Promoting Capabilities To Manage Postraumatic Stress Perspectives On Resilience Hardcover:

The Phoenix of Natural Disasters Kathryn Gow, Douglas Paton, 2008 This book encompasses discussions between Kathryn Gow and Douglas Paton both psychologists who have researched stress burnout trauma and recovery in natural disasters They suggest that few books have been written for health professionals and persons directly involved with leading and managing emergency teams on what constitutes resilience in individuals and groups in communities and how they differ in response and recovery The outcome is a three part book with contributors from the field research institutions emergency service sectors support agencies and the media Its main purpose is to focus on the resilience of people and communities following NDs and to educate the sectors already involved in natural disasters [Trauma, Resilience, and Posttraumatic Growth in Frontline Personnel](#) Jane Shakespeare-Finch, Paul J. Scully, Dagmar Bruenig, 2024-02-27 Trauma Resilience and Posttraumatic Growth in Frontline Personnel examines the history context nature and complexity of working in front line services Chapters provide a detailed overview of specific mental health models that are applicable both on a day to day basis and to disaster and major event response The book also details elements of mental health responses that have been proven to facilitate coping minimize risk and promote both resilience and posttraumatic growth These strategies include but are not limited to peer support programs mental health education and psychological first aid Each chapter incorporates research on PTSD anxiety and depression as well as research relating to posttraumatic growth resilience connectedness and belongingness Trauma Resilience and Posttraumatic Growth in Frontline Personnel is a vital guide for those who provide care to trauma survivors as well as for researchers and scholars **PROMOTING CAPABILITIES TO MANAGE**

POSTTRAUMATIC STRESS Douglas Paton, John M. Violanti, Leigh M. Smith, 2003-01-01 This book provides a systematic review of the variables and mechanisms that underpin resilience and growth in professions who face a high risk of regular and repetitive exposure to adverse or hazardous events Given the inevitability of this exposure promoting the acceptance and practice of this paradigm is essential for facilitating the capability of emergency responders to adapt to and if possible to grow from adverse and hazardous experience By identifying salient dispositional cognitive group organizational and environmental predictors of resilience and articulating the mechanisms that link them to adaptive and growth outcomes emergency organizations will have the capacity to intervene prior to exposure to adverse events rather than waiting until after the event as is currently the norm This book thus adopts an approach that is fundamentally preventative in nature and offers practical suggestions to support the development of resilient capabilities By describing influences on this capability that cover the person the organization and factors external to the workplace it offers a more ecologically comprehensive approach to those working in this area In addition it offers a more comprehensive framework for this work by drawing on constructs e.g. trust empowerment that would ordinarily lie outside mainstream traumatic stress research The contents of this book provide a theoretically and empirically rigorous knowledge base and intervention framework capable of mitigating

negative reactions facilitating adaptation in the face of adversity and enhancing the likelihood that adverse and traumatic work experiences will enrich the personal and professional lives of those who dedicate themselves to protecting and safeguarding others. It will be of interest to emergency worker counselors, police counselors, disaster workers, mental health professionals and individuals that work with people exposed to trauma. THE CONSEQUENCES OF DISASTERS Helen James, Douglas Paton, 2015-12-22. The Consequences of Disasters: Demographic Planning and Policy Implications presents innovative multi disciplinary perspectives on how people and societies respond to and recover from sudden unexpected crisis events like natural disasters which impact tragically on the established patterns and structures of their lives. Through detailed empirical analysis which employs both qualitative and quantitative research methodologies the twenty two chapters in this fine volume explore these critical issues. Chapters have a wide global range across both democratic and transforming governance systems which spotlight the many different ways in which different political jurisdictions respond to the demographic planning and policy implications of the natural disasters affecting their citizens. The authors collectively provide insights into varying socio cultural and political disaster frameworks from China, Japan, the USA, New Zealand, Myanmar, Indonesia, Taiwan, Iran, The Philippines and Pakistan. Taking the conceptual and analytical lens of social capital, family formation and migration patterns the authors employ comparative demographic, anthropological and sociological approaches to present the human security contexts of natural disasters when they unexpectedly wreak havoc on human societies and the coping and response behaviors they adopt, develop and use as survivors as they set about rebuilding their lives over periods that can extend over several years. This book provides many innovative insights which will be of value to disaster policy experts, practitioners in the humanitarian field, civil society and government sectors and researchers engaged in disaster recovery and reconstruction practice and research.

Situation de crise, de tragédie ou de sinistre. Le point de vue des professionnels... Danielle Maltais, 2015-08-19. T00:00:00-04:00. Les travailleurs sociaux viennent souvent en aide aux personnes qui vivent des tragédies ou qui sont victimes de catastrophes. Dans de telles circonstances leur niveau de vulnérabilité est accru puisqu'ils sont en présence de personnes traumatisées ou souffrantes qui vivent d'importantes réactions émotionnelles dans des contextes d'intervention souvent difficiles et imprévisibles. Des conséquences à la fois négatives et positives peuvent être vécues par ces professionnels. La fatigue de compassion, le stress post-traumatique secondaire, la traumatisation vicariante et l'épuisement professionnel sont des exemples d'effets négatifs susceptibles d'être vécus par les travailleurs sociaux. Toutefois intervenir dans de tels contextes peut être également très gratifiant et peut permettre de réaffirmer ses compétences professionnelles, de relativiser l'importance de ses problèmes personnels et de découvrir le pouvoir de la solidarité et de la résilience des individus et des communautés. Les études sur les répercussions de l'engagement des intervenants sociaux lors de situations d'urgence sur leur santé et leur vie personnelle et professionnelle sont encore peu nombreuses. Ce livre vient combler cette lacune en

portant sur le vécu et l'état de santé au travail des intervenants sociaux du Québec qui ont appelé à intervenir en situation de crise de tragédie ou de sinistre au cours des dernières années

Psychotrauma Alexander Friedmann, Peter Hofmann, Brigitte Lueger-Schuster, Maria Steinbauer, David Vyssoki, 2013-03-07 Zeit heilt nicht alle Wunden. Die schweren Folgen des Psychotraumas werden ebenso oft fehl wie überhaupt nicht diagnostiziert. Die psychischen Folgen massiver traumatischer Ereignisse traten erst in den letzten Jahrzehnten in den Mittelpunkt intensiver psychiatrischer Forschungsarbeit, obwohl sie schon seit dem ausklingenden 19. Jahrhundert unter den verschiedensten Begriffen zur Diskussion stehen. Das Buch widmet sich dem neuesten Wissensstand. Die Autoren verfügen über langjährige praktische Erfahrungen und sind anerkannte Experten. Sie bereiten die behandelten Themen wie etwa Diagnostik, psychologische Befunde, Komorbidität, Missbrauch bei Kindern und Katastropheneinsatz praxisrelevant auf. Das Buch bietet klare Handlungsanleitungen, die Fachleute mit unterschiedlichen Interessen zur Ergänzung und Erweiterung ihrer eigenen Arbeitsweisen nutzen können.

Koenig and Schultz's Disaster Medicine Kristi L. Koenig, Carl H. Schultz, 2016-02-16 As societies become more complex and interconnected, the global risk for catastrophic disasters is increasing. Demand for expertise to mitigate the human suffering and damage these events cause is also high. A new field of disaster medicine is emerging, offering innovative approaches to optimize disaster management. Much of the information needed to create the foundation for this growing specialty is not objectively described or is scattered among multiple different sources. This definitive work brings together a coherent and comprehensive collection of scientific
