Sasol Birds of Prey of Africa and Its Islands Alan C. Kemp, Meg Kemp, 2001 This guide offers the best of both worlds in its presentation of birds in both photographic and illustrative form Each raptor species is afforded one double page spread allowing for extensive textual and illustrative coverage The text focuses on bird identification first isolating the key points necessary for identifying a species and then discussing salient features of the adult sub adult and juvenile The bird is described at perch and in flight and any distinctive behaviour is highlighted Current distribution habitat and status are discussed and finally similar species The illustrative content by means of carefully selected photographs from top ranking wildlife photographers and illustrations by renowned bird artist Peter Hayman depicts all kinds of plumage relevant to identification male female and immature as well as in flight shots to help distinguish the often confusing and similar wing patterns of this group of birds Sasol Birds of Prey of Africa Alan Kemp, Meg Kemp, Peter Steyn, 1998-10-01 **Sasol**

Bildstein, David Michael Bird, 2007 Think about how we know about past events in human history e.g. the expansion of the Roman Empire or the American Revolution What types of records document those events Now think about Earth's history specifically the past environmental or climatic conditions at times before recorded human history What records might there be of such conditions Make a list of your ideas n assemblage of five major types of natural archives of Earth's environmental and climatic history What common feature s do each of these paleoclimate archives share an assemblage of 5 major types of natural records or archives of Earth's environmental and climatic history Just like a diary or other historical document the layers in these natural archives contain indirect evidence i.e. proxies about past conditions and events recorded in a sequential order The evidence is specific to a certain time period and may be general or very detailed depending on the rate that information was

recorded The faster the rate at which the recorder grew trees and corals accumulated snow and ice or was deposited sedimentary sequences the more detailed the record is and the higher its resolution For example a record in which an annual signal can be observed has a very high resolution In contrast if the finest observable details are on the order of a million years then that record would have a low resolution
