## **Sarah Queen Of Mongolia:**

**Sarah, Queen of Mongolia** Manny S. Fredkin,1986-12-01      **Ancient Queens** Sarah Milledge Nelson,2003-06-05  
Exploding the traditional myth that view queens as simply an appendage to the king these essays explore the social and cultural constructions of female power This volume does more than merely identify and describe queens but rather offers its readers an understanding of the roles of these dominant women situated within archaeological discourse that change our assumptions about female ruled societies Examining the ancient societies in Asia North and South America Europe and Africa the authors explore the powerful positions held by queens as well as the role that gender played in their kingdoms Spearheading the notion that women s work is not the same in all cultures the contributions in this volume compel readers to rethink gender relationships and ideology in our cultures      **Biography Index** Bea Joseph,1988 A cumulative index to biographical material in books and magazines      **Forthcoming Books** Rose Arny,1987      **The Cambridge History of Nationhood and Nationalism: Volume 1, Patterns and Trajectories over the Longue Durée** Cathie Carmichael,Matthew D'Auria,Aviel Roshwald,2023-11-09 This major new reference work with contributions from an international team of scholars provides a comprehensive account of ideas and practices of nationhood and nationalism from antiquity to the present It considers both continuities and discontinuities engaging critically and analytically with the scholarly literature in the field Volume I starts with a series of case studies of classical civilizations It then explores a wide range of pivotal moments and turning points in the history of identity politics during the age of globalization from 1500 through to the twentieth century This overview is truly global covering countries in East and South Asia as well as Europe and the Americas      **Herd Book** National Pig Breeders' Association, London,1924      **Przewalski's Horses in Eurasia** Michael L. Zukosky,2016-10-20 Przewalski s Horses in Eurasia draws on more than two years of ethnographic research to examine the reintroduction of Przewalski s horses a highly endangered breed that is a genetically distinct and distant relative of today s domesticated horses into their native habitats across Eurasia Zukosky explores how pluralism in species reintroduction provides insights into the experiences relationships and knowledge required for future international collaborations to better capture the complexity of both nature and society in scientific practice The book includes philosophical discussions of pluralism in narrative ethnographic studies of biologists observations of changing horse behavior from European captive conditions to release in the wild in Asia and ethnographic accounts of local non scientists sentiments about the benefits and disadvantages of reintroduction in central Mongolia Recommended for scholars of anthropology and biology      **Food and Environment in Early and Medieval China** E. N. Anderson,2014-09-15 Chinese food is one of the most recognizable and widely consumed cuisines in the world Almost no town on earth is without a Chinese restaurant of some kind and Chinese canned frozen and preserved foods are available in shops from Nairobi to Quito But the particulars of Chinese cuisine vary widely from place to place as its major ingredients and techniques have been adapted to local

agriculture and taste profiles To trace the roots of Chinese foodways one must look back to traditional food systems before the early days of globalization Food and Environment in Early and Medieval China traces the development of the food systems that coincided with China's emergence as an empire Before extensive trade and cultural exchange with Europe was established Chinese farmers and agriculturalists developed systems that used resources in sustainable and efficient ways permitting intensive and productive techniques to survive over millennia Fields gardens semiwild lands managed forests and specialized agricultural landscapes all became part of an integrated network that produced maximum nutrients with minimal input though not without some environmental cost E N Anderson examines premodern China's vast active network of trade and contact such as the routes from Central Asia to Eurasia and the slow introduction of Western foods and medicines under the Mongol Empire Bringing together a number of new findings from archaeology history and field studies of environmental management Food and Environment in Early and Medieval China provides an updated picture of language relationships cultural innovations and intercultural exchanges
