Biswas, 1996 This book focuses on some strategic national and regional aspects of water in the regions of the Nile Basin ie Middle East and North Africa Water is one of the main development challenges facing the Nile countries Problems of frequent and prolonged drought and water quality in ground and surface waters are becoming very serious Water quality is being considered by some to be the most serious issue the country will have to address Comprehensive management of the regions water resources will increasingly require agreements at National and transnational levels An integrated approach for national and basin wide development could contribute significantly in dealing with the problems This book identifies technical solutions in a broad comprehensive framework which may contribute to an environmentally sustainable development benefitting all the Nile countries

Review of Integrated Approaches to River Basin Planning , Development, and Management , Planning and Managing Water Resources at the River-basin Level François Molle, 2006 The concept of a river basin as a management or planning unit has gone through several stages and is in a state of flux *Implementing Integrated River Basin Management* François Molle, Thai Hoanh Chu, 2009 The report focuses on the establishment of the Red River Basin Organization RRBO in Vietnam but expands its analysis to the wider transformations of the water sector that impinge on the formation and effectiveness of this organization A few reflections on the policy process are drawn from this analysis albeit in a tentative form given the relatively limited period of time considered here The report shows that the promotion of IWRM icons such as RBOs by donors has been quite disconnected from the existing institutional framework However the establishment of RBOs might eventually strengthen a better separation of operation and regulation roles Institutional change is shown to result from the interaction between endogenous processes and external pressures in ways that are barely predictable *River Basin Planning for Water Quality Management in Massachusetts* John R.
