Roads Of Ancient Cyprus:

The Roads of Ancient Cyprus Tønnes Bekker-Nielsen, 2004 The earliest roads in Cyprus go back to the Bronze Age and by the end of the Hellenistic period the road network encircled the entire island More roads were added and older roads rebuilt during the Roman period to serve the needs of the provincial administration as well as of the individual cities This book the first on its subject traces the development of the Cypriot road network over a period of a thousand years drawing on a combination of archaeological epigraphic and literary sources Separate chapters deal with travellers and life on the road transport technology and the legal and administrative context of road building It is often assumed that the primary purpose of Roman road building was military domination but as this study demonstrates road development in Cyprus is best understood in terms of communication between cities and their territories and the day to day exchanges between town and countryside The Roads of Ancient Cyprus Tønnes Bekker-Nielsen, 2004 **Classica et Mediaevalia 55** Ole

Thomsen, 2005-09-02 *Classica et Mediaevalia* is an international periodical published annually with articles written by Danish and international scholars The articles are mainly written in English but also in French and German The periodical deals from a philological point of view on Classical Antiquity in general and topics such as history of law and philosophy and the medieval ecclesiastic history It covers the period from the Greco Roman Antiquity until the Late Middle Ages Volume 55 contents include The Date of Xenophon's Poroi Socratic Apologetics in Xenophon's Symposium *berlegungen zur Argumentationsstruktur in Platons Protagoras* Trial by Riddle The Testing of the Counsellor and the Contest of Kings in the Legend of Amasis and Bias Horace on Tradition and the Individual Talent *Ars Poetica* 119-52 *L'Itinerarium Egeriae* un point de vue littéraire *Nemo Mecenas nemo modo Caesar* Die Idee der Literaturförderung in der lateinischen Dichtung des hohen Mittelalters On the Composition of Herbert Lo **A Study of the Circulation of Ceramics in Cyprus from the 3rd**

Century BC to the 3rd Century AD John Lund, 2015-10-26 This is the first monograph devoted solely to the ceramics of Cyprus in the Hellenistic and Roman Periods The island was by then no longer divided into kingdoms but unified politically first under Ptolemaic Egypt and later as a province in the Roman Empire Submission to foreign rule was previously thought to have diluted if not obliterated the time honoured distinctive Cypriot character The ceramic evidence suggests otherwise The distribution of local and imported pottery in Cyprus points to the existence of several regional exchange networks a division that also seems reflected by other evidence The similarities in material culture exchange patterns and preferential practices are suggestive of a certain level of regional collective self awareness From the 1st century BC onwards Cyprus became increasingly engulfed by mass produced and standardized ceramic fine wares which seem ultimately to have put many of the indigenous makers of similar products out of business or forced them to modify their output Also the ceramic record gradually became less diverse during the Roman Period than before developments which we today might be inclined to view as symptoms of an early form of globalisation *The Transport Amphorae and Trade of Cyprus* Mark L. Lawall, John

Lund,2013-12-31 Placed as a stepping stone on the sea route between Europe and the New East Cyprus has always been a meeting place of many cultures Though rarely united politically through many millennia of history and for extended periods subject to foreign rule the island nonetheless managed to maintain specific and unique identities This publication seeks to throw new light on important aspects of the economy of Cyprus between c 700 BC and AD 700 through a concerted study of the transport amphorae found in and around the island These standardised containers of fired clay were commonly used for shipping foodstuffs from their places of production to the consumers in antiquity Completely preserved or found only in fragments such vessels are a prime source of information about the island s exports and imports of agricultural products and ultimately about the fluctuations in the economy of Cyprus through a crucial millennium and a half of her history The jars thus contribute both to our understanding of the changing intensities of Cypriot connections with other centres around the Mediterranean and to the documentation of regional patterning within the island itself **Historical Dictionary of Cyprus**

Farid Mirbagheri,Emilios A. Solomou,2021-12-10 As a major tourist destination and the most eastern member of the European Union housing two British Sovereign Bases and sitting at the intersection of three continents Cyprus attracts international attention in more ways than one hence the complex web of converging and conflicting outside interests that has marked and scarred the country s history Since 2009 when the previous edition appeared further big changes have occurred with the United Nations led efforts to bring about a settlement to the Cyprus problem as well as the latest on the exploration of hydrocarbon in the eastern Mediterranean seabed Historical Dictionary of Cyprus Second Edition contains a chronology an introduction and an extensive bibliography The dictionary section has several hundred cross referenced entries on important personalities politics economy foreign relations religion architecture and culture This book is an excellent resource for students researchers and anyone wanting to know more about Cyprus *Religion and Social Transformations in Cyprus*

Giorgos Papantoniou,2012-10-16 This monograph focuses on religion to explore how the socio cultural infrastructure of Cyprus was affected by the transition from segmented administration by many Cypriot kings to the island wide government by a foreign Ptolemaic correspondent It approaches politico religious ideological responses and structures of symbolism through the study of sacred landscapes specific iconographic elements and archaeological contexts and architecture as well as through textual and epigraphic evidence A fresh approach to the transition is put forward connecting the island more emphatically with its longue dur e Moving beyond the field of Cypriot studies this work also serves as a paradigm for the study of religion in relation to social power in other fields of classics and in particular for the enrolment of other areas of the Mediterranean into the political and cultural Hellenistic oikoumene *Routes and Roads in Anatolia from Prehistory to Seljuk Times*

Lutgarde Vandeput,Stephen Mitchell,2025-08-05 Turkey has always been a crossroads and therefore offers an ideal location to study interaction between individuals and human communities and societies through time Interaction has always necessarily involved movement which in turn did not occur randomly in the landscape but was instead focused on

routes and roads that secured faster and easier connections There is substantial evidence that exchange networks already existed in Anatolia at least since the Neolithic period with goods traveling over long distances From the second millennium BC onwards textual evidence has improved understanding of traveling routes The Roman long distance road network has been a focus of research over decades but local roads and pathways around individual sites are still mostly unknown Byzantine roads have also received attention whereas the Seljuk road and routes system is less well known It is likely that the younger roads and routes are overlying older ones at least partially but these palimpsests of older roads are hardly researched In this volume experts from different disciplines using a variety of methods and approaches aim to transcend the present fragmentation of knowledge and create a new level of understanding of connecting road and route systems in Anatolia throughout time for the first time

Roman Seas Justin Leidwanger, 2020-03-11 Drawing together maritime landscape studies and network analysis this book offers an archaeological exploration of seaborne economy and connectivity across the Roman eastern Mediterranean where the material record of shipwrecks and ports reveals multiple evolving regional and interregional systems of interaction

Roman Roads Anne Kolb, 2019-07-22 This volume aims to present the current state of research on Roman roads and their foundations in a combined historical and archaeological perspective The focus is on the diverse local histories and the varying degrees of significance of individual roads and regional networks which are treated here for the most important regions of the empire and beyond The assembled contributions will be of interest to historians archaeologists and epigraphers since they tackle matters as diverse as the technical modalities of road building the choice of route but also the functionality and the motives behind the creation of roads Roman roads are further intimately related to various important aspects of Roman history politics and culture After all such logistical arteries form the basis of all communication and exchange processes enabling not only military conquest and security but also facilitating the creation of an organized state as well as trade food supply and cultural exchange The study of Roman roads must always be based on a combination of written and archaeological sources in order to take into account both their concrete geographical location and their respective spatial cultural and historical context
