## **Satoyama The Traditional Rural Landscape Of Japan:**

**Satoyama** K. Takeuchi, R.D. Brown, I. Washitani, A. Tsunekawa, M. Yokohari, 2008-06-17 Japan's traditional and fragile satoyama landscape system was developed over centuries of human life on mountainous island terrain in a monsoon climate. The carefully managed coppice woodlands on the hillsides, the villages strung along the base of the hills, and the carefully tended paddy fields of rural Japan made possible the sustainable interaction of nature and humans. Radical changes in the middle of the twentieth century led to the abandonment of satoyama landscapes which now are being rediscovered. There is a new realization that these woodlands still play a vital role in the management of the Japanese landscape and a new determination to manage them for the future. This multifaceted book explores the history, nature biodiversity, current conservation measures, and future uses of satoyama. The information presented here will be of interest in all parts of the world where patterns of sustainable development are being sought.

*Revitalization and Internal Colonialism in Rural Japan* Timo Thelen, 2022-04-04 This book explores the decline of rural and peripheral areas in Japan which results from an aging population, outmigration of the younger generations, and the economic decline of the primary sector. Based on extensive original research, the book examines in detail the case of the Noto peninsula. Allowing the locals to tell their stories, describe their problems, and come up with possible solutions, the book demonstrates the serious impact of rural decline on their daily life and work and highlights the struggle to sustain rural living in the globalized age. It argues that some recent innovations in global media, economy, technology, and ideology offer scope for reversing the decline, as some central government initiatives do, but that these are not always noticed, appreciated, and made use of by local people. The book also discusses the nature of the links between the peripheries and the centres, regional, national, and global, and how these often take the form of internal colonialism.

**The End of Tradition?** Ian D. Rotherham, 2014 The threats from global cultural change and abandonment of traditional landscape management increased in the last half of the twentieth century and ten years into the twenty-first century show no signs of slowing down. Their impacts on global biodiversity and on people disconnected from their traditional landscapes pose real and serious economic

and social problems which need to be addressed now The End of Tradition conference held in Sheffield UK was organised by Ian D Rotherham and colleagues It addressed the fundamental issues of whether we can conserve the biodiversity of wonderful and iconic landscapes and reconnect people to their natural environment And if we can how can we do so and make them relevant for the twenty first century The book is in two parts Part 1 A History of Commons and Commons Management and Part 2 Commons Current Management and Problems      **Agroforestry - The Future of Global Land Use** P.K. Ramachandran Nair,Dennis Garrity,2012-08-22 This volume contains a solid body of the current state of knowledge on the various themes and activities in agroforestry worldwide It is organized into three sections the Introduction section consists of the summaries of six keynote speeches at the 2nd World Congress of Agroforestry held in Nairobi Kenya in 2009 that is followed by two sections of peer reviewed thematic chapters grouped as Global Perspectives seven chapters and Regional Perspectives eleven chapters authored by professional leaders in their respective agroforestry related fields worldwide A total of 130 professionals from institutions in 33 countries in both developing and the industrialized temperate regions of the world contributed to the book as chapter authors and or reviewers Thus the book presents a comprehensive and authoritative account of the global picture of agroforestry today      **Nature and Culture** Sarah Pilgrim,Jules N. Pretty,2010 There is a growing recognition that the diversity of life comprises both biological and cultural diversity But this division is not universal and in many cases has been deepened by the common disciplinary divide between the natural and social sciences and our apparent need to manage and control nature This book goes beyond divisive definitions and investigates the bridges linking biological and cultural diversity The international team of authors explore the common drivers of loss and argue that policy responses should target both forms of diversity in a novel integrative approach to conservation thus reducing the gap between science policy and practice While conserving nature alongside human cultures presents unique challenges this book forcefully shows that any hope for saving biological diversity is predicated on a concomitant effort to appreciate and protect cultural diversity      *Japan and the Culture of the Four Seasons* Haruo Shirane,2013-03-05 Elegant representations of nature and the four seasons populate a wide range of Japanese genres and media In *Japan and the Culture of the Four Seasons* Haruo Shirane shows how when and why this practice developed and explicates the richly encoded social religious and political meanings of this imagery Shirane discusses textual cultivated material performative and gastronomic representations of nature He reveals how this kind of secondary nature which flourished in Japan s urban environment fostered and idealized a sense of harmony with the natural world just at the moment when it began to recede from view Illuminating the deeper meaning behind Japanese aesthetics and artifacts Shirane also clarifies the use of natural and seasonal topics as well as the changes in their cultural associations and functions across history genre and community over more than a millennium In this book the four seasons are revealed to be as much a cultural construction as a reflection of the physical world Back cover      **Tokyo as a Global City** Toshio Kikuchi,Toshihiko

