US Economic Aid in Egypt Dina Jadallah, 2016-01-27 Economic aid is one of the cornerstones of the Egyptian American relationship and plays a significant role in promoting US policy objectives in the Middle East Focusing on the latter half of Hosni Mubarak's rule Dina Jadallah argues that through its aid policy the US has attempted to use a reforming and democratising narrative to transform Egypt into a stable market democracy that would be aligned with US interests in the region This aim has been pursued in conjunction with one that promoted a comprehensive warm peace with Israel By highlighting the opposition within Egypt to US aid Jadallah analyses the key issues that came to the fore during the 2010 11 protests in the country and led to the downfall of Mubarak Extending her analysis into the post revolutionary period the author provides interviews with regime insiders and prominent critics inside state institutions and outside who actively challenged the regime This enables her to assess the different perceptions of US aid both under Mubarak and in the current political situation contributing to an incisive analysis of modern Egypt and its relations with its superpower ally in the region

The Ends of Modernization David Johnson Lee, 2021-08-15 The Ends of Modernization studies the relations between Nicaragua and the United States in the crucial years during and after the Cold War David Johnson Lee charts the transformation of the ideals of modernization national autonomy and planned development as they gave way to human rights protection neoliberalism and sustainability Using archival material newspapers literature and interviews with historical actors in countries across Latin America the United States and Europe Lee demonstrates how conflict between the United States and Nicaragua shaped larger international development policy and transformed the Cold War In Nicaragua the backlash to modernization took the form of the Sandinista Revolution which ousted President Anastasio Somoza Debayle in July 1979 In the wake of the earlier reconstruction of Managua after the devastating 1972 earthquake and instigated by the revolutionary shift of power in the city the Sandinista Revolution incited radical changes that challenged the frankly ideological and economic motivations of modernization In response to threats to its ideological dominance regionally and globally the United States began to promote new paradigms of development built around human rights entrepreneurial internationalism indigenous rights and sustainable development Lee traces the ways Nicaraguans made their country central to the contest over development ideals beginning in the 1960s transforming how political and economic development were imagined worldwide By illustrating how ideas about ecology and sustainable development became linked to geopolitical conflict during and after the Cold War The Ends of Modernization provides a history of the late Cold War that connects the contest between the two then prevailing superpowers to trends that shape our present globalized multipolar world

The Spectre of Race Michael G. Hanchard, 2018-05-29 How racism and discrimination have been central to democracies from the classical period to today As

right wing nationalism and authoritarian populism gain momentum across the world liberals and even some conservatives worry that democratic principles are under threat In *The Spectre of Race* Michael Hanchard argues that the current rise in xenophobia and racist rhetoric is nothing new and that exclusionary policies have always been central to democratic practices since their beginnings in classical times Contending that democracy has never been for all people Hanchard discusses how marginalization is reinforced in modern politics and why these contradictions need to be fully examined if the dynamics of democracy are to be truly understood Hanchard identifies continuities of discriminatory citizenship from classical Athens to the present and looks at how democratic institutions have promoted undemocratic ideas and practices The longest standing modern democracies France Britain and the United States profited from slave labor empire and colonialism much like their Athenian predecessor Hanchard follows these patterns through the Enlightenment and to the states and political thinkers of the late nineteenth and early twentieth centuries and he examines how early political scientists including Woodrow Wilson and his contemporaries devised what Hanchard has characterized as racial regimes to maintain the political and economic privileges of dominant groups at the expense of subordinated ones Exploring how democracies reconcile political inequality and equality Hanchard debates the thorny question of the conditions under which democracies have created and maintained barriers to political membership Showing the ways that race gender nationality and other criteria have determined a person's status in political life *The Spectre of Race* offers important historical context for how democracy generates political difference and inequality

Democracy Promotion, National Security and Strategy Robert Pee, 2015-07-24 This book investigates the relationship between democracy promotion and US national security strategy through an examination of the Reagan administration's attempt to launch a global campaign for democracy in the early 1980s which culminated in the foundation of the National Endowment for Democracy in 1983 and through an analysis of the early political interventions of the Endowment until 1986 A case study of the formation and early operations of the National Endowment for Democracy under the Reagan administration based on primary documents from both the national security bureaucracy and the private sector shows that while democracy promotion provided a new tactical approach to the conduct of US political warfare operations these operations remained tied to the achievement of traditional national security goals such as destabilising enemy regimes and building stable and legitimate friendly governments rather than being guided by a strategy based on the universal promotion of democracy This book will be of interest to students and scholars of US Foreign Policy Democracy Promotion and for those seeking to gain a better understanding of the Reagan Administration

