## **Properties Of Aluminum Gallium Arsenide:**

Properties of Aluminium Gallium Arsenide Sadao Adachi,1993 The alloy system AlGaAs GaAs is potentially of great importance for many high speed electronics and optoelectronic devices because the lattice parameter difference GaAs and AlGaAs is very small which promises an insignificant concentration of undesirable interface states Thanks to this prominent feature a number of interesting properties and phenomena such as high mobility low dimensional carrier gases resonant tunnelling and fractional quantum Hall effect have been found in the AlGaAs GaAs heterostructure system New devices such as modulation doped FETs heterojunction bipolar transistors resonant tunnelling transistors quantum well lasers and other photonic and quantum effect devices have also been developed recently using this material system These areas are recognized as not being the most interesting and active fields in semiconductor physics and device engineering

**Broadband Measurement and Reduction of Quantum Radiation Pressure Noise in the Audio Band** Jonathan Cripe,2020-05-15 This book presents a direct measurement of quantum back action or radiation pressure noise on a macroscopic object at room temperature across a broad bandwidth in the audio range This noise source was predicted to be a limitation for gravitational wave interferometers in the 1980s but it has evaded direct characterization in the gravitational wave community due to the inherent difficulty of reducing thermal fluctuations below the quantum back action level This back action noise is a potential limitation in Advanced LIGO and Advanced Virgo and Cripe's experiment has provided a platform for the demonstration of quantum measurement techniques that will allow quantum radiation pressure noise to be reduced in these detectors The experimental techniques Cripe developed for this purpose are also applicable to any continuous measurement operating near the quantum limit and could lead to the possibility of observing non classical behavior of macroscopic objects
