The Soldier in Later Medieval England Adrian R. Bell, Anne Curry, Andy King, David Simpkin, 2013-09-12 The Hundred Years War was a struggle for control over the French throne fought as a series of conflicts between England France and their respective allies The Soldier in Later Medieval England is the outcome of a project which collects the names of every soldier known to have served the English Crown from 1369 to the loss of Gascony in 1453 the event which is traditionally accepted as the end date of the Hundred Years War The data gathered throughout the project has allowed the authors of this volume to compare different forms of war such as the chevauchés of the late fourteenth century and the occupation of French territories in the fifteenth century and thus to identify longer term trends It also highlights the significance of the change of dynasty in England in the early 1400s The scope of the volume begins in 1369 because of the survival from that point of the muster roll a type of documentary record in which soldiers' names are systematically recorded The muster roll is a rich resource for the historian as it allows closer study to be made of the peerage the knights the men at arms the esquires and especially the lower ranks of the army such as the archers who contributed the largest proportion of troops to English royal service The Soldier in Later Medieval England seeks to investigate the different types of soldier their regional and national origins and movement between ranks This is a wide ranging volume which offers invaluable insights into a much neglected subject and presents many opportunities for future research

Property and Politics A. J. Pollard, 1984-01-01 *Catholic England*, 2013-01-01 The Reformation transformed English religion For many the spirituality of the preceding period remains largely unknown or overburdened with Protestant mythology of decadence These sources seek to explore the nature of religious belief and practice in pre Reformation England using original source material to make the debates accessible This consideration of the sources begins with an analytical chapter discussing the varieties of spirituality in later medieval England and the ways in which they received expression through participation in church services actions like pilgrimages charitable foundations devotional readings and instruction Opposition to prevailing spirituality expressed through Lollardy is also considered The sources demonstrate with immediacy and potency these diverse expressions of faith and observance Many of the documents are translated for the first time from unpublished manuscript material This study demonstrates the vitality of the pre Reformation religious practices but also addresses the key methodological questions which arise from the sources about the nature of the material its reliability as historical evidence and the validity of external actions as testimony to intellectual and emotional experience **Crisis and Survival in Late Medieval Ireland** Brendan Smith, 2013-06-20 Medieval Ireland is associated in the public imagination with the ruined castles and monasteries that remain prominent in the Irish landscape *Crisis and Survival in Late Medieval Ireland* The English of Louth and their Neighbours 1330-1450 examines how the society that produced these monuments developed over the course of a turbulent century focussing particularly on county Louth situated on the coast north of Dublin and adjacent to the earldom of Ulster Louth was one of the areas that had been most densely colonised by English settlers in the decades around 1200 and ties with England and loyalty to the English crown remained strong Its settlers found it possible to maintain close economic and political ties with England in part because of their proximity to the significant trading port of Drogheda and the residence among them of the archbishop of Armagh primate of Ireland also extended their international horizons and contacts In this volume Brendan Smith explores the ways in which the English settlers in Louth maintained their English identity in the face of plague and warfare The Black Death of 1348-9 and recurrent visitations of plague thereafter reduced their numbers significantly and encouraged the Irish lordships on their borders to challenge their local supremacy How to counter the threat from the MacMahons O Neills and others absorbed their energies and resources It not only involved mounting armed campaigns taking hostages and building defences it also meant intermarrying with these families and entering into numerous solemn if short lived treaties with them Smith draws on original source material to present a picture of the English settlers in Louth and to show how living in the borderlands of the English world coloured every aspect of settler life **Politics and the Urban Sector in Fifteenth-Century England, 1413-1471** Eliza Hartrich, 2019-08-14 Since the mid twentieth century political histories of late medieval England have focused almost exclusively on the relationship between the Crown and aristocratic landholders Such studies however neglect to consider that England after the Black Death was an urbanising society Towns not only were the residence of a rising proportion of the

population but were also the stages on which power was asserted and the places where financial and military resources were concentrated Outside London however most English towns were small compared to those found in contemporary Italy or Flanders and it has been easy for historians to under estimate their ability to influence English politics Politics and the Urban Sector in Fifteenth Century England 1413 1471 offers a new approach for evaluating the role of urban society in late medieval English politics Rather than focusing on English towns individually it creates a model for assessing the political might that could be exerted by towns collectively as an urban sector Based on primary sources from twenty two towns ranging from the metropolis of London to the tiny Kentish town of Lydd Politics and the Urban Sector demonstrates how fluctuations in inter urban relationships affected the content pace and language of English politics during the tumultuous fifteenth century In particular the volume presents a new interpretation of the Wars of the Roses in which the relative strength of the urban sector determined the success of kings and their challengers and moulded the content of the political programmes they advocated

Parks in Medieval England S.A. Miles, 2009-07-16 Parks were prominent and indeed controversial features of the medieval countryside but they have been unevenly studied and remain only partly understood Stephen Miles provides the first full length study of the subject examining parks across the country and throughout the Middle Ages in their full social economic jurisdictional and landscape context The first half of the book investigates the purpose of these royal and aristocratic reserves which have been variously claimed as hunting grounds economic assets landscape settings for residences and status symbols An emphasis on the aristocratic passion for the chase as the key motivation for park making provides an important challenge to more recent views and allows for a deeper appreciation of the connection between park making and the expression of power and lordship The second part of the book examines the impact of park creation on wider society from the king and aristocracy to peasants and townsmen Instead of the traditional emphasis on the importance of royal regulation greater attention is paid to the effects of lordly park making on other members of the landed elite and ordinary people These widespread enclosures interfered with customary uses of woodland and waste hunting practices roads and farming not surprisingly they could become a focus for aristocratic feud popular protest and furtive resistance Combining historical archaeological and landscape evidence this ground breaking study provides fresh insight into contemporary values and how they helped to shape the medieval landscape