Chase-Dunn,E. Anderson,2005-02-18 The rise and decline of great powers remains a fascinating topic of vigorous debate This book brings together leading scholars to explore the historical evolution of world systems through examining the ebb and flow of great powers over time with particular emphasis on early time periods The book advances understanding of the regularities in the dynamics of empire and the expansion of political social and economic interaction networks from the Bronze Age forward The authors analyze the expansion and contraction of cross cultural trade networks and systems of competing and allying political groupings In premodern times theses ranged from small local trading networks even the very small ones of hunting gathering peoples to the vast Mongol world system Within such systems there is usually one or a very few hegemonic powers How they achieve dominance and how transitions lead to systems change are important topics particularly at a time when the United States position is in flux The chapters in this book review several recent approaches and present a wealth of new findings Latin America's Pink Tide Steve Ellner,2019-10-10 This timely book analyzes the governing experiences of the nine major pro leftist governments in Latin America The individual country case study chapters are preceded by chapters that frame the discussion by considering the theoretical implications of the Pink Tide experience relating to globalization the state and neo extractivism The contributors examine the Pink Tide policies and rhetoric that gained widespread approval and

led to the long tenure of many of these governments These included ambitious social programs prioritizing the needs of the poor nationalistic foreign policy economic nationalism and asserting control of strategic sectors of the economy The book continues by taking a critical look at policies that have contributed to recent setbacks acknowledging the inability of progressive governments to overcome embedded structures holding back economic development One such setback has come from the opposition often supported by powerful foreign actors pressuring the government into making concessions and carrying out policies that ultimately undermined economic and political stability The contributors critically examine these policies which were politically successful in the short run but eventually backfired in the form of corruption bureaucratic waste and economic sluggishness With its balanced and thorough assessment this book will provide readers with a deep and nuanced understanding of the complexity of the political economic and sociocultural reality of contemporary Latin America and the Caribbean

Global Capitalism and Transnational Class Formation Jason Struna, 2016-03-17 The global capitalism perspective is a unique research program focused on understanding relatively recent developments in worldwide social economic and political practices related to globalization At its core it seeks to contextualize the rearticulation of nation states and broad geographic regions into highly interdependent networks of production and distribution and in so doing explain consequent changes in social relations within and between countries in the contemporary era The present volume contributes to this effort by focusing on social class formation across borders via the processes and actors that make globalized capitalism possible The essays presented here offer a wide range of emphases in terms of the particular lenses and evidence they use They cover such topics as the emergence of a transnational capitalist class based fascist regime responding to the structural crises of global capitalism as well as the links between global class formation and the US racial project as it relates to electoral politics and demographic changes in the US South This book was published as a special issue of Globalizations

Neoliberalism in Crisis Henk Overbeek, Bastiaan van Apeldoorn, 2012-02-29 The authors interrogate the condition of the neoliberal project in the wake of the global crisis and neoliberalism's predicted death in 2007 both in terms of the regulatory structures of finance led capitalism in Europe and North America and the impact of new centres of capitalist power on global order

Coexisting Contemporary Civilizations Guy Ankerl, 2000 Some important questions are discussed in this book Are there any civilisations other than the Western one living in our so called Global Age Eastern civilisation Is the concept of East anything more than non West Or does there exist in reality a distinct Chinese Indian Arabo Muslim and Western civilisation Is the construction of large civilisation states such as China and India an unparalleled historical achievement Do economic ties always eclipse other forms of affiliation such as those formed through kinship or between speech communities What is the role of the Latin and the Jewish Peoples in our Anglo American led Western world Is English today the global language or merely an international one Is the Chinese thought pattern closely related to its writing system Is today's world one of symmetrical interdependence Or rather one of hegemony If the so called North South

or East West dialogue fails in constructing a universally accepted world civilisation then what is the appropriate arrangement for reaching such a consensus within humankind Living at the Borderlines Cynthia Barrow-Giles, Don D. Marshall, 2003

The idea that the Caribbean could be devolving downward in wealth function and sovereignty has become a recurrent theme in both academic and popular literature By focusing on some of the current issues facing Caribbean nation states the editors and contributors to this volume hope to inform and contribute to the ongoing debate on the broad themes of Sovereignty and Development and the prospects for survival of Caribbean nation states in a globalised world While some of the papers seek to describe and analyse the range and complexity of the challenge to national sovereignty and public policy autonomy others focus on issues relating to small country size gender and ethnic tensions security constitutional reform and regional integration The result is a balanced perspective the contributors do not gloss over the problem faced by the region At the same time they do not present a hyper pessimistic picture of Caribbean development prospects What gives the collection a particular dynamism is the way in which the authors have challenged the terrain of political possibilities traditionally defined for small peripheral societies
