Human Dimensions of Global Environmental Change National Research Council, Division of Behavioral and Social Sciences and Education, Policy Division, Board on Environmental Change and Society, Committee on the Human Dimensions of Global Change and Committee on Global Change Research, 1999-08-29 This publication is extracted from a much larger report **Global Environmental Change Research Pathways for the Next Decade** which addresses the full range of the scientific issues concerning global environmental change and offers guidance to the scientific effort on these issues in the United States This volume consists of Chapter 7 of that report **Human Dimensions of Global Environmental Change** which was written for the report by the Committee on the Human Dimensions of Global Change of the National Research Council NRC It provides findings and conclusions on the key scientific questions in human

dimensions research the lessons that have been learned over the past decade and the research imperatives for global change research funded from the United States      **Property Rights and Sustainability** David Grinlinton, Prue Taylor, 2011-04-11

This book offers a unique and thought provoking exploration of how property concepts can be substantially reshaped to meet ecological challenges It takes the discussion beyond its traditional parameters and offers new insights into conceptualizing and justifying property systems in an age of ecological consequences      **Global Environmental Change** Committee on

Global Change Research, Policy Division, Policy and Global Affairs, National Research Council, 1999-09-28 How can we understand and rise to the environmental challenges of global change One clear answer is to understand the science of global change not solely in terms of the processes that control changes in climate and the composition of the atmosphere but in how ecosystems and human society interact with these changes In the last two decades of the twentieth century a number of such research efforts supported by computer and satellite technology have been launched Yet many opportunities for integration remain unexploited and many fundamental questions remain about the earth's capacity to support a growing human population This volume encourages a renewed commitment to understanding global change and sets a direction for research in the decade ahead Through case studies the book explores what can be learned from the lessons of the past 20 years and what are the outstanding scientific questions Highlights include Research imperatives and strategies for investigators in the areas of atmospheric chemistry climate ecosystem studies and human dimensions of global change The context of climate change including lessons to be gleaned from paleoclimatology Human responses to and forcing of projected global change This book offers a comprehensive overview of global change research to date and provides a framework for answering urgent questions      **A Fishery Manager's Guidebook** Kevern L. Cochrane, Serge M.

Garcia, 2009-06-15 Co published with the Food and Agriculture Organization of the United Nations Fisheries management is the process that has evolved to try to ensure that fisheries operate in a manner that provides the immediate benefits in a sustainable manner The widely accepted goal is that the full range of benefits should not only be available for this generation but for generations to come Fisheries management has been successful in some cases but there have also been many many cases of failure This volume is intended to contribute to improving this unsatisfactory state by addressing the widespread need for information and guidance on the broad and often complex task of fisheries management It is an updated and expanded edition of the first version of A fishery manager's guidebook which was published as a FAO Fisheries Technical Paper in 2002 The major part of this new edition is divided into five parts intended to cover the range of concerns tools and techniques essential to the modern fisheries manager whether that manager is an individual or a formal or informal group Following the Introduction Part I examines the primary dimensions of fisheries biological ecological social and economic Part II looks at the legal and institutional characteristics of fisheries Part III explores the tools that fishery managers have to achieve the objectives expected from a fishery Part IV discusses the role of scientific information of indicators and reference

points Part V moves into implementation of fisheries management and includes a chapter on special considerations in small scale fisheries This landmark publication is aimed at fishery managers and scientists All libraries in research establishments and universities where fisheries and aquatic sciences are studied and taught will need copies of this important volume Fisheries around the world make essential contributions to human well being including the provision of basic food supplies employment recreational opportunities foreign currency and others providing benefits to hundreds of millions of people Despite these benefits our record of managing fisheries so that the benefits can be sustained has been poor at best and most fisheries around the world are experiencing serious ecological social or economic problems and usually all three Today there is global concern about the state of fishery resources and aquatic ecosystems their resilience to future stresses such as climate change and their ability to continue to provide benefits Linking Social and Ecological Systems Fikret Berkes, Carl Folke, Johan Colding, 2000-04-13 It is usually the case that scientists examine either ecological systems or social systems yet the need for an interdisciplinary approach to the problems of environmental management and sustainable development is becoming increasingly obvious Developed under the auspices of the Beijer Institute in Stockholm this new book analyses social and ecological linkages in selected ecosystems using an international and interdisciplinary case study approach The chapters provide detailed information on a variety of management practices for dealing with environmental change Taken as a whole the book will contribute to the greater understanding of essential social responses to changes in ecosystems including the generation accumulation and transmission of ecological knowledge structure and dynamics of institutions and the cultural values underlying these responses A set of new or rediscovered principles for sustainable ecosystem management is also presented Linking Social and Ecological Systems will be of value to natural and social scientists interested in sustainability *An Introduction to Ecological Economics* Robert Costanza, John H Cumberland, Herman Daly, Robert Goodland, Richard B Norgaard, Ida Kubiszewski, Carol Franco, 2014-12-02 From Empty World Economics to Full World Economics Ecological economics explores new ways of thinking about how we manage our lives and our planet to achieve a sustainable equitable and prosperous future Ecological economics extends and integrates the study and management of both nature s household and humankind s household **An Introduction to A Fishery Manager's Guidebook** K. L. Cochrane, 2002-01-01 This publication was prepared to promote and to provide support in the implementation of the Code of Conduct for Responsible Fisheries especially Article 7 Fisheries Management As such it also supplements the FAO Technical Guidelines for Responsible Fisheries NO 4 Fisheries management It is intended primarily for the practising fishery manager and decision maker with particular emphasis on developing countries although it is hoped that the volume will also be of interest to managers in developed countries Politics, Property and Production in the West African Sahel Tor Arve Benjaminsen, Christian Lund, 2001 Through a number of case studies from the West African Sahel this book links and explores natural resources management from the perspectives of politics property and production

