Propositions And Attitudes:

Propositions and Attitudes Nathan U. Salmon, Scott Soames, 1988 This collection of readings investigates many different philosophical issues concerning the nature of propositions and the ways they have been regarded through the years The book includes articles by Bertrand Russell Gottlob Frege Alonzo Church David Kaplan John Perry Saul Kripke Hilary Putnam Mark Richard Scott Soames and Nathan Salmon **Propositional Attitudes** Mark Richard, 1990-02-23 Beginning with a spirited defense of the view that propositions are structured and that propositional structure is psychologically real the author develops a subtle view of propositions and attitude ascription **The Routledge Handbook of Propositions** Chris Tillman, Adam Murray, 2022-09-30 Propositions are routinely invoked by philosophers linguists logicians and other theorists engaged in the study of meaning communication and the mind To investigate the nature of propositions is to investigate the very nature of our connection to each other and to the world around us As one of the only volumes of its kind The Routledge Handbook of Propositions provides a comprehensive overview of the philosophy of propositions from both historical and contemporary perspectives Comprising 33 original chapters by an international team of scholars the volume addresses both traditional and emerging questions concerning the nature of propositions and our capacity to engage with them in thought and in communication The chapters are clearly organized into the following three sections I Foundational Issues in the Theory of Propositions II Historical Theories of Propositions III Contemporary Theories of Propositions Essential reading for philosophers of language and mind and for those working in neighboring areas The Routledge Handbook of Propositions is suitable for upper level undergraduate study as well as graduate and professional research **Expressing Our Attitudes** Mark Andrew Schroeder, 2015 Expressing Our Attitudes pulls together over a decade of work by Mark Schroeder one of the leading figures in contemporary metaethics He weaves treatments of propositions truth and the attitudes together within an expressivist framework Two of the essays are new and the introduction provides a map to reading the volume as a unified argument New Thinking about Propositions Jeffrey C. King, Scott Soames, Jeff Speaks, 2014 Philosophy science and common sense all refer to propositions things we believe and say and things which are true or false But there is no consensus on what sorts of things these entities are Jeffrey C King Scott Soames and Jeff Speaks argue that commitment to propositions is indispensable and each defend their own views on the debate The Elements of Arguments: An Introduction to Critical Thinking and Logic Philip Turetzky, 2019-04-11 The Elements of Arguments introduces such central critical thinking topics as informal fallacies the difference between validity and truth basic formal propositional logic and how to extract arguments from texts Turetzky aims to prevent common confusions by clearly explaining a number of important distinctions including propositions vs propositional attitudes propositions vs states of affairs and logic vs rhetoric vs psychology Exercises are provided throughout including numerous informal arguments that can be assessed using the skills and strategies presented within the text **About Oneself** Manuel García-Carpintero, Stephan Torre, 2016 This volume addresses the nature of first

personal or de se thought Many have held that first person thought motivates a revision of traditional accounts of content and how it is accessed but this raises puzzling questions about how we are able to communicate such thoughts It is these questions that the volume seeks to answer **Group Agency** Christian List, Philip Pettit, 2011-04-07 Are companies churches and states genuine agents Or are they just collections of individual agents that give a misleading impression of unity This question is important since the answer dictates how we should go about explaining the behaviour of these entities and whether we should treat them as responsible and accountable in the manner of individuals Group Agency offers a new approach to that question and is relevant therefore in a range of fields from philosophy to law politics and the social sciences Christian List and Philip Pettit take the line that there really are group or corporate agents over and above the individual agents who compose them and that a proper social science and a proper approach to law morality and politics have to take account of this fact Unlike some earlier defences of group agency their account is entirely unmysterious in character and despite not being technically difficult is grounded in cutting edge work in social choice theory economics and philosophy

