**Earning and Learning** Susan E. Mayer, Paul E. Peterson, 2010-12-01 A Brookings Institution Press and Russell Sage Foundation publication Education is one of the largest sectors of the U S economy yet scholars educators policymakers and parents do not agree about what the money spent on education really buys In particular they do not agree on how much education improves children s ability to learn or whether the things children learn in school truly improve their chances for success as adults If schooling increases how much students know and what they know does pay off later then it is important to ask what schools can do to increase students learning and earning The essays in this book report estimates of the effects of learning on earnings and other life outcomes They also examine whether particular aspects of schooling such as the age at which children begin school classroom size and curriculum or structural reform such as national or statewide examinations or school choice affect learning Taken together their findings suggest that liberals are correct in saying that more investment is needed in early education that class sizes should be further reduced and that challenging national or state standards should be established But they also provide support for conservatives who ask for a more demanding curriculum and greater school choice Contributors include John Bishop Eric Hanushek James Heckman Christopher Jencks Caroline Minter Hoxby Fred Mosteller and Christopher Winship

*Innovations in Adolescent Substance Abuse Interventions* Eric Wagner, Holly Waldron, 2001-09-14 *Innovations in Adolescent Substance Abuse Interventions* focuses on developmentally appropriate approaches to the assessment prevention or treatment of substance use problems among adolescents Organized into 16 chapters this book begins with an assessment of adolescent substance use theory methods and effectiveness of a drug abuse prevention approach and problem behavior prevention programming for schools and community groups Some chapters follow on the community family and school based interventions for adolescents with substance use problems Other chapters explain psychopharmacological therapy the assertive aftercare protocol for adolescent substance abusers and twelve step based interventions for adolescents

[Resources in Education](#), 1994      **Criminal Markets and Mafia Proceeds** Ernesto Savona, Francesco Calderoni, 2016-03-22 This book estimates the proceeds of crime and mafia revenues for different criminal markets such as sexual exploitation drugs illicit cigarettes loan sharking extortion racketeering counterfeiting illicit firearms illegal gambling and illicit waste management It is the first time that scholars have adopted detailed methodologies to ensure

the highest reliability and validity of the estimation Overall estimated proceeds of crime amount to 22.8 billion 1.5% of the Italian GDP Of this up to 10.7 billion 0.7% of the GDP may be attributable to the Italian mafias These figures are considerably lower than the ones most frequently circulated on the news without any details about their methodology which were defined by a UN study as gross overestimates Far from underestimating criminal revenues the results of this study bring the issue of the proceeds of crime to an empirically based debate providing support for improved future estimates and more effective policies The volume's contributions were inspired by a project awarded by the Italian Ministry of Interior to Transcrime which produced the first report on mafia investments [www.investimentioc.it](http://www.investimentioc.it) This book was originally published as a special issue of *Global Crime*      **Nuclear Science Abstracts**, 1966      **The Imagineers of War** Sharon Weinberger, 2017-03-14

The definitive history of the Defense Advanced Research Projects Agency the Pentagon agency that has quietly shaped war and technology for nearly sixty years Founded in 1958 in response to the launch of Sputnik the agency's original mission was to create the unimagined weapons of the future Over the decades DARPA has been responsible for countless inventions and technologies that extend well beyond military technology Sharon Weinberger gives us a riveting account of DARPA's successes and failures its remarkable innovations and its wild-eyed schemes We see how the threat of nuclear Armageddon sparked investment in computer networking leading to the Internet as well as to a proposal to power a missile destroying particle beam by draining the Great Lakes We learn how DARPA was responsible during the Vietnam War for both Agent Orange and the development of the world's first armed drones and how after 9/11 the agency sparked a national controversy over surveillance with its data mining research And we see how DARPA's success with self-driving cars was followed by disappointing contributions to the Afghanistan and Iraq wars Weinberger has interviewed more than one hundred former Pentagon officials and scientists involved in DARPA's projects many of whom have never spoken publicly about their work with the agency and pored over countless declassified records from archives around the country documents obtained under the Freedom of Information Act and exclusive materials provided by sources *The Imagineers of War* is a compelling and groundbreaking history in which science technology and politics collide      *Improving Student Achievement* United States Congress. House. Committee on Education and the Workforce. Subcommittee on Postsecondary Education, Training, and Life-long Learning, 1999      [Class Size Reduction](#) Gary James Harfitt, 2015-07-21 This book provides a timely examination of the effects of class size reduction (CSR) on teaching and learning processes It represents a departure in that the research covered focuses solely on the relationship between CSR and effective teaching in real secondary school classrooms The book also presents a much needed and powerful student voice on the impact of class size reduction on teaching and learning processes It conceptualises the effects of class size on teaching and learning processes in secondary school classrooms which are another under researched perspective in this field Drawing on multiple case studies concerning teaching and learning processes in large and small Hong Kong secondary school classes it highlights the qualitative differences in teaching and

learning processes On the basis of those studies the book argues for a more purposeful dynamic approach to education for teachers working in small or reduced size classes