**Sustaining Liberal Democracy** M. Wissenburg, J. Barry, 2001-04-19 Assuming that liberalism liberal democracy and the free market are here to stay this book asks how sustainability can be interpreted in ways that respect liberal democratic values and institutions Among the problems addressed are the compatibility of liberal proceduralism with substantive green ideals the existence and potential of eco friendly principles and ideas in classical liberal political theory the role of rights and duties and of democracy and deliberation and the greening potential of modern environmental focused practices in liberal democracies

**Chilika** Soumen Ray, 2021-11-17 From Chilika India's largest coastal lake the echoes of poetry the reflections of festive lamps its ever present turmoil and biodiverse bounty have come together to portray livelihoods and lives half full and half empty After a broad conceptual framework about fish fishery and fishing livelihoods this book has explicitly focused on the lake's ecosystem in Odisha and sustainability in fishing communities The voices of the fishers have lent credence to the socio cultural belief systems right of commons and disputes over conservation at individual and community levels The volatility over the common user rights is underscored by lack of protection to the locals absence of guiding principles and powerful usurpers The disruption of livelihoods through insufficient economic support is underlined by the lack of viable equitable and regulated credit structures in the region Issues of mechanization ecological hazards adverse impact of climate change and environmental degradation are explained through their own bearing on bionomic and traditional livelihood disruptions and in situ footprints on common property resources In the final countdown the sustained coexistence of Chilika lake and its varied community is narrated through an integrated socio economic lens that accommodates extant challenges into its field of vision This book is co published with Aakar Books New Delhi Taylor Francis does not sell or distribute the print versions of this book in India Pakistan Nepal Bhutan Bangladesh and Sri Lanka

*Management Challenges for Africa in the Twenty-First Century* Felix M. Edoho, 2000-12-30 Edoho and his contributors examine the management challenges facing African governments and businesses on the eve of a new millennium As the authors make clear Africa's future is defined by how Africa does in the 21st century For Africa a major challenge is how to effectively and efficiently manage its vast wealth Africa is not poor because it is poor it is poor because it cannot manage its development process The shortages of managerial knowledge skills and talents are pervasive Consequently the region lacks the ability to organize production and run operations effectively and efficiently The task of developing managerial manpower in Africa is not only imperative it is urgent After outlining theoretical and applied perspectives on management the volume examines the public and private sector planning and management It then explores the globalization of management technology provides case studies of African management dilemmas looks at management ethics and morality and concludes with an analysis of the role of management in African national development As the authors make clear abundant resources will not of themselves usher in an African economic renaissance Africa needs skills to identify and analyze its resources to undertake investment and to establish and run all kinds of organizations Until Africa develops its indigenous managerial

talents development will continue to be elusive and the process traumatizing An important resource for scholars students and policy makers involved with African economic development Promise, Trust and Evolution Rucha Gbate,Narpat Jodha,Pranab Mukhopadhyay,2008-01-10 From land management to water rights this volume looks at the current status of Common Property Resources or CPRs in South Asia Developed countries have managed to establish well defined property rights over numerous resources and in some instances extended non exclusionary rights over privately owned resources over an extended period of time In the developing world however the share of community property is extensive either as a response to an expanding market or because the exposure to markets is still in its nascent stage This coupled with the demands of globalization has led to the co existence of both community ownership of resources as well as an evolving private property rights market This tension between public versus private ownership rights is particularly relevant in the developing countries of South Asia not only because of its shared history but also because of its resources frequently cross national boundaries This book tells the story of CPRs and the commons in a rapidly changing South Asia Including contributions from those working with natural resources in Bhutan India Nepal Pakistan and Sri Lanka the papers discuss issues such as equity in distribution efficiency and productivity of resources sustainability of resources and institutional transition and governance