Reference to Abstract Objects in Discourse Nicholas Asher, 2012-12-06 Reference to Abstract Objects in Discourse presents a novel framework and analysis of the ways we refer to abstract objects in natural language discourse The book begins with a typology of abstract objects and related entities like eventualities After an introduction to bottom up compositional discourse representation theory DRT and to previous work on abstract objects in DRT notably work on the semantics of the attitudes the book turns to a semantic analysis of eventuality and abstract object denoting nominals in English The book then substantially revises and extends the dynamic semantic framework of DRT to develop an analysis of anaphoric reference to abstract objects and eventualities that exploits discourse structure and the discourse relations that obtain between elements of the structure A dynamic semantically based theory of discourse structure SDRT is proposed along with many illustrative examples Two further chapters then provide the analysis of anaphoric reference to propositions VP ellipsis The abstract entity anaphoric antecedents are elements of the discourse structures that SDRT develops The final chapter discusses some logical and philosophical difficulties for a semantic analysis of reference to abstract objects For semanticists philosophers of language computer scientists interested in natural language applications and discourse philosophical logicians graduate students in linguistics philosophy cognitive science and artificial intelligence Vagueness and Thought Andrew Bacon, 2018 Vagueness is the study of concepts that admit borderline cases the property of being bald is vague because there are people who are neither definitely bald nor definitely not bald The epistemology of vagueness concerns the sorts of attitudes we ought to have towards propositions we know to be borderline Is it possible to discover whether a borderline bald man is bald Could two people with access to the same facts reasonably disagree about whether he is bald Does it matter when making practical decisions whether he is bald By drawing on such considerations Andrew Bacon develops a novel theory of vagueness in which vagueness is fundamentally a property of propositions and is explicated in

terms of its role in thought On this theory language plays little role in explaining the central puzzles of vagueness Part I of the book outlines some of the central questions regarding the logic and epistemology of vagueness and criticizes some extant approaches to them Part II concerns issues in the epistemology of vagueness touching on the ramifications of vague thoughts on the study of evidence ignorance desire probability theory and decision theory By examining the effects of vague information on one's beliefs about the precise positive theory of vagueness is proposed Part III concerns the logic of vagueness including the interaction between vagueness and modality vague identity and the paradoxes of higher order vagueness Bacon suggests that some familiar philosophical notions including the concept of a fundamental proposition a possible world and a precisification need to be revised

Historical Dictionary of Bertrand Russell's Philosophy

Rosalind Carey, John Ongley, 2009-03-02 Academic philosopher logician public intellectual educator political activist and freethinker Bertrand Russell was and remains a colossus No other single philosopher in the last 200 years can be said to have created so much and influenced so many His *Principia Mathematica* written with A N Whitehead ranks as one of the greatest books on logic since Aristotle His philosophical work on language meaning logic mind and metaphysics formed the basis of 20th century philosophy Russell was active in numerous political movements of liberation and peace and his popular writings including the best selling *History of Western Philosophy* won the Nobel prize in literature in 1950 *Historical Dictionary of Bertrand Russell's Philosophy* offers a comprehensive current guide to the many facets of Russell's work Through its chronology introductory essay bibliography and hundreds of cross referenced dictionary entries on concepts people works and technical terms Russell's impact on philosophy and related fields is made accessible to the reader in this must have reference

Rationality and Belief Ralph Wedgwood, 2023 This book gives a general theory of rational belief Although it can be read by itself is a sequel to the author's previous book *The Value of Rationality* Oxford 2017 It takes the general conception of rationality that was defended in that earlier book and combines it with an account of the varieties of belief and of what it is for these beliefs to count as correct to develop an account of what it is for beliefs to count as rational According to this account rationality comes in degrees the degree to which one's beliefs counts as rational is determined by their distance from a corresponding probability function where this distance is measured by those beliefs expected degree of incorrectness according to the probability function the account also involves an explanation of what determines exactly which probability function plays this role in each case and of why this probability function should play this role In developing and defending this account new light is shed on several central epistemological issues These issues include the distinction between propositional and doxastic justification the debates between internalism and externalism and between foundationalism and coherentism the significance or lack of it of the notion of evidence the relationship between credences full belief inference and suspension of judgment the nature of the kind of possibility that is presupposed by the relevant sort of probability and whether rationality is diachronic so that the beliefs that it is rational for us to have now depend in part on

the beliefs that we held in the past Finally some suggestions are made about how this theory bears on a range of further topics including the defeasibility of inference scepticism and the analysis of knowledge

The Act and Object of Judgment Brian Ball, Christoph Schuringa, 2019-03-14 This book presents 12 original essays on historical and contemporary philosophical discussions of judgment The central issues explored in this volume can be separated into two groups namely those concerning the act and object of judgment What kind of act is judgment How is it related to a range of other mental acts states and dispositions Where and how does assertive force enter in Is there a distinct category of negative judgments or are these simply judgments whose objects are negative Concerning the object of judgment How many objects are there of a given judgment One as on the dual relation theory of Frege and Moore Or many as in Russell's later multiple relation theory If there is a single object is it a proposition And if so is it a force neutral abstract entity that might equally figure as the object of a range of intentional attitudes Or is it somehow constitutively tied to the act itself These and related questions are approached from a variety of historical and contemporary perspectives This book sheds new light on current controversies by drawing on the details of the distinct intellectual contexts in which previous philosophers positions about the nature of judgment were formulated In turn new directions in present day research promise to raise novel interpretive prospects and challenges in the history of philosophy

