Christian Church is recognized for its distinctive amalgamation of religious activities which include faith healing prophecy and significant pilgrimages particularly the Easter pilgrimage to Moria Despite the church s emphasis on the Christian identity within its faith healing practices some observers interpret various rituals and beliefs as syncretic Consequently these readings have led to allegations that the church integrates aspects of African traditional medicine and witchcraft into its rituals This book utilizes the church as a case study to examine healing faith practices and rituals thereof within the larger framework and context of African Independent Churches This theology is used to help place the faith of patients and the importance of God s role as healer ahead of the healing rituals Its unique theme driven interconnected chapters contain discussions around various practices encompassing purification and protection rituals as well as therapeutic worship Consequently scholars in religious studies theology anthropology and history will find this book an important resource in understanding the role of healing rituals among African Independent Churches [Supervillain's Strip Occultism](#) S

The Möbius Strip Jonathan D. Amith,2005-10-10 The Möbius Strip explores the history political economy and culture of space in central Guerrero Mexico during the colonial period This study is significant for two reasons First space comprises a sphere of contention that affects all levels of society from the individual and his or her household to the nation state and its mechanisms for control and coercion Second colonialism offers a particularly unique situation for it invariably involves a determined effort on the part of an invading society to redefine politico administrative units to redirect the flow of commodities and cash and ultimately to foster and construct new patterns of allegiance and identity to communities regions and country Thus spatial politics comprehends the complex interaction of institutional domination and individual agency The complexity of the diachronic transformation of space in central Guerrero is illustrated through an analysis of land tenure migration and commercial exchange three salient

and contested aspects of hispanic conquest The M bius Strip therefore addresses issues important to social theory and to the understanding of the processes affecting the colonialization of non Western societies