Sugai,2018-03-28 This book examines Tokyo's changes, current challenges and future trends through a new kind of regional geography and serves as an important source of comprehensive information about the past, present and future perspectives of Tokyo as a global city. Regional geography relies on two main approaches. The traditional one addresses each geographical element of a region individually and in depth in a descriptive and static manner. The other focuses on a region's specific phenomena and realities as a starting point and proceeds to identify the region's constituent elements and their interactions, which it records and explains in a systematic and dynamic manner. The present volume, unlike its predecessors, relies on the dynamic approach and endeavors to offer a fresh view of Tokyo's new and diverse geographical realities analyzed in a holistic, systematic manner, allowing identification of its specific features. The book covers a broad range of topics, including landform variations and volcanic activity, biodiversity concerns, transportation management, waste management, population issues, religious functions and urban tourism, all of which facilitate understanding of the unique characteristics of Tokyo. Extensive views from different fields of studies make the book a valuable reference to comprehend both the development of Tokyo into a global city and its sustainability.

**Research in Biodiversity** Igor Pavlinov,2011-10-12 The book covers several topics of biodiversity researches and uses containing 17 chapters grouped into 5 sections. It begins with an interesting chapter considering the ways in which the very biodiversity could be thought about. Noteworthy is the chapter expounding pretty original creativity theory of ecosystem. There are several chapters concerning models describing relation between ecological niches and diversity maintenance, the factors underlying avian species imperilment and diversity turnover rate of a local beetle group. Of special importance is the chapter outlining a theoretical model for morphological disparity in its most widened treatment. Several chapters consider regional aspects of biodiversity in Europe, Asia, Central and South America, among them an approach for monitoring conservation of the regional tropical phytodiversity in India is of special importance. Of interest is also a chapter considering the history of the very idea of biodiversity emergence in ecological researches.

**Social-Ecological Restoration in Paddy-Dominated Landscapes** Nisikawa Usio, Tadashi Miyashita,2015-01-20 With a focus on environmentally friendly rice farming, this unique book integrates both ecosystem and human dimensions of ecological restoration to provide strategies to promote sustainable agriculture and rural development. Paddy fields have multiple functions beyond their role of producing rice. They serve as refuge habitats for a range of wildlife that once inhabited floodplain wetlands and contain a number of unique and threatened aquatic species. They also provide various ecosystem services for regional communities such as water retention, erosion control, flood control, fish culture and educational opportunities. However, rice paddies are threatened worldwide due to the modernization of agriculture and abandonment of farmland caused by depopulation and the aging of rural communities. Therefore, multiple ecological and sociological aspects must be considered in the ecological restoration of paddy fields. This book aims to do so by incorporating various disciplines of natural and social sciences. Strategies for sustainable agriculture are reviewed, including financial incentives for farmers.

and the use of flagship wildlife species such as the crested ibis toki to promote ecological restoration With the increasing popularity of environmentally friendly rice farming in parts of Asia and the western United States this book offers model cases for sustainable management of paddy dominated landscapes

**Natural Heritage of Japan** Abhik Chakraborty, Kuniyasu Mokudai, Malcolm Cooper, Mahito Watanabe, Shamik Chakraborty, 2017-10-27 This volume brings together the geological geomorphological and ecological aspects of Japan s natural heritage arguing for dynamic conservation of such heritage and explaining their key characteristics in an accessible format for general readers Sites from World Heritage Properties Natural UNESCO Global Geoparks and National Parks of Japan representing key facets of this heritage are analyzed in depth and the text is supplemented with color photographs and useful information for potential travelers The volume is divided into thematic sections that help understand the diversity of Japan s natural heritage with supplementary information on conservation tourism trends local culture and lifestyles In addition chapters analyzing nature s mechanisms that engender diverse heritage landscapes and conservation sustainable management schemes make this volume a valuable resource for both general readers and those with more specialized interests

Conserving Agricultural Heritage and Revitalizing Communities in the Asia Pacific Region Kazem Vafadari-Mehrizi, Yukio Yotsumoto, 2024-10-31 This book is an important milestone in our understanding of the development and use of the Globally Important Agricultural Heritage Systems FAO GIAHS and Building Back Better BBB community resilience initiatives GIAHS was designed by the FAO to conserve important agricultural heritage sites of the world through active coordination with local farming communities Since its inauguration the program has recognized several extraordinary agricultural systems in the Asia Pacific and in Japan ranging from the Ifugao terraces in

the Philippines to the Satoyama Satoumi traditional landscapes throughout Japan The book looks at the key functions of traditional agriculture while promoting their use in regional revitalization through the promotion of conservation traditional knowledge multilateral engagement and rural tourism Also during the discussions on the Sendai Framework the concept of Build Back Better was proposed by the Japanese delegation where communities can use a disaster as a trigger to create more resilient nations and societies than before Our compilation of conceptual and empirical research findings shows the way forward for community understanding of sustainable practices