**A Post-Racial Change Is Gonna Come** J. Wharton, 2013-11-12 This work offers a political and historical analysis of Newark's modern politics since 1950 culminating with Mayor Cory Booker's rise to power and prominence both in the city and in American political consciousness Newark's

recent political history offers an interesting case study in mayoral elections community development and coalition building politics While Newark is the quintessential post industrial city Booker has received critical attention for his post racial politics since he frequently bypasses racial and traditional urban politics At the same time relations between the mayor the municipal council and Newark s diverse communities were often so fractious that sustainable coalition building proved to be an elusive goal to resolve longstanding crime education and other social problems Based on original interviews with Cory Booker city council members and other prominent Newark politicians A Post Racial Change is Gonna Come is a powerful history of how Newark became the focal point for transformative politics in urban America

### **Drug Abuse Prevention**

Karol L. Kumpeer, Gladys B. Baxley, 1998-11 Provides an overview of the theory and research on which community based substance abuse prevention programs are based Intended for use by prevention practitioners who vary in training and experience in the field but who are interested in developing prevention programs in their communities Includes a definition of prevention descriptions of substance abuse risk and protective factors and a discussion of the key features of three prevention strategies universal selective and indicated that have proven effective Also explains how prevention efforts can be strengthened by using knowledge gained through research

### **Understanding the U.S. Illicit**

**Tobacco Market** National Research Council, Committee on the Illicit Tobacco Market: Collection and Analysis of the International Experience, 2015-04-30 Tobacco use has declined because of measures such as high taxes on tobacco products and bans on advertising but worldwide there are still more than one billion people who regularly use tobacco including many who purchase products illicitly By contrast to many other commodities taxes comprise a substantial portion of the retail price of cigarettes in the United States and most other nations Large tax differentials between jurisdictions increase incentives for participation in existing illicit tobacco markets In the United States the illicit tobacco market consists mostly of bootlegging from low tax states to high tax states and is less affected by large scale smuggling or illegal production as in other countries In the future nonprice regulation of cigarettes such as product design formulation and packaging could in principle contribute to the development of new types of illicit tobacco markets Understanding the U S Illicit Tobacco Market reviews the nature of illicit tobacco markets evidence for policy effects and variations among different countries with a focus on implications for the United States This report estimates the portion of the total U S tobacco market represented by illicit sales has grown in recent years and is now between 8.5 percent and 21 percent This represents between 1.24 to 2.91 billion packs of cigarettes annually and between 2.95 billion and 6.92 billion in lost gross state and local tax revenues Understanding the U S Illicit Tobacco Market describes the complex system associated with illicit tobacco use by exploring some of the key features of that market the cigarette supply chain illicit procurement schemes the major actors in the illicit

trade and the characteristics of users of illicit tobacco This report draws on domestic and international experiences with the illicit tobacco trade to identify a range of possible policy and enforcement interventions by the U S federal government and or states and localities

**Drug Abuse: Prevention and Treatment** Mangai Natarajan,2017-05-15 Ever since the Shanghai convention in 1909 the threat posed to human well being by drug abuse has led countries around the world to take action to deal with their drug problems There are wide variations in the policies pursued but most countries try to reduce both the supply of and the demand for drugs Unfortunately there is little research consensus on the respective merits of these two approaches or about the best ways to pursue them Consequently control and prevention policies are mostly driven by political considerations economic realities and cultural expectations though research has played an important part in formulating and evaluating treatments for drug addiction This volume reviews studies on drug abuse prevention and treatment strategies under five main areas 1 Reducing supply strategies to control the flow of drugs from production to retail distribution 2 Reducing demand prevention of drug use at all stages of involvement and consumption levels 3 Reducing harm promoting situational risk reduction practices for regular users addicts and recreational users 4 Reducing addiction drug treatment options for various groups in various settings and 5 Drug policies and prescriptions focused on debates about prohibition and legalization

Data Analysis for Social Science Elena Llaudet,Kosuke Imai,2023 Data analysis has become a necessary skill across the social sciences and recent advancements in computing power have made knowledge of programming an essential component Yet most data science books are intimidating and overwhelming to a non specialist audience including most undergraduates This book will be a shorter more focused and accessible version of Kosuke Imai s Quantitative Social Science book which was published by Princeton in 2018 and has been adopted widely in graduate level courses of the same title This book uses the same innovative approach as Quantitative Social Science using real data and R to answer a wide range of social science questions It assumes no prior knowledge of statistics or coding It starts with straightforward simple data analysis and culminates with multivariate linear regression models focusing more on the intuition of how the math works rather than the math itself The book makes extensive use of data visualizations diagrams pictures cartoons etc to help students understand and recall complex concepts provides an easy to follow step by step template of how to conduct data analysis from beginning to end and will be accompanied by supplemental materials in the appendix and online for both students and instructors

**Children as Pawns** Timothy A. HACS, Timothy A Hacs,2009-06-30 Head Start Bilingual education Small class size Social promotion School funding Virtually every school system in America has had to face these issues over the past thirty years Advocates and dissenters have declared confidently that the research is on their side But is it In the first book to bring together the recent history of educational policy and politics with the research evidence Timothy Hacs presents the illuminating often forgotten stories of these five controversial topics He sifts through the complicated evaluation research literature and compares the policies that have been adopted to

the best evidence about what actually works He lucidly explains what the major studies show what they don't and how they have been misunderstood and misrepresented Hacsí shows how rarely educational policies are based on solid research evidence and how programs that sound plausible simply do not satisfy the complex needs of real children
