Propaganda, War Crimes Trials and International Law Predrag Dojcinovic, 2013-03-01 First Published in 2012 Propaganda War Crimes Trials and International Law addresses the emerging jurisprudence and international law concerning propaganda in war crimes investigations and trials The role of propaganda in the perpetration of atrocities has emerged as a central theme in the war crimes trials in the past century The Nuremburg trials initially and the International Criminal Tribunal for the former Yugoslavia and the International Criminal Tribunal for Rwanda currently have all substantially contributed to the development of international law in this respect Investigating and exploring the areas between lawful and unlawful propaganda they have dealt with specific mechanisms and consequences of the phenomenon within the perspective and framework of their international legal mandates But the cultural codes and argots through which propaganda operates have vexed international courts struggling to assign responsibility to the instigators of mass crimes as subtle but potentially fatal communications often remain undetected misinterpreted or even dismissed as entirely irrelevant With contributions from leading international scholars and legal practioners Propaganda War Crimes Trials and International Law pursues a comparative approach to this problem providing an overview of the current state of the theory of propaganda in the social sciences exploring this theory in the legal analysis of war crimes and related proceedings and finally offering a study of the prosecution of propaganda related crimes in international law and the newly emerging jurisprudence of war crimes propaganda cases

War Propaganda and the United States Harold Lavine, James Arthur Wechsler, 2012-10-01

The Syrian Information and Propaganda War Ben Cole, 2022-02-22 This book focuses on the propaganda war between the Syrian government and the opposition movement which excludes the Islamic State and the Kurdish led SDF Drawing on international relations psychology and media studies the book encourages readers to question the dominant discourse on the war The core of the book outlines the propaganda battles over the main paradigms and

narratives that framed the war exploring the shortcomings of those paradigms and narratives identifying who won the propaganda war and why and assessing what impact it had on the military side of the war In particular it focuses on the role of cognitive bias amongst primary and secondary sources in determining the outcome of the propaganda war and whether the influence of this propaganda is best explained by effects or limited effects theory Through explaining the dynamics of the propaganda war the book encourages readers to critically question the dominant discourse on the war assists them in understanding primary and secondary reporting on the war and shows that the impact of the propaganda war is best understood in terms of limited effects theory The book s main findings are that i the opposition won the international propaganda war but failed to win the propaganda war inside Syria ii propaganda had relatively little effect on shaping attitudes either inside Syria or internationally instead its main effect was to reinforce attitudes that had already been shaped by other factors and iii the reality of the war lies between the conflicting paradigms and narratives being promoted by each side

World War II Propaganda David Welch,2017-10-12 Shows in illuminating detail how the Allied and Axis forces used visual images and other propaganda material to sway public opinion during World War II Author David Welch provides a neatly organized primary resource that focuses on key themes associated with World War II propaganda Readers will not only be engrossed with a wide range of propaganda artifacts they will also receive a better and more nuanced understanding of the nature of this propaganda and how it was disseminated in different cultural and political contexts This book reveals how leaders and spin doctors operating at behest of the state sought to shape popular attitudes both at home and overseas A comprehensive introductory essay sets out the principles of propaganda theory in World War II while the subsequent material provides examples of Allied and Axis generated propaganda and presents them in a readily accessible way that will help readers understand the context

Propaganda Technique In World War I Harold D. Lasswell,1971-04-15 A classic book on propaganda technique proposes a general theory of the strategy and tactics of propaganda This classic book on propaganda technique focuses on American British French and German experience in World War I The book sets forth a simple classification of various psychological materials used to produce

certain specific results and proposes a general theory of strategy and tactics for the manipulation of these materials In an introduction coauthored by Jackson A Giddens written for this edition Harold Lasswell notes that this study was partially an exercise in the discovery of appropriate theory It raised the crucial questions of how to classify the content of propaganda for instance a distinction is made between value demands war aims war guilt and casting the enemy as evil personified and expectations the illusion of victory and how to summarize the procedures employed in organizing and carrying out propaganda operations Propaganda Technique in World War I deals primarily with problems of internal administration and lateral coordination rather than with the relationship between policymakers and propagandists However Jackson Giddens enumerates procedures in the book that illustrate an underlying assumption that decision makers were deeply involved in propaganda and influenced by considerations of public opinion He takes the study of propaganda further by elaborating on the nature and meaning of the category of war aims and its relation to the propagandist for this more than any other category of content is the catalyst of transnational political action Giddens s exploration of the development of a comprehensive theory of propaganda adds another dimension to Lasswell s study while confirming its value as outstanding groundwork for continuing research

The Art of War: Volume 4 - the Americans (a Collection of 135 American World War Two Propaganda Posters) Artemis Design,2020-04-08 THE ART OF WAR VOLUME 4 IS A COLLECTION OF 135 AMERICAN WORLD WAR TWO PROPAGANDA POSTERS INCLUDES A FOREWORD BY HISTORIAN M J TROW Propaganda during the Second World War was an unavoidable aspect of daily life It must be a situation that is hard to relate to for those of us in the

