Rury,Shirley A. Hill,2015-04-24 This is the first comprehensive account of African American secondary education in the postwar era Drawing on quantitative datasets as well as oral history this compelling narrative examines how African Americans narrowed the racial gap in high school completion The authors explore regional variations in high school attendance across the United States and how intraracial factors affected attendance within racial groups They also examine the larger social historical context such as the national high school revolution the civil rights movement campaigns to expand schooling and urging youth to stay in school and Black migration northward Closing chapters focus on desegregation and the urban crisis of the 1960s and 1970s that accelerated White flight and funding problems for urban school systems The conclusion summarizes these developments and briefly looks at the period since 1980 when secondary attainment levels stopped advancing for Blacks and Whites alike **Book Highlights** A comprehensive history drawing on statistical analysis archival research and interviews with African Americans who attended school in the 1940s and 1950s Lessons from the past showing how parents and local communities played the most direct and dynamic role in the fight for access to education Today s major challenges including the growth of inner city poverty and changing family structures John L Rury is professor of education and by courtesy history at the University of Kansas Shirley A Hill is professor of sociology at the University of Kansas Based on prodigious research *The African American Struggle for Secondary Schooling* sets a new standard of excellence in social history and policy studies The authors evocatively recreate the passions of the civil rights movement and centrality of public schools in the ongoing quest for justice opportunity and freedom William J Reese Carl F Kaestle WARF Professor of Educational Policy Studies and History University of Wisconsin Madison This book is a rich and compelling addition to the literature on secondary education generally and on secondary education for African Americans specifically It will set the standard for historical studies on American high schools for a long time to come Jeffrey Mirel David L Angus Collegiate Chair of Education Professor of History University of Michigan *The African American Struggle for Secondary Schooling* fills a major gap in the history of African American educational history This book will be on

Reforming Jim Crow Kimberley Johnson, 2010-04-16 Historians of the Civil Rights era typically treat the key events of the 1950s Brown v Board of Education sit ins bus boycotts and marches as a revolutionary social upheaval that upended a rigid caste system While the 1950s was a watershed era in Southern and civil rights history the tendency has been to paint the preceding Jim Crow era as a brutal system that featured none of the progressive reform impulses so apparent at the federal level and in the North As Kimberley Johnson shows in this pathbreaking reappraisal of the Jim Crow era this argument is too simplistic and is true to neither the 1950s nor the long era of Jim Crow that finally solidified in 1910 Focusing on the political development of the South between 1910 and 1954 Johnson considers the genuine efforts by white and black progressives to reform the system without destroying it These reformers assumed that the system was there to stay and therefore felt that they had to work within it in order to modernize the South Consequently white progressives tried to install a better meaning more equitable separate but equal system and elite black reformers focused on ameliorative rather than confrontational solutions that would improve the lives of African Americans Johnson concentrates on local and state reform efforts throughout the South in areas like schooling housing and labor Many of the reforms made a difference but they had the ironic impact of generating more demand for social change among blacks She is able to show how demands slowly rose over time and how the system laid the seeds of its own destruction The reformers commitment to a system that was less unequal albeit not truly equal and more like the North led to significant policy changes over time As Johnson powerfully demonstrates our lack of knowledge about the cumulative policy transformations resulting from the Jim Crow reform impulse impoverishes our understanding of the Civil Rights revolution Reforming Jim Crow rectifies that

Reading, Writing, and Race Davison M. Douglas, 2012-01-01 Using Charlotte North Carolina as a case study of the dynamics of racial change in the moderate South Davison Douglas analyzes the desegregation of the city s public schools from the Supreme Court s 1954 Brown v Board of Education decision through the early 1970s when the city embarked upon the most ambitious school busing plan in the nation In charting the path of racial change Douglas considers the relative efficacy of the black community s use of public demonstrations and litigation to force desegregation He also evaluates the role of the city s white business community which was concerned with preserving Charlotte s image as a racially moderate city in facilitating racial gains Charlotte s white leadership anxious to avoid economically damaging racial conflict engaged in

early but decidedly token integration in the late 1950s and early 1960s in response to the black community's public protest and litigation efforts. The insistence in the late 1960s on widespread busing, however, posed integration demands of an entirely different magnitude. As Douglas shows, the city's white leaders initially resisted the call for busing but eventually relented because they recognized the importance of a stable school system to the city's continued prosperity. *Statistics of Land-grant Colleges and Universities* United States.
