Road To Revolution A Century Of Russian Radicalism:

Road to Revolution Avrahm Yarmolinsky, 1962 **Road to Revolution** Avrahm Yarmolinsky, 2014-07-14 This book traces the history of revolutionary movements in nineteenth century Russia ending with the great famine of 1891-92 by which time Marxism was already in the ascendant. Originally published in 1986, The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905. **The Enduring Enigma of Lev Tikhomirov** Glenn Cronin, 2025-10-15 The *Enduring Enigma of Lev Tikhomirov* presents the Western reader with the first comprehensive study of the life and ideas of a revolutionist turned monarchist, one of the most intriguing and neglected thinkers in Russia in the late imperial period. As a young man, Tikhomirov was an ardent revolutionary comrade among others of Vera Figner and Sofia Perovskaya, and he was four years imprisoned by the Tsarist police. He later became the chief theoretician of the People's Will revolutionary group that assassinated Tsar Alexander II in 1881, following which he fled Russia to avoid the gallows and continued revolutionary activity as an émigré in Geneva and Paris. Then came an abrupt reversion in his outlook. He petitioned Alexander III to return to Russia, received clemency in 1888, and afterward became a staunch defender of autocracy and the Orthodox faith. The *Enduring Enigma of Lev Tikhomirov* examines Tikhomirov's chief works, all of which came after his return to Russia. *Monarchical Statehood* (1905) deals with the nature of power and the theory of the State, recalling strongly the thought of Thomas Hobbes, most notably his *Leviathan* of 1651. *The Religious Philosophical Fundamentals of History* (1913-1918) is Tikhomirov's justification of Christian revelation and a warning against the rise of atheism, moral autonomy, and the perils inherent in the elevation of man to the place of God. Glenn Cronin's timely intellectual history looks in depth at Tikhomirov's exploration of the nature of good and evil and the rise of dark forces that led to the tragedy of 1917. *Russia in the Age of Modernisation and Revolution 1881 - 1917* H. Rogger, 2014-07-30 Hans Rogger's study of Russia under the last two Tsars takes as its starting point what the Russians themselves saw as the central issue confronting their nation: the relationship between state and society and its effects on politics, economics, and class in these critical years. **The Routledge Atlas of Russian History** Martin Gilbert, 2013-04-03 The complex and often turbulent history of Russia over the course of 2,000 years is brought to life in a series of 176 maps by one of the most prolific and successful historian authors today. This fourth edition of *The Routledge Atlas of Russian History* covers not only the wars and expansion of Russia but also a wealth of less conspicuous details of its history, from famine and anarchism to the growth of naval strength and the strengths of the river systems. From 800 BC to the fall of the Soviet Union, this indispensable guide to Russian history covers war and conflict from the triumph of the Goths between 200 and 400 BC to the defeat of Germany at

the end of the Second World War and the end of the Cold War politics from the rise of Moscow in the Middle Ages to revolution the fall of the monarchy and the collapse of communism industry economics and transport from the Trans Siberian Railway between 1891 and 1917 to the Virgin Lands Campaign and the growth of heavy industry society trade and culture from the growth of monasticism to peasant discontent Labour Camps and the geographical distribution of ethnic Russians Now bringing new material to view and including seven new maps this popular atlas will more than readily gain a place on the bookshelves of anyone interested in the history of Russia **A History of Russian Thought** William Leatherbarrow, Derek Offord, 2010-04-01 The history of ideas has played a central role in Russia's political and social history Understanding its intellectual tradition and the way the intelligentsia have shaped the nation is crucial to understanding the Russia of today This history examines important intellectual and cultural currents the Enlightenment nationalism nihilism and religious revival and key themes conceptions of the West and East the common people and attitudes to capitalism and natural science in Russian intellectual history Concentrating on the Golden Age of Russian thought in the mid nineteenth century the contributors also look back to its eighteenth century origins in the flowering of culture following the reign of Peter the Great and forward to the continuing vitality of Russia's classical intellectual tradition in the Soviet and post Soviet eras With brief biographical details of over fifty key thinkers and an extensive bibliography this book provides a fresh comprehensive overview of Russian intellectual history **From Revolution to War** Patrick J. Conge, 2010-05-25 In the history of international relations few events command as much attention as revolution and war Over the centuries revolutionary transformations have produced some of the most ruinous and bloody wars Nevertheless the breakdown of peace in time of revolution is poorly understood Patrick Conge offers a groundbreaking study of the relationship between war and revolution How can we best understand the effect of revolutionary transformations on the politics of war and peace Conge argues that it is only by bringing in first the organizational capacity of revolutionary regimes to extract resources and convert them into military strength and second the power of transformative ideas to transcend national boundaries and undermine the ability of opposing regimes to compromise that we are best able to understand the effect of revolution on the origins and persistence of war By incorporating such key elements this book provides a new more comprehensive explanation of the relationship between revolution war and peace Conditions that lead to and sustain wars in general are identified and placed in the light of revolutionary transformations Once the argument is presented historical case studies are used to test its plausibility Conge demonstrates the importance of the effect of revolutionary organization and ideas on the outcome of conflicts Political scientists historians sociologists and the general reader interested in the politics of war and peace in revolutionary times are given new perspectives on the relationship between revolution and war as well as on the implications of political organization for military power and the process of consolidation of new regimes Patrick J Conge is Assistant Professor of Political Science University of Arkansas **The Business of Martyrdom** Jeffrey W Lewis, 2012-04-15 The Business of Martyrdom is the only

