Weidenbaum,2012-12-06 The health of American manufacturing has been a cause of real concern during the 1980s Foreign competition hostile takeovers new technologies and a host of other factors have caused dramatic changes in this key sector of the American economy Many observers of this process of change are singing the rust belt blues consigning U S manufacturing greatness to the history books In April 1986 the Center for the Study of American Business at Washington University issued a study by its director Dr Murray L Weidenbaum which challenged this perception of American manufacturing's future The report entitled Learning to Compete pointed to a variety of positive developments resulting from the adversity faced by American firms in the first half of the decade producers had improved quality and productivity reduced costs and increased emphasis on R D In November 1988 as a logical extension of this research the Center held a conference on American Manufacturing in the 1990s Focusing on American responses to the changing global competitive environment this conference brought together the practical experience of business professionals and the more detached views of academic and media experts In a day and a half of meetings encompassing six separate sessions a luncheon address and an after dinner debate conference participants assembled an extensive profile on the state of U S      *Mystery Fanfare* Michael L. Junker, 1999-09-01 As early as the first millennium A D the Philippine archipelago formed the easternmost edge of a vast network of Chinese Southeast Asian Indian and Arab traders Items procured through maritime trade became key symbols of social prestige and political power for the Philippine chiefly elite *Raiding, Trading, and Feasting* presents the first comprehensive analysis of how participation in this trade related to broader changes in the political economy of these Philippine island societies By combining archaeological evidence with historical sources Laura Junker is able to offer a more nuanced examination of the nature and evolution of Philippine maritime trading chiefdoms Most importantly she demonstrates that it is the dynamic interplay between investment in the maritime luxury goods trade and other evolving aspects of local political economies rather than foreign contacts that led to the cyclical coalescence of larger and more complex chiefdoms at various times in Philippine history A broad spectrum of

historical and ethnographic sources ranging from tenth century Chinese tributary trade records to turn of the century accounts of chiefly feasts of merit highlights both the diversity and commonality in evolving chiefly economic strategies within the larger political landscape of the archipelago The political ascendance of individual polities the emergence of more complex forms of social ranking and long term changes in chiefly economies are materially documented through a synthesis of archaeological research at sites dating from the Metal Age late first millennium B C to the colonial period The author draws on her archaeological fieldwork in the Tanjay River basin to investigate the long term dynamics of chiefly political economy in a single region Reaching beyond the Philippine archipelago this study contributes to the larger anthropological debate concerning ecological and cultural factors that shape political economy in chiefdoms and early states It attempts to address the question of why Philippine polities like early historic kingdoms elsewhere in Southeast Asia have a segmentary political structure in which political leaders are dependent on prestige goods exchanges personal charisma and ritual pageantry to maintain highly personalized power bases *Raiding Trading and Feasting* is a volume of impressive scholarship and substantial scope unmatched in the anthropological and historical literature It will be welcomed by Pacific and Asian historians and anthropologists and those interested in the theoretical issues of chiefdoms **Supernatural Literature of**

covered in Page's ambitious study permits him to explore an impressive array of topics that include the role of the Romantic era in the molding of scientific and cultural perspectives the engagement of William Wordsworth and Percy Shelley with questions raised by contemporary science Mary Shelley's conflicted views on the unfolding prospects of modernity and how Victorian writers like Charles Kingsley Samuel Butler and W H Hudson responded to the implications of evolutionary theory Page concludes with the scientific romances of H G Wells to demonstrate how evolutionary fantasies reached the pinnacle of synthesis between evolutionary science and the imagination at the close of the century *What Do I Read Next?* ,1997
