Proliferation Security Initiative:

The Proliferation Security Initiative as a New Paradigm for Peace and Security Mark R. Shulman, 2006 The author examines the Proliferation Security Initiative a multinational activity launched in 2003 to enable the United States and like minded countries to interdict the flow of weapons of mass destruction WMD This Initiative also may bring dramatic changes the international security system by enabling concerned states to interdict international trade in WMD regardless of the location or nationality of their owners As such the Proliferation Security Initiative not only addresses one of the most urgent threats to peace and security that the world has ever witnessed but it does so in an innovative way that has the potential to change the basic paradigm of peace and security by legitimizing the proportional and discriminating use of force to prevent a great harm The author argues that the Initiative can be most successful by building broad support through increased transparency and a greater willingness to address forth rightly the legal challenges that it faces **Adelphi Papers** ,2005 Enhancement by Enlargement Charles Wolf (Jr.), Brian G. Chow, Gregory S. Jones, 2008 The purpose of the Proliferation Security Initiative PSI is to prevent or at least inhibit the spread of weapons of mass destruction their delivery systems and related materials to or from states or non state actors whose possession of such items would be a serious threat to global or regional security So far 91 countries have officially affiliated with PSI and participate in its activities However five key nations whose addition would enhance PSI s effectiveness have so far been reluctant to do so The authors look at the situation from the perspectives of these five hold out nations Indonesia Malaysia India Pakistan and China to assess the disadvantages costs and advantages benefits that when weighed against each other have induced them to refrain from PSI affiliation They then set out ways in which each country s costs and benefits balance might be altered to enhance the prospects of its deciding to affiliate with PSI in the near future They also describe ideas that might be developed and steps that might be taken to enhance PSI s inclusiveness and effectiveness in the future provided by publisher **Proliferation Security Initiative (PSI)**. Library of Congress. Congressional Research Service, 2006 Describes objectives methods targets and legal authorities of the Proliferation Security Initiative an initiative for international cooperation in efforts to interdict shipments of weapons of mass destruction related materials Considers issues for Congress Proliferation Security Initiative (PSI). Mary Beth Dunham Nikitin, 2010 In May 2003 President George W Bush formed the Proliferation Security Initiative PSI to increase international cooperation in interdicting shipments of weapons of mass destruction WMD their delivery systems and related materials This report provides background information on the initiative as well as a general overview and proposed changes and expansions to the initiative *Proliferation Security Initiative (PSI)*. , 2008 U S policy sought to enhance the capabilities of our military intelligence technical and law enforcement communities to prevent the movement of WMD materials technology and expertise to hostile states and terrorist organizations 4 PSI was started partially in response to legal gaps revealed in an incomplete interdiction of the So San a North Korean flagged ship that was carrying

Scud mis This language may have been in part a result of early resistance to the idea of PSI in the international community in particular hesitancy over sovereignty and free passage issues as well as U S policymakers intention to keep the arrangement informal and non binding Many consider the lack of formal mechanisms an advantage and point instead to high level meetings the agreement on a set of principles and cooperative exercises to test interdiction procedures as evidence of PSI s usefulness 9 Others however question the seriousness of the effort as well as its sustainability as long as no formal mechanisms are created 10 The current configuration does not le On the high seas ships have the rights of freedom of the seas and innocent passage under the Law of the Sea Convention and customary international law The 2005 Protocol to the Convention for the Suppression of Unlawful Acts Against the Safety of Maritime Navigation SUA would require states to criminalize transportation of WMD materials and their delivery vehicles

