(In)Security and the Production of International Relations Jonas Hagmann, 2014-11-27 This book provides a framework for analysing the interplay between securitisation and foreign affairs reconnecting critical security studies with

traditional IR concerns about interstate relations What happens to foreign policymaking when actors things or processes are presented as threats This book explains state behaviour on the basis of a reflexive framework of insecurity politics and argues that governments act on the knowledge of international danger available in their societies but that such knowledge is organised by markedly varying ideas of who threatens whom and how The book develops this argument and illustrates it by means of various European case studies Moving across European history and space these case studies show how securitisation has projected evolving and often contested local ideas of the organisation of international insecurity and how such knowledges of world politics have then conditioned foreign policymaking on their own terms With its focus on insecurity politics the book provides new perspectives for the study of international security Moving the discipline from systemic theorising to a theory of international systematisation it shows how world politics is in practice often conceived in a different way than that assumed by IR theory By the same token by depicting national insecurity as a matter of political construction the book also raises the challenging question of whether certain projections of insecurity may be considered more warranted than others This book will be of much interest to students of critical security studies European politics foreign policy and IR in general

Medieval Foundations of International Relations William Bain, 2016-07-15 The purpose of this volume is to explore the medieval inheritance of modern international relations Recent years have seen a flourishing of work on the history of international political thought but the bulk of this has focused on the early modern and modern periods leaving continuities with the medieval world largely ignored The medieval is often used as a synonym for the barbaric and obsolete yet this picture does not match that found in relevant work in the history of political thought The book thus offers a chance to correct this misconception of the evolution of Western international thought highlighting that the history of international thought should be regarded as an important dimension of thinking about the international and one that should not be consigned to history departments Questions addressed include what is the medieval influence on modern conception of rights law and community how have medieval ideas shaped modern conceptions of self determination consent and legitimacy are there medieval answers to modern questions is the modern world still working its way through the Middle Ages to what extent is the modern outlook genuinely secular is there a theology of international relations what are the implications of continuity for predominant historical narrative of the emergence and expansion of international society Medieval and modern are certainly different however this collection of essays proceeds from the conviction that the modern world was not built on a new plot with new building materials Instead it was constructed out of the rubble that is the raw materials of the Middle Ages This will be of great interest to students and scholars of IR IR theory and political theory

International Relations Eric Shiraev, Vladislav M. Zubok, 2015-10-02 Using a guiding framework of Ideas Arguments

International Relations and Heritage Rodrigo Christofoletti, Maria Leonor Botelho, 2021-08-30 Patchwork in times of plurality encompasses the multitude of actions as a revealing symbol of ethos actors organisms and manifestations of preservation and dialogue frontiers This plural metaphor almost like a patchwork aggregates and yet segregates conforms but disfigures and boosts the meanings which represent this new field that international relations have been recently crossing Just like the mirror metaphor that reflects everything to all and sometimes intervenes in distortions the patchwork analogy allowed the book to take responsibility for the disclosure of preservation actions on a global scale The book has a pioneering role insofar since it is the only publication with such characteristics concerns and coverage The work studies the interconnection between cultural properties and international relations by understanding them as a mosaic before the bridges that intertwine people and borders The main goal of this work is to illustrate in what way intergovernmental relations have been privileging heritage and culture as acting fields for its broader needs Therefore the book addresses topics related to the international agenda focusing on its less debated themes Two examples of these undervalued matters are the link between actors preservationist actions and the universe of world cultural heritage The book also pursues a critical dialogue between interdisciplinary fields that narrow heritage frontiers in search to contribute with a spectrum of academic perspectives and inter national study cases To serve distinct economic social or political purposes institutionalized heritage embodied by different values becomes instrumentalized in a top down direction In a development frame when we perceive culture as indispensable to human life the past is transformed into exchange currency Through the creation of alternative fields of action usually in a bottom up logic the present builds new heritage connections Digital heritage s preservation dissemination and appreciation have been representing these same nets

Transplanting International Courts Karen J. Alter, Laurence R. Helfer, 2017 The Andean Pact was founded in 1969 to build a common market in South America Andean leaders copied the institutional and treaty design of the European Community and in the 1970s member states decided to add a tribunal again turning to the

European Community as its model Since its first ruling in 1987 the Andean Tribunal of Justice has exercised authority over the countries which are members of the Andean Community Bolivia Colombia Ecuador and Peru formerly also Venezuela It is now the third most active international court in the world used by governments and private actors to protect their rights and interests in the region This book investigates how a region with weak legal institutions developed an effective international rule of law why the Tribunal was able to induce widespread respect for Andean intellectual property rules but not other areas governed by regional integration rules and what the Tribunal's experience means for comparable international courts It also assesses the Andean experience in order to reconsider the European Community system exploring why the law and politics of integration in Europe and the Andes followed different trajectories It finally provides a detailed analysis of the key factors associated with effective supranational adjudication This book collects together previously published material by two leading interdisciplinary scholars of international law and politics and is enhanced by three original chapters further reflecting on the Andean legal order