Studies in Epistemology Peter A. French, Theodore Edward Uehling, Howard K. Wettstein, 1980 Studies in Epistemology was first published in 1980 Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original University of Minnesota Press editions This is Volume V in the series Midwest Studies in Philosophy In 1979 the University of Minnesota Press assumed publication of the annual Midwest Studies in Philosophy previously published by the University of Minnesota Morris At that time the young series had already received acclaim from philosophers Alan Donagan called the Studies a significant and up to date forum of discussion on topics that matter to all serious philosophers and according to W V Quine the Studies have maintained an unusually high standard

Unstructured Content, 2025-01-06 The original essays in this volume present cutting edge research on unstructured theories of propositional content Unstructured theories have traditionally played a central role in linguistics especially formal semantics and both the philosophy of language and philosophy of mind The volume explores a wide range of themes related to unstructured content such as the continued controversy over whether unstructured theories individuate contents too coarsely compared to other theories of propositional content and applications of unstructured theories to various topics Topics to which unstructured theories are applied include rationality epistemic commitment semantic expressivism relevance and attitude ascriptions Theories of unstructured content discussed include traditional theories according to which propositions are sets of worlds as well as contemporary theories such as truthmaker semantics The

volume contains contributions from different theoretical perspectives including perspectives sympathetic to unstructured theories of content and perspectives that are skeptical as well as perspectives from different methodological backgrounds with philosophy logic and linguistics all represented With contributions from leading scholars in philosophy and linguistics this volume will be required reading for anyone working on the nature of propositional content It will also be of interest to those working on related issues in logic metaphysics and the philosophy of mind

Four-Dimensionalism Theodore Sider, 2001-10-25 Four Dimensionalism defends the thesis that the material world is composed of temporal as well as spatial parts This defense includes a novel account of persistence over time new arguments in favour of the four dimensional ontology and responses to the challenges four dimensionalism faces Theodore Sider pays particular attention to the philosophy of time including a strong series of arguments against presentism the thesis that only the present is real Arguments offered in favour of four dimensionalism include novel arguments based on time travel the debate between spacetime substantivalists and relationalists and vagueness Also included is a comprehensive discussion of the paradoxes of coinciding material objects and a novel resolution of those paradoxes based on temporal counterpart theory In conclusion Sider replies to prominent objections to four dimensionalism including discussion of the problem of the rotating homogenous disk Four Dimensionalism is an original and highly readable study of the metaphysics of time and identity

Legislative Authority and Interpretation in the European Union Martijn van den Brink, 2024-07-12 Although legislation has in the past decades become the legal cornerstone of European integration the EU legislature remains systematically neglected in EU legal scholarship This book explores the virtues of the legislative process and the nature of legislative acts and asks how moving the legislature from the sidelines to the centre of legal analysis changes our understanding of the EU Court of Justice's role The first part of the book examines how the CJEU should exercise its authority relative to the legislature The author argues that as the legislature lends democratic legitimacy to EU law and is a better lawmaker than the judiciary that judicial deference to the legislature's choices is required in all but exceptional circumstances The second part of the book sets forth a theory of legislative interpretation that enables judicial officials to respect the wishes of the legislature This theory shows first that the legislature can aggregate the intentions of individual legislators into a coherent legislative intent and second how this legislative intent can be identified from the publicly available legislative material

Philosophy of Mind John Heil, 2019-08-29 The book is intended as a reader friendly introduction to issues in the philosophy of mind including mental physical causal interaction computational models of thought the relation minds bear to brains and assorted isms behaviorism dualism eliminativism emergentism functionalism materialism neutral monism and panpsychism The Fourth Edition reintroduces a chapter on Donald Davidson and a discussion of Non Cartesian Dualism along with a wholly new chapter on emergence and panpsychism A concluding chapter draws together material in earlier chapters and offers what the author regards as a plausible account of the mind's place in nature Suggested readings at the conclusion of each chapter have been

updated with a focus on accessible non technical material Key Features of the Fourth Edition Includes a new chapter Emergence and Panpsychism Chapter 13 reflecting growing interest in these areas Reintroduces and updates a chapter on Donald Davidson Radical Interpretation Chapter 8 which was excised from the previous edition Updates Descartes Legacy Chapter 3 to include a discussion of E J Lowe s arresting Non Cartesian Dualism also removed from the previous edition Includes a highly revised final chapter which draws together much of the previous material and sketches a plausible account of the mind s place in nature Updated Suggested Reading lists at the end of each chapter **Higher-Order Metaphysics**