### **Urban Forests, Trees, and Greenspace**

L. Anders Sandberg, Adrina Bardekjian, Sadia Butt, 2014-07-25 Urban forests trees and greenspace are critical in contemporary planning and development of the city Their study is not only a question of the growth and conservation of green spaces but also has social cultural and psychological dimensions This book brings a perspective of political ecology to the complexities of urban trees and forests through three themes human agency in urban forests and greenspace arboreal and greenspace agency in the urban landscape and actions and interventions in the urban forest Contributors include leading authorities from North America and Europe from a range of disciplines including forestry ecology geography landscape design municipal planning environmental policy and environmental history

*Anthropology and Nature* Kirsten Hastrup, 2013-08-15 On the basis of empirical studies this book explores nature as an integral part of the social worlds conventionally studied by anthropologists The book may be read as a form of scholarly edgework resisting institutional divisions and conceptual routines in the interest of exploring new modalities of anthropological knowledge making The present interest in the natural world is partly a response to large scale natural disasters and global climate change and to a keen sense that nature matters matters to society at many levels ranging from the microbiological and genetic framing of reproduction over co species development to macro ecological changes of weather and climate Given that the human footprint is now conspicuous across the entire globe in the oceans as well as in the atmosphere it is difficult to claim that nature is what is given and permanent while people and societies are ephemeral and simply derivative features This implies that society matters to nature and some natural scientists look towards the social sciences for an understanding of how people think and how societies work The book thus opens up a space for new forms of reflection on how natures and societies are generated

**World Terraced Landscapes: History, Environment, Quality of Life** Mauro Varotto, Luca Bonardi, Paolo Tarolli, 2018-12-06 This volume collects the best scientific contribution presented in the 3rd World Conference on Terraced Landscapes held in Italy from 6th to 15th October 2016 offering a deep and multifaceted insight into the remarkable heritage of terraced landscapes in Italy in Europe and in the World America Asia Australia It consists of 2 parts a geographical overview on some of the most important terraced systems in the world 1st part and a multidisciplinary approach that aims to promote a multifunctional vision of terraces underlining how these landscapes meet different needs cultural and historical values environmental and hydrogeological functions quality and variety of food community empowerment and sustainable development 2nd part The volume offers a great

overview on strengths weaknesses functions and strategies for terraced landscapes all over the world summarizing in a final manifest the guidelines to provide a future for these landscapes as natural and cultural heritage Territorial approaches to forest governance Food and Agriculture Organization of the United Nations,2025-04-04 Territorial approaches to forest governance reflect a shift away from plot level toward larger spatial scales in forest management and away from exclusively public sector governance to multi stakeholder governance that includes local communities regional groups national governments private companies civil society organizations and international bodies Institutions associated with these different groups and found at different spatial and administrative scales have a direct impact on the effectiveness of forest management and governance Most of the stakeholders have however difficulties in establishing effective forest governance mechanisms designed to territorial approaches It is crucial to enhance understanding of territorial approaches to forest governance to improve forest management and governance More specifically this publication aims to identify current practices positive and negative lessons and institutional options for effective forest governance at larger scales such as landscapes It provides seven guiding principles and associated recommendations building on success factors identified in the case studies overcoming challenges and reflecting on lessons learned These guiding principles focus on strengthening institutions to better tackle the multiple scales of governance inherent to territorial approaches **Landscape Ecological**

**Applications in Man-Influenced Areas** Sun-Kee Hong,Nobukazu Nakagoshi,Bojie Fu,Yukihiro Morimoto,2007-01-29 Landscape Ecological Applications in Man Influenced Areas not only expands the concept of landscape ecology but also applies its principles to man influenced ecosystems New dimensions of landscape ecological research in a global change such as urbanization biodiversity and land transformation are explored in this book The book also includes case studies concerning landscape analysis and evaluation using spatial analysis and landscape modelling for establishing sustainable management strategy in urban and agricultural landscapes Economics of Sustainable Tourism Fabio Cerina,Anil

Markandya,2010-10-04 Tourism is one of the world s largest industries and one of its fastest growing economic sectors helping to generate income and employment for local people At the same time it has many negative outsourced effects on the environment and local culture Achieving a more sustainable pattern of tourism development is high on the global agenda aiming to meet human needs while preserving the environment now and for the future The Economics of Sustainable Tourism aims to critically explore how tourism economic development can move closer to a sustainable ideal from a firm economic analytic anchor Grounded in economic theory and application it analyzes tourist s satisfaction and impacts of tourism on the host community investigates the productivity of the industry and identify factors which could increase economic and sustainable development such as trade relationships It offers further insight into how destinations sustainability can be measured economic benefits of a more sustainable destination and sets the agenda for future research The book includes a range of theoretical and empirical perspectives and includes cutting edge research from international scholars This
