The Satanic Mill Otfried Preussler, 1991 In seventeenth century Germany a boy desperately wants to escape from a school for Black Magic where he is held captive by demonic forces      Blake David V. Erdman, 2013-08-16 DIVDefinitive study of strange symbolism Blake used to attack political tyranny of his time For our sense of Blake in his own times we are indebted to David Erdman more than anyone else Times Literary Supplement Third revised edition 32 black and white illus div      **Against Technology** Steven E. Jones, 2013-01-11 This book addresses the question of what it might mean today to be a Luddite that is to take a stand against technology Steven Jones here explains the history of the Luddites British textile workers who from around 1811 proclaimed themselves followers of Ned Ludd and smashed machinery they saw as threatening their trade Against Technology is not a history of the Luddites but a history of an idea how the activities of a group of British workers in Yorkshire and Nottinghamshire came to stand for a global anti technology philosophy and how an anonymous collective movement came to be identified with an individualistic personal conviction Angry textile workers in the early nineteenth century became romantic symbols of a desire for a simple life certainly not the original goal of the actions for which they became famous Against Technology is in other words a book about representations about the image and the myth of the Luddites and how that myth was transformed over time into modern neo Luddism      **Minneapolis Murder & Mayhem** Ron de Beaulieu, 2022-06-13 Minneapolis has a bloody unacknowledged heritage On the shore of Lake Harriet Ojibwe warriors killed a Dakota man triggering two retaliatory massacres Ten years later pioneer settlers roved the land of Minneapolis in gangs for protection from other pioneer gangs When a lynch mob hanged a violent criminal across the street from Central High School they left his corpse dangling for hours Rioting Riversiders toppled a streetcar and attacked the driver A man murdered a kind stranger because he misunderstood his intentions Separate industrial disasters shattered the St Anthony Falls causing one fatality and nearly razed the Mill District killing eighteen more and injuring countless others Author Ron de Beaulieu uncovers the dark sinister history beneath the city      **Unbuilt Utopian Cities 1460 to 1900: Reconstructing their Architecture and Political Philosophy** Tessa Morrison, 2016-03-09 Bringing together ten utopian works that mark important points in the history and an evolution in social and political philosophies this book not only reflects on the texts and their political philosophy and implications but also their architecture and how that architecture informs the political philosophy or social agenda that the author intended Each of the ten authors expressed their theory through concepts of community and utopian architecture but each featured an architectural solution at the centre of their social and political philosophy as none of the cities were ever built they have remained as utopian literature Some of the works examined are very well known such as Tommaso Campanella s Civitas Solis while others such as Joseph Michael Gandy s Designs for Cottages are relatively obscure However even with the best known works this volume offers new insights by focusing on the architecture of the cities and how that architecture represents the author s political philosophy It

reconstructs the cities through a 3 D computer program ArchiCAD using Artlantis to render Plans sections elevations and perspectives are presented for each of the cities The ten cities are Filarete Sforzina Albrecht D rer Fortified Utopia Tommaso Campanella The City of the Sun Johann Valentin Andreae Christianopolis Joseph Michael Gandy An Agricultural Village Robert Owen Villages of Unity and Cooperation James Silk Buckingham Victoria Robert Pemberton Queen Victoria Town King Camp Gillette Metropolis and Bradford Peck The World a Department Store Each chapter considers the work in conjunction with contemporary thought the political philosophy and the reconstruction of the city Although these ten cities represent over 500 years of utopian and political thought they are an interlinked thread that had been drawn from literature of the past and informed by contemporary thought and society The book is structured in two parts Politics and Social Visions

