Promise and Betrayal John I. Gilderbloom, R. L. Mullins Jr., 2012-02-01 Traditionally institutions of higher education have been viewed as the gateway to a better future despite the fact that so many of the neighborhoods surrounding them have been filled with hopelessness and despair In *Promise and Betrayal* the authors want nothing less than to start a revolution in higher education calling on partnerships between town and gown to create sustainable urban neighborhoods John I Gilderbloom and R L Mullins Jr detail how higher education institutions can play an important role in helping to revitalize our poor neighborhoods by forming partnerships with public private and nonprofit groups They advocate leaving the ivory tower and supplying the community with expert knowledge as well as creative and technical resources

Universities and Their Cities Steven J. Diner, 2017-05-15 The first broad survey of the history of urban higher education in America Today a majority of American college students attend school in cities But throughout the nineteenth and much of the twentieth centuries urban colleges and universities faced deep hostility from writers intellectuals government officials and educators who were concerned about the impact of cities immigrants and

commuter students on college education In *Universities and Their Cities* Steven J Diner explores the roots of American colleges traditional rural bias Why were so many people including professors uncomfortable with nonresident students How were the missions and activities of urban universities influenced by their cities And how improbably did much maligned urban universities go on to profoundly shape contemporary higher education across the nation Surveying American higher education from the early nineteenth century to the present Diner examines the various ways in which universities responded to the challenges offered by cities In the years before World War II municipal institutions struggled to build character in working class and immigrant students In the postwar era universities in cities grappled with massive expansion in enrollment issues of racial equity the problems of disadvantaged students and the role of higher education in addressing the urban crisis Over the course of the twentieth century urban higher education institutions greatly increased the use of the city for teaching scholarly research on urban issues and inculcating civic responsibility in students In the final decades of the century and moving into the twenty first century university location in urban areas became increasingly popular with both city dwelling students and prospective resident students altering the long tradition of anti urbanism in American higher education Drawing on the archives and publications of higher education organizations and foundations *Universities and Their Cities* argues that city universities brought about today s commitment to universal college access by reaching out to marginalized populations Diner shows how these institutions pioneered the development of professional schools and PhD programs Finally he considers how leaders of urban higher education continuously debated the definition and role of an urban university Ultimately this book is a considered and long overdue look at the symbiotic impact of these two great American institutions the city and the university

Fulfilling the Promise John T. Kneebone, Eugene P. Trani, 2020-09-22 Founded in Richmond in 1968 Virginia Commonwealth University VCU began with a mission to build a university to serve a city emerging from the era of urban crisis desegregation white flight political conflict and economic decline With the merger of the Medical College of Virginia and the Richmond Professional Institute into the single state mandated institution of VCU the two entities were able to embrace their mission and work together productively In *Fulfilling the Promise* John Kneebone and Eugene Trani tell the intriguing story of VCU and the context in which the university was forged and eventually thrived Although VCU s history is necessarily unique Kneebone and Trani show how the issues shaping it are common to many urban institutions from engaging with two party politics in Virginia and African American political leadership in Richmond to fraught neighborhood relations the complexities of providing public health care at an academic health center and an increasingly diverse student body As a result *Fulfilling the Promise* offers far more than a stale institutional saga Rather this definitive history of one urban setting state university illuminates the past and future of American public higher education in the post 1960s era

Race and Real Estate Adrienne R. Brown, Valerie Smith, 2015 *Race and Real Estate* brings together new work by architects sociologists legal scholars and literary critics that qualifies and complicates traditional narratives of race property

and citizenship in the United States Rather than simply rehearsing the standard account of how blacks were historically excluded from homeownership the authors of these essays explore how the raced history of property affects understandings of home and citizenship While the narrative of race and real estate in America has usually been relayed in terms of institutional subjugation dispossession and forced segregation the essays collected in this volume acknowledge the validity of these histories while presenting new perspectives on this story

Black on the Block Mary Pattillo, 2010-04-02 In *Black on the Block* Mary Pattillo a Newsweek Woman of the 21st Century uses the historic rise alarming fall and equally dramatic renewal of Chicago's North Kenwood Oakland neighborhood to explore the politics of race and class in contemporary urban America There was a time when North Kenwood Oakland was plagued by gangs drugs violence and the font of poverty from which they sprang But in the late 1980s activists rose up to tackle the social problems that had plagued the area for decades *Black on the Block* tells the remarkable story of how these residents laid the groundwork for a revitalized and self consciously black neighborhood that continues to flourish today But theirs is not a tale of easy consensus and political unity and here Pattillo teases out the divergent class interests that have come to define black communities like North Kenwood Oakland She explores the often heated battles between haves and have nots home owners and apartment dwellers and newcomers and old timers as they clash over the

social implications of gentrification Along the way Pattillo highlights the conflicted but crucial role that middle class blacks play in transforming such districts as they negotiate between established centers of white economic and political power and the needs of their less fortunate black neighbors A century from now when today s sociologists and journalists are dust and their books are too those who want to understand what the hell happened to Chicago will be finding the answer in this one Chicago Reader To see how diversity creates strange and sometimes awkward bedfellows turn to Mary Pattillo s Black on the Block Boston Globe