comprehensive history of suicide bombing from its origins in Imperial Russia to the present day It makes use of a framework from the history and philosophy of technology to explain the diffusion and evolution of suicide bombing over the past several decades It is primarily a work of synthesis meant to reach a broad audience and endeavors to integrate as much of the recent scholarly literature as possible including reconciling explanatory mechanisms that seem to be at odds with one another In addition this book is able to draw on very recent changes in suicide bombing in the years 2008 2010 that allow it to have a slightly different perspective than earlier studies For the first time the global number of suicide attacks has declined significantly for three years in a row This book therefore has the advantage of addressing the phenomenon of suicide bombing as a bounded phenomenon with limits to its growth and diffusion To this point the impression that suicide bombers are the smartest bombs yet created has been widespread but confined to the area of metaphor Drawing well established ideas from the history of technology *The Business of Martyrdom* argues that the metaphor should be taken literally Suicide bombing is a technology that has been invented and re invented at different times in different areas but always for the same purpose resolving a mismatch in military capabilities between antagonists by utilizing the available cultural and human resources Over the past several years analysts have produced a large number of monographs and articles examining suicide bombing The best contributions in this new and growing literature have shed considerable light on the complexity of suicide bombing in practice particularly regarding the structure of the organizations that deploy suicide bombers and the relationships between these organizations and the recruits whom they utilize in their attacks Nevertheless nagging inconsistencies and questions remain These inconsistencies can be explained by examining suicide bombing as a technological system that integrates human beings cultures and devices and directs them toward specific ends Such an analysis requires that neither the individual bombers nor their sponsoring organizations be the basic unit of discussion Instead the bombers must be understood as components within a much larger system that has been shaped by a host of social cultural and operational constraints throughout its existence Integrating insights from the historical analysis of other technological systems with the recent literature specifically devoted to suicide bombing therefore allows *The Business of Martyrdom* to develop a fuller understanding of suicide bombing as a unified yet diverse phenomenon **Slavophile**

Thought and the Politics of Cultural Nationalism Susanna Rabow-Edling, 2012-02-01 Susanna Rabow Edling examines the first theory of the Russian nation formulated by the Slavophiles in the second quarter of the nineteenth century and its relationship to the West Using cultural nationalism as a tool for understanding Slavophile thinking she argues that a Russian national identity was not shaped in opposition to Europe in order to separate Russia from the West Rather it originated as an attempt to counter the feeling of cultural backwardness among Russian intellectuals by making it possible for Russian culture to assume a leading role in the universal progress of humanity This reinterpretation of Slavophile ideas about the Russian nation offers a more complex image of the role of Europe and the West in shaping a Russian national identity [The Crisis](#)

of Reason J. W. Burrow, 2002-11-01 This elegantly written book explores the history of ideas in Europe from the revolutions of 1848 to the beginning of the First World War Broader than a straight survey deeper and richer than a textbook this work seeks to place the reader in the position of an informed eavesdropper on the intellectual conversations of the past J W Burrow first outlines the intellectual context of the mid nineteenth century using ideas taken from physics social evolution and social Darwinism and anxieties about modernity and personal identity to explore the impact of science and social thought on European intellectual life The discussion encompasses powerful and fashionable concepts in evolution art myth the occult and the unconscious mind the rise of the great cities of Berlin Paris and London and the work of literary writers philosophers and composers Most of the great intellectual figures of the age and many of the lesser known populate the book among them Mill Bakunin Nietzsche Bergson Renan Pater Proust Clough Flaubert Wagner and Wilde The author wears his erudition lightly and this distinguished book will be both entertaining and accessible to scholars students and general readers alike
