Modifying the Aerodynamics of Your Road Car Julian Edgar, Richard H. Barnard, 2019-01-08 Modifying the Aerodynamics of Your Road Car is a unique handbook that assumes no starting knowledge of vehicle aerodynamics It begins with simple ideas and finishes with sophisticated and effective aerodynamic modifications that work Three major chapters cover on road testing techniques that give you all the information you need to decide what modifications you should make and after you ve made them how well they work Low cost techniques allow you to visualize the patterns of airflow over your car so that you can actually see the problem areas that need improvement Uniquely you re also shown how to measure aerodynamic pressures so you can determine which body surfaces are creating lift drag and downforce Want to work out where a wing should be placed On road testing to find that out is covered as well The book also shows you how to measure downforce to see if that wing is actually working If you wish to reduce drag more than ten different areas are covered Reducing frontal area lowering cooling system drag optimizing vehicle ride height and rake reducing the strength of the wake achieving clean airflow separation and optimizing wheel designs are all covered using the latest research findings And if you re a performance driver there s a major chapter devoted to reducing lift and improving stability This chapter includes the design and development of undertrays and diffusers wings and spoilers The example car developed measurable downforce when fitted with an undertray and rear diffuser something that transformed its on road handling The author has been writing about the aerodynamics of road cars for more than 25 years He is also an experienced and proficient car modifier who has performed numerous aerodynamic modifications and upgrades to his own cars The book s technical consultant RH Barnard is an acknowledged world leading automotive aerodynamicist If you want a practical hands on guide that demystifies and explains car aerodynamics and shows you how to make effective aerodynamic modifications to your car this book is for you

The International Vehicle Aerodynamics Conference IMechE, 2014-11-12 Aerodynamics has never been more central to the development of cars commercial vehicles motorbikes trains and human powered vehicles driven by the need for efficiency reducing carbon dioxide emissions reducing fuel consumption increasing range and alleviating problems associated with traffic congestion Reducing vehicle weight makes it more challenging to ensure that they are stable and handle well over a wide range of environmental conditions Lighter structures are also more vulnerable to

aerodynamically induced vibration Alongside this customers demand an environment that is quiet comfortable and maintains their vision of the world around them in all weathers These aims must be met by designing vehicles that engage customers emotionally promoting the brand values of manufacturers and operators This can only be done by collaboration between designers and aerodynamicists Examine the latest developments in vehicle aerodynamic development Explore opportunities to network and share experiences around different areas Focus on future challenges and the engineering knowledge and technology required to resolve them Discuss other areas of development including handling and stability tyre aerodynamics and modelling aeroacoustics and fluid structure interaction

Road Vehicle Dynamics: Fundamentals Of Modeling And Simulation Giancarlo Genta,Alessandro Genta,2016-12-28 Road Vehicle Dynamics supplies students and technicians working in industry with both the theoretical background of mechanical and automotive engineering and the know how needed to perform numerical simulations Bringing together the foundations of the discipline and its recent developments in a single text the book is structured in three parts it begins with a historical overview of road vehicles then deals with the forces exchanged between the vehicle and the road and the vehicle and the air and finally deals with the dynamic behavior of the vehicle in normal driving conditions with some extensions towards conditions encountered in high speed racing Coverage of contemporary automatic controls is included in this edition

The Aerodynamics of Heavy Vehicles: Trucks, Buses, and Trains Rose McCallen, Fred Browand, James Ross, 2013-07-30. It is our pleasure to present these proceedings from the United Engineering Foundation Conference on The Aerodynamics of Heavy Vehicles Trucks Buses and Trains held December 2-6 2002 in Monterey California. This Department of Energy United Engineering Foundation and industry sponsored conference brought together 90 leading engineering researchers from around the world to discuss the aerodynamic drag of heavy vehicles. Participants from national labs, academia and industry including truck manufacturers discussed how computer simulation and experimental techniques could be used to design more fuel efficient trucks, buses and trains. Conference topics included comparison of computational fluid dynamics calculations using both steady and unsteady Reynolds averaged Navier Stokes large eddy simulation and hybrid turbulence models and experimental data obtained from the Department of Energy sponsored and other wind tunnel experiments. Advanced experimental techniques including three dimensional particle image velocimetry were presented along with their use in evaluating drag reduction devices. We would like to thank the UEF conference organizers for their dedication and quick response to sudden deadlines. In addition we would like to thank all session chairs, the scientific advisory committee, authors and reviewers for their many hours of dedicated effort that contributed to a successful conference and resulted in this document of the conference proceedings. We also gratefully acknowledge the support received from the United Engineering Foundation, the US Department of Energy, Lawrence Livermore National Laboratory, Volvo Trucks America, International Truck and Engine Corporation and Freightliner LLC.