West born too late or too young to remember the war or the decades afterwards The idea that you must always be alert to the ominous drone of the air raid sirens as you went about your business or that your home could be destroyed in an aerial bombardment at any moment is very hard to comprehend But those who lived through the war knew it was perfectly possible that the Wehrmacht could soon be marching through the streets with all the chaos fear death and destruction that that would imply Against this backdrop we can understand why propaganda was so vital to all sides of the conflict For those interested in the psychology of the past propaganda posters are a great glimpse into the understandable paranoia hysteria and concerns of those who created them and the message they thought it was necessary to promote to everyone else All of these posters served some sort of purpose and modern cynicism means it is often hard not to scoff at some of them because to us they are now often unintentionally humorous or offensive Those in government at the time knew that war had evolved The Great War had changed much and this latest conflict with Germany would create a huge strain both in terms of morale and in the nation's resources and it was vital to have and maintain full support for the war at home While propaganda was nothing new it came into its own during the Second World War British posters were in the main created by the controversial Ministry of Information a government department that was dissolved soon after the war and probably one of George Orwell's inspirations for Big Brother Many contemporary members of parliament were very disturbed by the agenda of this department and protested that there was a very real danger that Britain could ironically sleep walk into becoming the fascist brain washed state with which they were at war The messages behind most of these posters is overt and obvious The well known but never actually distributed Keep Calm and Carry On posters are still recognisable to us today over 70 years later Other messages may verge on the bizarre to those who never knew the horrors of the conflict first hand One poster shows a soldier and his partner on a sofa with the message Keep mum stay silent she might not be so dumb implying that his girlfriend may at best be a loudmouth who will report his military operations to everyone in town and at worst be a Gestapo agent who had been planted into his home This isn't to mock the sentiment but simply to point out how difficult it is for a modern mind to understand Other posters urging mothers to evacuate their children away from towns as refugees to find safety in the countryside or even abroad to the security of Canada or other parts of the empire are quite shocking Still more so are those which implied that people taking a day off work due to sickness could be shirking or that those who lost a tool at work were aiding Hitler are quite unsettling even now American propaganda was often racist showing rat like Japanese One dramatic poster featuring two creepy children in their gas masks and proclaiming Dear God keep them safe is still striking On the Axis side they were oddly obsessed with reminding Allied soldiers particularly Americans that their women were back at home probably sleeping with someone else and that the negroes were now running the country

The Discourse of Propaganda John Oddo, 2018-10-24 In the early 1990s false reports of Iraqi soldiers in Kuwait allowing premature infants to die by removing them from their incubators helped to justify the Persian Gulf War just as spurious reports of weapons of

mass destruction later undergirded support for the Iraq War in 2003 In *The Discourse of Propaganda* John Oddo examines these and other such cases to show how successful wartime propaganda functions as a discursive process Oddo argues that propaganda is more than just misleading rhetoric generated by one person or group it is an elaborate process that relies on recontextualization ideally on a massive scale to keep it alive and effective In a series of case studies he analyzes both textual and visual rhetoric as well as the social and material conditions that allow them to circulate tracing how instances of propaganda are constructed performed and repeated in diverse contexts such as speeches news reports and popular everyday discourse By revealing the agents inter texts and cultural practices involved in propaganda campaigns *The Discourse of Propaganda* shines much needed light on the topic and challenges its readers to consider the complicated processes that allow propaganda to flourish This book will appeal not only to scholars of rhetoric and propaganda but also to those interested in unfolding the machinations motivating America s recent military interventions

Propaganda, Power and Persuasion David Welch, 2013-11-27 As Philip Taylor has written The challenge of the modern information age is to ensure that no single propaganda source gains monopoly over the information and images that shape our thoughts If this happens the war propagandists will be back in business again Propaganda came of age in the Twentieth Century The development of mass and multi media offered a fertile ground for propaganda while global conflict provided the impetus needed for its growth Propaganda has however become a portmanteau word which can be interpreted in a number of different ways What are the characteristic features of propaganda and how can it be defined The distinguished contributors to this book trace the development of techniques of opinion management from the First World War to the current conflict in Afghanistan They reveal how state leaders and spin doctors operating at the behest of the state sought to shape popular attitudes at home and overseas endeavouring to harness new media with the objective of winning hearts and minds The book provides compelling evidence of how the study and practice of propaganda today is shaped by its history

Radio Goes to War Gerd Horten, 2002-02-06 *Radio Goes to War* is the first comprehensive and in depth look at the role of domestic radio in the United States during the Second World War As this study convincingly demonstrates radio broadcasting played a crucial role both in government propaganda and within the context of the broader cultural and political transformations of wartime America Gerd Horten s absorbing narrative argues that no medium merged entertainment propaganda and advertising more effectively than radio As a result America s wartime radio propaganda emphasized an increasingly corporate and privatized vision of America s future with important repercussions for the war years and the postwar era Examining radio news programs government propaganda shows advertising soap operas and comedy programs Horten situates radio wartime propaganda in the key shift from a Depression era resentment of big business to the consumer and corporate culture of the postwar period
