Mountains and Desire Margret Grebowicz, 2021-05-11 On the 100th anniversary of the first attempt to climb Mt Everest Margret Grebowicz shows how and why climbing and mountaineering are still important today In 1923 a reporter asked George Mallory why he wanted to summit Mount Everest Because it s there Today the question why do this is included in nearly every mountaineering story or interview Meanwhile interest in climbing is steadily on the rise from commercial mountaineering and climbing walls in university gyms and corporate workplaces to the flood of spectacular climbing imagery in advertising cinema and social media Climbing has become the theater for imagining limits of the human body and of the planet and the nature of desire

motivation and goals Covering the degradation of Everest the banning of climbing on Australia s Uluru UNESCO s decision to name alpinism an Intangible Cultural Heritage the sudden death of Ueli Steck and the commercial and critical success of Free Solo Mountains and Desire chases after what remains of this pursuit marred by its colonial history coopted by nationalistic chauvinism ableism and the capitalist compulsion to unlimited growth for both climbers and their fans **1999**

Guide to Programs and Grants ,1998 **The Broken Promise of Global Advocacy** Marcel Hanegraaff,Arlo Poletti,2022-06-27 The Broken Promise of Global Advocacy addresses two key normative debates associated with the rise of transnational advocacy whether global interest communities are biased in favor of wealthier countries and whether the growth of global advocacy implies the emergence of a global civil society truly representative of global constituencies The authors address these important debates using original data drawn from a large scale project which maps all organized interests participating in two international venues the World Trade Organizations Ministerial Conferences 1995 2017 and the United Nations Climate Summits 1997 2017 They leverage this unique dataset to carry out a systematic empirical assessment of contending views on the factors driving the rise of transnational advocacy In doing so the book demonstrates that cross national differences in global interest representation largely mirror states economic power and that global interest communities are likely to remain dominated by organizations representing national rather than global interests This book will be of great interest to students and scholars working in comparative politics public policy governance international relations and international political economy **Simple Solutions to Complex Catastrophes** John Braithwaite,2024-02-26 This open access book sets out simple solutions to managing complex catastrophes It focusses on four kinds of crises climate change crime war cascades epidemics and financial crises These catastrophes are conceived as complex and prone to cascade effects This book is optimistic in explaining that there are identifiable simple institutions that international society can strengthen and some simple principles that can help humankind to control the expanding gamut of complex catastrophes that confront the planet including simple stable institutions and regulatory bodies It draws on a wide range of current and past crises and challenges from the Cold War to COVID 19 and from Weapons of Mass Destruction to restorative diplomacy with States like China to provide an urgent and timely path forward Braithwaite argues that improved peacemaking and step by step progress toward abolition of Weapons of Mass Destruction helps prevent environmental pandemic and financial catastrophes His method across four kinds of crises is first to prioritize simple principles and simple institutions that prevent coupled catastrophes from cascading one to the other The next step is to pursue requisite variety in responses by diagnosing dialectically when additional interventions will and will not add value for crisis control Braithwaite argues that minimal sufficiency of deterrence responsive regulation of risks and restorative diplomacy offer superior theoretical foundations than realism in international relations theory and in organizational crime control It speaks to those interested in criminology public policy and international relations political science sociology public health and economics **One Lord, One Faith,**

Second Edition Rex A. Koivisto, 2009-01-01 One Lord One Faith is a plea and plan to re envision the Church as a broad cross denominational community with a shared faith in the Christ of the Gospel It both affirms the place and inevitability of individual denominational traditions and also provides a grid from which to distinguish those denominational traditions from the core of historical orthodoxy shared by the entire Christian community The book seeks to distinguish denominationalism from sectarianism and identifies sectarianism as the true enemy of historic catholicity *The Pugwash Conferences* United States.
