 technologies of com munication were accessible only to experts today they are a subject of constant discussion in the media
 New services are advertised on a daily basis and the potential realized or not of these technologies is a constant source of
 comment and discussion But beyond the media frenzy things really are developing with increasing speed driven by the power
 of the Internet The network has built up an ongoing relationship between research centres development teams and
 marketing teams allowing a constructive collaboration between technologies The network has become the catalyst for its own
 evolution The arrival of IP and GSM has given rise to new corporate giants like Cisco Systems and Nokia Operators
 witnessing the diversification of their main sources of revenue have been forced to merge or split Entirely new actors from
 various horizons are counting on their ability to act as operators without a network to their name Traditional equipment
 manufacturers have had to rethink their product lines in view of these new foundations Likewise governments have
 understood the need to create a body of laws that promote the harmonious and rapid development of networks to offer
 alternatives for operators and service providers These often complex regulations act both as constraint and opportunity for
 operators and give direction to the actions of actors across the board **Official Gazette of the United States Patent**
