Project Day Lily:

Project Day Lily Garth L. Nicolson Ph.D., Nancy L. N, 2005-09-01 The Project Day Lily story chronicles the events surrounding what the public knows as Gulf War Syndrome To this day the public perception of that tragedy is very limited but now there are over 150 000 veterans of that conflict that suffer from chronic illnesses and tens of thousands have died without acknowledgment or proper assistance to keep secret the origin of their illnesses Project Day Lily tells the story of the discovery that men and women of our Armed Forces were actually exposed to chemical and biological mixtures from missiles and sprayers during the Gulf War that were supplied in part by a sinister network using a group of rogue bureaucrats intelligence operatives and scientists They were also exposed to contaminants in the multiple vaccines given during deployment Project Day Lily presents the story of how one of these biological agents was found by two American scientists in veterans of the Gulf War and in civilians as part of a massive testing program and how various academic and governmental employees did everything in their power to prevent this information from being released to the American public **Micro**

Abdalla,2017-02-20 With the World Health Organization WHO the North Atlantic Treaty Organization NATO and the U S Blue Ribbon panel publishing reports on the emerging risks of biological weaponry in past months there is a new sense of urgency regarding biological weapons In August 2016 the United Nations Secretary General Ban Ki Moon told the Security Council that non state actors are actively seeking chemical biological and nuclear weapons This report presents the changing dynamics of the development and use of biological weapons and the preparation against them The dynamics relate to technological advances in biotechnology and the concomitant attraction to non state actors to use biological agents as weapons due to their financial appeal and diverse impact The relative ease with which biological weapons can be produced and the intent of non state actors to use biological weapons based on historical precedent and recent surge in international terrorism call for a renewed focus on this field and an increased effort to respond to these developments We provide illustrations of new policy initiatives in a variety of countries and outline the current state of play in the Netherlands providing a point of departure to discuss whether the current approach is sufficient to tackle the upcoming issues