Maurizio Ferrera,2024-03-04 The starting point of this book is the civil war of ideas that broke out during the early 2010s about the purpose and even the desirability of the European Union as a polity with a number of right wing populist formations openly advocating for exiting the Union The sovereign debt crisis triggered a spiral of ideological decommunalization national leaders seemed to have lost that sense of togetherness and mutual bonds that had been laboriously developed over decades of integration Politics and Social Visions explores this politically disruptive process from an ideational perspective on the assumption that symbols and visions play a crucial role In processes of polity formation ideologies offer competing partisan views but tend to converge along the communal dimension which defines the nature and boundaries of the emerging polity This convergence has been a challenge for the EU since its origins as it has required the construction of a coherent and acceptable image of Europe as a compound polity of nation states with a divisive past Maurizio Ferrera offers a reconstruction of how the main ideological currents have struggled and often failed to reconfigure their horizontal profiles i e their images of the national within Europe into a new vertical profile i e an image of the European within the national The challenge has been especially demanding for European left wing parties which have been largely unable to forge a shared and recognizable social vision of the European Union Only during the COVID pandemic have the seeds of a novel communal consensus emerged that might prove capable of defeating the anti communal views of Eurosceptic ideologies and free market technocrats Egotopia John Miller,1999-05-04 This work aims to identify the physical ugliness that defines and homogenizes America s cities suburbs and countryside Believing that prevailing assessments of the American landscape are inadequate and injudicious the author calls into question the conventional wisdom of environmentalists urban planners and architects alike In this examination of what he sees as the ugliness that is the American consumer society he argues that our aesthetic condition can be fully understood only by explorers of the metaphoric environment The SAGE Handbook of Popular Music Andy Bennett,Steve Waksman,2015-01-19 The SAGE Handbook of Popular Music is a comprehensive smartly conceived volume that can take its place as the new standard reference in popular music The editors have shown great care in covering classic debates while moving the field into new

exciting areas of scholarship International in its focus and pleasantly wide ranging across historical periods the Handbook is accessible to students but full of material of interest to those teaching and researching in the field Will Straw McGill University Celebrating the maturation of popular music studies and recognizing the immense changes that have recently taken place in the conditions of popular music production The SAGE Handbook of Popular Music features contributions from many of the leading scholars in the field Every chapter is well defined and to the point with bibliographies that capture the history of the field Authoritative expertly organized and absolutely up to date this collection will instantly become the backbone of teaching and research across the Anglophone world and is certain to be cited for years to come Barry Shank author of *The Political Force of Musical Beauty* 2014 The SAGE Handbook of Popular Music provides a highly comprehensive and accessible summary of the key aspects of popular music studies The text is divided into 9 sections Theory and Method The Business of Popular Music Popular Music History The Global and the Local The Star System Body and Identity Media Technology Digital Economies Each section has been chosen to reflect both established aspects of popular music studies as well as more recently emerging sub fields The handbook constitutes a timely and important contribution to popular music studies during a significant period of theoretical and empirical growth and innovation in the field This is a benchmark work which will be essential reading for educators and students in popular music studies musicology cultural studies media studies and cultural sociology

**Nameless Towns** Thad Sitton, James H. Conrad, 1998 Winner T H Fehrenbach Award Texas

Historical Commission Sawmill communities were once the thriving centers of East Texas life Many sprang up almost overnight in a pine forest clearing and many disappeared just as quickly after the company cut out its last trees But during their heyday these company towns made Texas the nation s third largest lumber producer and created a colorful way of life that lingers in the memories of the remaining former residents and their children and grandchildren Drawing on oral history company records and other archival sources Sitton and Conrad recreate the lifeways of the sawmill communities They describe the companies that ran the mills and the different kinds of jobs involved in logging and milling They depict the usually rough hewn towns with their central mill unpainted houses company store and schools churches and community centers And they characterize the lives of the people from the hard awesomely dangerous mill work to the dances picnics and other recreations that offered welcome diversions The Worlds of Victorian Fiction Jerome Hamilton Buckley,1975

**Palmer Mills** Roger Holden,2017 Palmer Mills were cotton spinning mills in Stockport Cheshire Originally built in around 1822 by James Marshall they were extended considerably over the following three decades They ceased operating in the early 1880s by which time they were old and obsolete A new company purchased the mills and largely demolished them before building a new mill which was completed in 1887 A second mill was completed in 1890 With the decline in the cotton industry the mills closed in 1931 The No 1 Mill was demolished in 1937 but the No 2 Mill continued in various uses until it was demolished in 1999 This well illustrated book is a history and technical description of the mills in the context of the Lancashire cotton industry Cases Decided in the Court of Session, Teind Court, Court of Exchequer and House of Lords Scotland.
