Global Identity in Multicultural and International Educational Contexts Nigel Bagnall, 2015-03-27 The increased movement of people globally has changed the face of national and international schooling Higher levels of mobility have resulted from both the willing movement of students and their families with a desire to create a better life and the forced movement of refugee families travelling away from war famine and other extreme circumstances This book explores the idea that the complex connections created by the forces of globalisation have led to a diminishing difference between what were once described as international schools and national schools By examining a selection of responses from students attending international schools in Brazil the United Kingdom France Germany the Philippines and Switzerland the book discusses key issues surrounding identity and cosmopolitan senses of belonging Chapters draw from current literature and recent qualitative research to highlight the concerns that students face within the international school community including social psychological and academic difficulties The interviews provide a rich and unique body of knowledge demonstrating how perceptions of identity and belonging are changing especially with affiliation to a national or a global identity The notion that international students have become global citizens through their affiliation to a global rather than a national identity exhibits a changing and potentially irreversible trend Global Identity in Multicultural and International Educational Contexts will be of key interest to researchers academics and policy makers involved with international schooling and globalised education Routledge Handbook of Youth and Young

J. Pascoe,2025-02-25 This provocative story of contemporary high school argues that a shallow culture of kindness can do more lasting harm than good Based on two years of research Nice Is Not Enough shares striking dispatches from one high school s regime of kindness to underline how the culture operates as a Band Aid on persistent inequalities Through incisive storytelling and thoughtful engagement with students this brilliant study by C J Pascoe exposes uncomfortable truths about American politics and our reliance on individual solutions instead of profound systemic change Nice Is Not Enough brings readers into American High a middle and working class high school characterized by acceptance connection and kindness a place where a prominent sign states there is no room for hate Here inequality is narrowly understood as a problem of individual merit meanness effort or emotion rather than a structural issue requiring deeper intervention Surface level sensitivity allows American High to avoid political topics related to social inequality based on race sex gender or class Being nice to each other Pascoe reveals does not serve these students or solve the broader issues we face however a true politics of care just might **Our Schools Suck** Jeanne Theoharis,Gaston Alonso,Noel S. Anderson,Celina Su,2009-05-01 Shares the voices of students speaking out against the failures of urban education Our schools suck This is how many young people of color call attention to the kind of public education they are receiving In cities across the nation many students are trapped in under funded mismanaged and unsafe schools Yet a number of scholars and of public figures have shifted attention away from the persistence of school segregation to lambaste the values of young people themselves Our Schools Suck forcefully challenges this assertion by giving voice to the compelling stories of African American and Latino students who attend under resourced inner city schools where guidance counselors and AP classes are limited and security guards and metal detectors are plentiful and grow disheartened by a public conversation that continually casts them as the problem with urban schools By showing that young people are

deeply committed to education but often critical of the kind of education they are receiving this book highlights the dishonesty of public claims that they do not value education Ultimately these powerful student voices remind us of the ways we have shirked our public responsibility to create excellent schools True school reform requires no less than a new civil rights movement where adults join with young people to ensure an equal education for each and every student Ethics and Education Research Rachel Brooks, Kitty te Riele, Meg Maguire, 2014-09-15 Part of the popular BERA SAGE Research Methods in Education series this is the first book to specifically focus on the ethics of Education research Drawn from the authors experiences in the UK Australia and mainland Europe and with contributions from across the globe this clear and accessible book includes a wide range of examples The authors show how to identify ethical issues which may arise with any research project gain informed consent provide information in the right way to participants present and disseminate findings in line with ethical guidelines All researchers irrespective of whether they are postgraduate students practising teachers or seasoned academics will find this book extremely valuable for its rigorous and critical discussion of theory and its strong practical focus Rachel Brooks is Professor of Sociology and Head of the Sociology Department at the University of Surrey UK Kitty te Riele is Principal Research Fellow in the Victoria Institute for Education Diversity and Lifelong Learning at Victoria University in Australia Meg Maguire is Professor of Sociology of Education at King s College London
