any project manager In *Applied Software Project Management* Andrew Stellman and Jennifer Greene provide you with tools techniques and practices that you can use on your own projects right away This book supplies you with the information you need to diagnose your team's situation and presents practical advice to help you achieve your goal of building better software Topics include Planning a software project Helping a team estimate its workload Building a schedule Gathering software requirements and creating use cases Improving programming with refactoring unit testing and version control Managing an outsourced project Testing software Jennifer Greene and Andrew Stellman have been building software together since 1998 Andrew comes from a programming background and has managed teams of requirements analysts designers and developers Jennifer has a testing background and has managed teams of architects developers and testers She has led multiple large scale outsourced projects Between the two of them they have managed every aspect of software development They have worked in a wide range of industries including finance telecommunications media nonprofit
