**Culture Shock and Multiculturalism** Edward Dutton, 2011-11-15 It used to be widely accepted amongst anthropologists that when they conducted fieldwork with foreign cultures they experienced something called culture shock This book will argue that culture shock is a useful model for understanding an important part of human experience However in its most widely known form the stage model culture shock has been heavily influenced by the same anti science latter day religiosity that has become so influential more broadly Multiculturalism This book will examine culture shock through the model of religion It will show how the most well known model of culture shock so popular amongst business consultants expatriates international students and travelers has become a means of promoting and sustaining this replacement religion which includes everything from dogmatism and fervour to conversion experience By so doing it will aim both to better understand culture shock and to show how it can still be useful if divorced from its implicitly religious dimensions to broadly scientific scholars It will also suggest how anthropology itself might be stripped of its ideological infiltration and returned to the realm of science
