Theories of Modern Art Herschel Browning Chipp, Herschel B. Chipp, Peter Selz, 1968 *The Color of Modernism* Deborah Ascher Barnstone, 2021-12-30 One of the most enduring and pervasive myths about modernist architecture is that it was white pure white walls both inside and out Yet nothing could be further from the truth The Color of Modernism explodes this myth of whiteness by offering a riot of color in modern architectural treatises polemics and buildings Focusing on Germany in the early 20th century one of modernism's most foundational and influential periods it examines the different scientific and artistic color theories which were advanced by members of the German avant garde from Bruno Taut to Walter Gropius to Hans Scharoun German color theory went on to have a profound influence on the modern movement and Germany serves as the key case study for an international phenomenon which encompassed modern architects worldwide from Le Corbusier and Alvar Aalto to Berthold Lubetkin and Lina Bo Bardi Supported by accessible introductions to the development of color theory in philosophy science and the arts the book uses the German case to explore the new ways in which color was

used in architecture and urban design turning attention to an important yet overlooked aspect of the period Much more than a mere correction to the historical record the book leads the reader on an adventure into the color filled worlds of psychology the paranormal theories of sensory perception and pleasure showing how each in turn influenced the modern movement The Color of Modernism will fundamentally change the way the early modernist period is seen and discussed

Modernist Physics Rachel Crossland, 2018-03-09 Modernist Physics takes as its focus the ideas associated with three scientific papers published by Albert Einstein in 1905 considering the dissemination of those ideas both within and beyond the scientific field and exploring the manifestation of similar ideas in the literary works of Virginia Woolf and D H Lawrence Drawing on Gillian Beer's suggestion that literature and science share the moment's discourse Modernist Physics seeks both to combine and to distinguish between the two standard approaches within the field of literature and science direct influence and the zeitgeist The book is divided into three parts each of which focuses on the ideas associated with one of Einstein's papers Part I considers Woolf in relation to Einstein's paper on light quanta arguing that questions of duality and complementarity had a wider cultural significance in the early twentieth century than has yet been acknowledged and suggesting that Woolf can usefully be considered a complementary rather than a dualistic writer Part II looks at Lawrence's reading of at least one book on relativity in 1921 and his subsequent suggestion in *Fantasia of the Unconscious* that we are in sad need of a theory of human relativity a theory which is shown to be relevant to Lawrence's writing of relationships both before and after 1921 Part III considers Woolf and Lawrence together alongside late nineteenth and early twentieth century discussions of molecular physics and crowd psychology suggesting that Einstein's work on Brownian motion provides a useful model for thinking about individual literary characters

Psychedelia and Other Colours Rob Chapman, 2015-09-01 In *Psychedelia and Other Colours* acclaimed author Rob Chapman explores in crystalline detail the history precedents and cultural impact of LSD from the earliest experiments in painting with light and immersive environments to the thriving avant garde scene that existed in San Francisco even before the Grateful Dead and the Fillmore Auditorium In the UK he documents an entirely different history and one that has never been told before It has its roots in fairy tales and fairgrounds the music hall and the dead of Flanders fields in the Festival of Britain and that peculiarly British strand of surrealism that culminated in the

Magical Mystery Tour, Sgt. Pepper's Lonely Hearts Club Band, and the Soft Machine light shows and love in the mind expanding effects of acid were to redefine popular culture as we know it. *Psychedelia and Other Colours* documents these utopian reverberations and the dark side of their moon in a perfect portrait.

Under the Spell of Orpheus Judith E. Bernstein, 1991. The Retrieval of the Beautiful Galen A. Johnson, 2010 In this elegant new study Galen Johnson retrieves the concept of the beautiful through the framework of Merleau Ponty's aesthetics Although Merleau Ponty seldom spoke directly of beauty his philosophy is essentially about the beautiful In Johnson's formulation the ontology of Flesh as element and the ontology of the Beautiful as elemental are folded together for Desire Love and Beauty are part of the fabric of the world's element Flesh itself the term at which Merleau Ponty arrived to replace Substance Matter or Life as the name of Being Merleau Ponty's Eye and Mind is at the core of the book so Johnson engages as Merleau Ponty did the writings and visual work of Paul Cézanne Auguste Rodin and Paul Klee as well as Rilke's commentary on Cézanne and Rodin From these widely varying aesthetics emerge the fundamental themes of the retrieval of the beautiful desire repetition difference rhythm and the sublime The third part of Johnson's book takes each of these up in turn bringing Merleau Ponty's aesthetic thinking into dialogue with classical philosophy as well as Sartre Heidegger Nietzsche and Deleuze Johnson concludes his final chapter with a direct dialogue with Kant and Merleau Ponty and also Lyotard on the subject of the beautiful and the sublime As we experience with Rodin's Balzac beauty and the sublime blend into one another when the beautiful grows powerful majestic mysterious and transcendent