Chow,Gregory S. Jones,2009 This training manual which consists of nine lecture and seminar sessions that can be used together or alone in full or in part is intended for use by the U S Geographic Combat Commands in training personnel assigned to them for participation in PSI activities Its purpose is to help the Commands deal with normal issues arising from staff turnover and with any insufficiencies in the Commands institutional memory *Proliferation Security Initiative (PSI)* Mary Beth Nikitin,2008 This report looks at the background and current status of the Proliferation Security Initiative PSI which was formed to increase international cooperation in interdicting shipments of weapons of mass destruction WMD The Proliferation Security Initiative Aaron Dunne,2013 The Proliferation Security Initiative PSI was conceived in 2003 as a response to a growing threat of the proliferation of weapons of mass destruction As it marks its 10th anniversary the initiative faces a continually evolving set of challenges in its efforts to target the transport of consignments of proliferation concern despite the participation of over 100 states a number of key states remain opposed and questions about its legality activities and effectiveness persist This Policy Paper summarizes and clarifies the commitments that a state enters into when it endorses the PSI Statement of Interdiction Principles examines the legal bases that underpin the initiative

identifies some of the key challenges that it faces and explores the operational realities of undertaking PSI activities By doing so it will help inform the decision making of states considering participation in the PSI but it will also be of interest to a wider audience and contribute to a better understanding of the PSI more generally

The Proliferation Security Initiative: What Comes Next ,2005 This Air University research paper is an examination of the Proliferation Security Initiative Through extensive research and review of academic journals governmental sources and press reporting combined with interviews of relevant personnel in the Departments of Defense and State the Proliferation Security Initiative is chronicled from its inception in early 2002 through the latest multinational exercises Special attention is given to the guidelines governing participation in PSI and the key issues legal authorities and intelligence sharing relevant to PSI operations PSI s real world success in the interdiction of BBC China and the subsequent decision by Libya to surrender its WMD program is covered as well Most importantly for an Air Force audience the progression of PSI to the arena of air interdiction is described along with a brief description of how an air interdiction might play out and what complications it might bring Finally PSI is recognized as a small part in the overall US effort to counter WMD but an important part in rebuilding bilateral and multinational relationships

The Proliferation Security Initiative ,2004 The Proliferation Security Initiative PSI is a global initiative aimed at stopping shipments of weapons of mass destruction WMD their delivery systems and related materials worldwide announced by President Bush May 31 2003 It stems from the National Strategy to Combat Weapons of Mass Destruction issued in December 2002 That Strategy recognizes the need for more robust tools to defeat the proliferation of WMD around the world and specifically identifies interdiction as an area where greater focus will be placed The goal of PSI is to create a more dynamic creative and proactive approach to preventing proliferation to or from nation states and non state actors of proliferation concern

Christoff,2009-06 The Proliferation Security Initiative PSI was announced in 2003 to enhance U S efforts to prevent the spread of weapons of mass destruction In 2006 it was recommended that agencies establish clear PSI policies and procedures and performance indicators In 2007 Congress enacted a law calling for the admin to expand and strengthen PSI This report assesses 1 the extent to which the admin issued a PSI directive and submitted required PSI related reports 2 steps U S agencies have taken to establish clear PSI policies and procedures structures budgets and performance indicators and 3 U S agencies efforts to increase cooperation and coordination with PSI countries and develop a strategy to resolve interdiction issues Ill **Nonproliferation** United States. Government Accountability Office,2008 Nonproliferation Government Accountability Office,2017-09-14 Nonproliferation U S agencies have taken some steps but more effort is needed to strengthen and expand the proliferation security initiative report to congressional committees Proliferation Security Initiative (PSI) New Zealand. Ministry of Foreign Affairs and Trade,2007 **Future Directions of the Proliferation Security Initiative** Ian Jeffrey Williams,2014 The Proliferation Security Initiative PSI has shown to be an effective means of engaging a large number of countries in activities that increase their capacity to interdict consignments of WMD related materials while in transit Nevertheless the breadth and tempo of those activities have varied significantly during the first 10 years of PSI s existence This has likely been due to budget constraints the types of exercises conducted and a certain level of initiative fatigue Other factors include PSI s reliance on voluntary actions taken by countries and the lack of PSI dedicated budgets during a time of greater fiscal austerity PSI has also had a mixed record of success in expanding legal frameworks to support interdictions Great strides have been made in developing an international legal basis to interdict shipments of concern moving to and from North Korea and Iran However international conventions that criminalize all chemical biological radiological and nuclear weapons related trafficking within national territories have attracted few adherents PSI has achieved wide support in many crucial regions but China remains uncommitted Given the size of its merchant fleet and port activity initiative outreach to China should remain a top priority
