Promising Skies:

The Lusophone World Sarah Ashby, 2017-02-23 Portugal's European Union honeymoon has officially ended. It was the victim of a Europe-wide political and financial crisis and an unstable EU identity increasingly splintered along regional and economic fractures. What does this mean for the former good student of European democracy? The answer may lie in renewed Portuguese efforts to deepen and strengthen ties with Lusophone countries across the globe which since 1996 have been organized into a supranational organization called the Community of Portuguese Speaking Countries (CPLP). While Portugal's marginality in relation to Europe might be emphasized in the corridors of Brussels within the realm of the CPLP, the former world power can once again see itself as existing at the center geographically as well as from a historic cultural perspective of an extensive international milieu. *The Lusophone World: The Evolution of Portuguese National Narratives* explores the dialectic between Portugal's sense of identity and belonging in the EU and the CPLP. It provides an analysis of the manner in which Portugal's institutional allegiances to both of these organizations have impacted the political, economic, and social fabric of the nation. The fact that Portugal is turning to its former colonies as alternate partners in trade, commerce, emigration, and development initiatives may not be evidence of straightforward estrangement from the European continent. More likely, Portugal appears to be riding a fresh wave of what it means to be modern in the European milieu. This new concept of modernity, related to rhetoric of hybridity and a self-professed position as interlocutor, could be evidence of a deeper understanding of the new tools needed to survive and prosper in a rapidly changing European Union. **Learning**

Trajectories, Violence and Empowerment amongst Adult Basic Skills Learners Vicky Duckworth, 2013-11-20 *Learning Trajectories: Violence and Empowerment amongst Adult Basic Skills Learners* offers deep insights into the lives of marginalised communities and the link between learning, literacy, and violence, not previously carried out in depth in a small-scale study. It breaks the negative stereotypes of adults who struggle to read and write, who are often labelled and stigmatised by dominant discourses, and in doing so exposes why and how Basic Skills Learners often find themselves in marginal positions. The structural inequalities many face from childhood to adulthood across the private and public domains of their lives are revealed and probed, thus challenging neo-liberalism's claims of an apparently egalitarian social field. The learners' narratives expose the contradiction, complexities, and ambivalences they experience in their daily lives and how they try to make sense of them from their structural positioning as basic skills learners in a society based on inequality of opportunity and choice. Applying a feminist, qualitative, longitudinal, ethnographic, and participatory approach, the book offers a critical perspective drawing on Bourdieu's work as the theoretical framework, as well as using a range of feminist sociologists of education literature on the ethics of care and critical literacy pedagogy, including the New Literacy Studies. The author's personal position as an insider with insider knowledge of marginalised communities is also woven throughout the chapters and offers insights into the struggles, conformity, and resistance faced by the participants in the study. The book

contributes to the debate on the impact of violence on learning and its link to class gender and basic skills as well opening up a discussion on the power of a critical curriculum to empower people across the domains of their lives It will be valuable reading for trainee teachers teachers education and sociology students postgraduate students as well as literacy specialists researchers academics policy makers and managers of public services Never Forgotten, Never Could be Thomas Clarkson, Daniel Drayton, Louis Hughes, Lydia Maria Child, Austin Steward, Ida B. Environmental Inequalities Andrew Hurley, 2009-11-30 By examining environmental change through the lens of conflicting social agendas Andrew Hurley uncovers the historical roots of environmental inequality in contemporary urban America Hurley s study focuses on the steel mill community of Gary Indiana a city that was sacrificed like a thousand other American places to industrial priorities in the decades following World War II Although this period witnessed the emergence of a powerful environmental crusade and a resilient quest for equality and social justice among blue collar workers and African Americans such efforts often conflicted with the needs of industry To secure their own interests manufacturers and affluent white suburbanites exploited divisions of race and class and the poor frequently found themselves trapped in deteriorating neighborhoods and exposed to dangerous levels of industrial pollution In telling the story of Gary Hurley reveals liberal capitalism s difficulties in reconciling concerns about social justice and quality of life with the imperatives of economic growth He also shows that the power to mold the urban landscape was intertwined with the ability to govern social relations