**Biodiversity Conservation and Poverty Alleviation** Dilys Roe,Joanna Elliott,Chris Sandbrook,Matt Walpole,2012-11-16 Biodiversity conservation and poverty alleviation are both important societal goals demanding increasing international attention While they may seem to be unrelated the international policy frameworks that guide action to address them make an explicit assumption that conserving biodiversity will help to tackle global poverty Part of the Conservation Science and Practice Series published with the Zoological Society of London this book explores the validity of that assumption The book addresses a number of critical questions Which aspects of biodiversity are of value to the poor Does the relationship between biodiversity and poverty differ according to particular ecological conditions How do different conservation interventions vary in their poverty impacts How do distributional and institutional issues affect the poverty impacts of interventions How do broader issues such as climate change and the global economic system affect the biodiversity poverty relationship at different scales This volume will be of interest to policy makers practitioners and researchers concerned with understanding the potential and limitations of integrated approaches to biodiversity conservation and poverty alleviation **Institutions, Economic Performance and Sustainable Development** Biman C.

Prasad,Clement Allan Tisdell,2006 Fiji has distinct institutional features that make it an ideal case for examining and discussing the consequences of institutional arrangements particularly the nature of property rights for national economic performance development prospects and the state of the environment which in turn reflects a nation s ability to achieve sustainable development Furthermore the nature of institutional arrangements in Fiji can be used to illustrate aspects of both the new and the old institutional economics Apart from the fact that Fiji provides considerable scope for the exploration

of institutional economics and its applications Fiji is a comparatively important island nation in the south west Pacific that is an important member of the Pacific Island Forum grouping of 14 island nations The recent development of Fiji has been much influenced by its social history particularly by its institutional structures established or codified during British colonial rule Its present racial composition is largely a product of British colonisation of Indians brought to Fiji by the British to produce sugar cane as a contribution to the economic development of the former British Empire In many respects the type of global imperialism that was well established during the nineteenth century was a forerunner to modern economic globalisation which involves a mixture of free trading blocs and multilateralism The current population mixture of Fiji consisting of about equal numbers of Indian Fijians and Indigenous Fijians has its roots in Fiji s colonial history Furthermore the codified systems of property rights which largely excludes Indian Fijians from the ownership of land was established by the British It has been a major source of ethnic tension and of social and political conflict in Fiji We show that this system of property rights has had important negative consequences for economic growth in Fiji for the economic performance of its industries and for the conservation of its natural resources natural resources which may not be equitable and which also does not appear to be efficient administratively This adds to social and political tension in Fiji

*The Knowledge Base for Fisheries Management* Lorenzo Motos, Douglas Wilson, 2006-08-18 Fisheries are in a state of crisis throughout the world While there has been some success truly effective fisheries management seems beyond our grasp The knowledge needed for proper management contains a broad array of facts and connections from statistical stock assessments to the information that allows government agencies to track compliance with rules and beyond This book describes the state of the art knowledge about fishery systems Seldom seen in a scientific publication regarding fisheries science this book presents a multidisciplinary perspective of fisheries management Leading fisheries scholars with backgrounds in biology ecology economics and sociology ask how management institutions can learn and put their lessons to use The Knowledge Base for Fisheries Management offers a unique overview of the world of fisheries management and provides the background to draw conclusions of what is needed to improve management Covering a wide range of regimes case studies and professional perspectives this publication will be an obliged reference to anyone involved on fisheries management assessment policy making or fisheries development all over the world The only book on the market that analyzes fisheries in a biological sociological and economic way Fills a gap focusing not only on the production of knowledge for fisheries management but also on how it is used in all steps of the management system and the decision making processes

Focuses on the hot topic scientific knowledge and society science based policies Documents disseminated research from many different management systems both European and world wide Living with Environmental Change W. Neil Adger,P. Mick Kelly,Nguyen Huu Ninh,2012-12-06 Vietnam and the neighbouring countries of Southeast Asia face diverse challenges created by the rapid evolution of their social economic and environmental systems and resources Taking a multidisciplinary perspective this book provides a comprehensive assessment of the Vietnamese situation identifying the factors shaping social vulnerability and resilience to environmental change and considering prospects for sustainable development
