Reclamation Era United States. Bureau of Reclamation, 1949 China's State Ideology and the Three Gorges Dam Yuen-ching Bellette Lee, 2025-06-13 This book uses the case of the Three Gorges Dam project to explore the Chinese state s use of ideology namely the political theodicy of development as a governing tactic in the reform era Presenting observations from fieldwork collected after the dam's completion it reveals communities who not only embraced their improved livelihoods but also expressed support for the mega project and the Party's leadership However the research also indicates that the effects of the ideological dissemination surrounding the project were not monolithic with the development process involving extensive struggles and contradictions including locals facing unemployment and the fragmentation of their social networks This disjuncture between the state ideology and social reality thus revealed flaws in the official imperative of political theodicy Displaying how the authoritarian rule of the Chinese state can be adaptive in modifying its mode of governance especially when faced with the unintended consequences of failures this book will be a valuable resource to students and scholars of Asian environment development politics and Chinese politics history and society **Press Feature** United States Department of State, 1950 Colour Vision Deficiencies XI B. Drum, 2012-12-06 The eleventh Symposium of the International Research Group on Colour Vision Deficiencies IRGCVD was held 20 23 June 1991 in Sydney Aus tralia ably hosted by local organizer Stephen Dain A total of 35 talks and 10 posters were presented Papers based on 37 of these presentations are included here in Colour Vision Deficiencies XI The scientific program featured sessions on three special topics with each topic highlighted by an invited speaker The opening session on the Genetics of congenital colour vision deficiencies began with a superb invited lecture by Charles Weitz about his pioneering work on the molecular genetics of tritanopia The session on the second special topic Spatial aspects of colour vision began with the launching of a new IRGCVD tradition as 1991 Verriest Memorial Award recipient Harry Sperling presented the first Ver riest Memorial Lecture on his recent studies of spatial discrimination of heterochromatic stimuli Dr Sperling reported new evidence that certain

asymmetries in red green opponent colour vision can be explained by the spatial organization of colour opponent retinal neurons In the third special session on Occupational aspects of colour vision Barry Cole took the audi ence on a fascinating tour of the historical development of colour vision standards in his invited lecture entitled Does defective colour vision really matter In addition to the three special topics many interesting presentations were given in topical sessions on Variations in normal colour vision Acquired colour vision deficiencies and Colour vision tests and testing methods **Vision of Life** Lily E. Kay, 1993 This fascinating study examines the rise of American molecular biology to disciplinary dominance focusing on the period between 1930 and the elucidation of DNA structure in the mid 1950s Research undertaken during this period with its focus on genetic structure and function endowed scientists with then unprecedented power over life By viewing the new biology as both a scientific and cultural enterprise Lily E Kay shows that the growth of molecular biology was a result of systematic efforts by key scientists and their sponsors to direct the development of biological research toward a shared vision of science and society She analyzes the motivations and mechanisms empowering this vision by focusing on two key institutions Caltech and its sponsor the Rockefeller Foundation Her study explores a number of vital sometimes controversial topics among them the role of private power centers in shaping scientific agenda and the political dimensions of pure research It also advances a sobering argument the cognitive and social groundwork for genetic engineering and human genome projects was laid by the American architects of molecular biology during these early decades of the project This book will be of interest to molecular biologists historians sociologists and the general reader alike

Joseph Conrad Andrew Michael Roberts, 2014-05-12 Joseph Conrad is a key figure in modernist fiction whose innovative work engages with many of the crucial philosophical moral and political concerns of the twentieth century This collection of major critical readings of his work is arranged according to the issues which each critic addresses issues which are of crucial importance and in many cases remain controversial within contemporary literary theory and criticism Following an opening section on the critical tradition indicating how the study of Conrad s work has been politicised since the 1970s there are sections on Narrative Textuality and Interpretation Imperialism Gender and Sexuality Class and Ideology and Modernity Within each section two or three critical excerpts offer contrasting and complementary accounts of the fiction while the headnotes to each piece and the introduction place these excerpts within the wider critical debate clarifying for the reader both the theoretical issues and the interpretation of Conrad s fiction A glossary of terms and a bibliography categorised by critical approach complete a volume which will provide an invaluable resource for students of Conrad and twentieth century literature as well as other readers of Conrad s work

European Vision and the South Pacific Third Edition Bernard Smith, 2022-10-05 Bernard Smith 1916 2011 was arguably Australia s greatest art historian and one of the most important humanist thinkers internationally on ideas concerning cultural contact His European Vision and the South Pacific first published in 1960 showed how the ideas of the Enlightenment and the empirical structuring of scientific and geographical

knowledge during the great eighteenth century voyages of discovery affected notions of identity both for Europeans and the Indigenous peoples with whom they came in contact Not only did Smith's investigation of art science and imperialism of this period explore the conditions of frontier contact it opened up the dialogue on de colonisation and allowed us to think beyond or after it He was undoubtedly a pioneer of post colonialism and the book remains a lighthouse in pacific studies The republication of European Vision and the South Pacific is an essential part of the discourse reframing the interconnections and crossing of cultural boundaries between Europe and antipodean societies This new edition of a significant Australian classic also coincides with the 250th anniversary of Cook's landing on the east coast of Australia and complements new scholarship on territorialisation colonialism and the politics of exchange between metropolitan centres and peripheries A new introduction by Sheridan Palmer situates the book in a contemporary context Critical Theory and Democratic Vision Arnold L. Farr, 2009-01-01 While there are a number of books on Marcuse Critical Theory and Democratic Vision is the first to examine the problem of democracy through Marcusean lenses Marcuse is revived for the sake of helping us rethink what it takes to have a democratic society based on inclusion and equality **Space Ethics** Brian Patrick Green, 2021-10-19 Throughout history humans have explored new places making both good and bad moral decisions along the way As humanity proceeds to explore space it is important that we learn from the successes and not repeat the mistakes of the past This book provides the first comprehensive introduction to ethics as it applies to space exploration and use It examines real world case studies that exemplify the ethical challenges we face in exploring beyond Earth space debris militarization in space hazardous asteroids planetary protection the search for extraterrestrial life commercial and private sector activities in space space settlements very long duration missions and planetary scale interventions Major themes include human health environmental concerns safety and risk governance and decision making and opportunities and challenges of multidisciplinary and international contexts Ideal for classroom use and beyond the book provides ways of thinking that will help students academics and policymakers examine the full range of ethical decisions on questions related to space exploration Vision of War Lincoln Colcord, 1916 Vision .1893 If It Grows! . The Complex Vision John Cowper Powys, 1920 Who Would You Kill to Save the World? Claire Colebrook, 2023 2024 Hugh J Silverman Book Prize in Philosophy and Literature Who Would You Kill to Save the World examines how postapocalyptic cinema uses images from the past and present to depict what it means to preserve the world and who is left out of the narrative of rebuilding society Claire Colebrook redefines the world as affluent Western society and saving the world as preventing us from becoming the othered them who are viewed in their suffering Colebrook further examines how the use of postapocalyptic cinema is a humanist Western capitalist colonizing white heteronormative and individualist creation and challenges the notion that a world built on foundations of exploitation is worth saving Colebrook combines postapocalyptic fiction concern over the global climate crisis colonialism and anti Blackness to explain how contemporary postapocalypse blockbusters circulate ideas of whiteness and

the right of the privileged to rebuild the world Who Would You Kill to Save the World is a provocative addition to the field of extinction studies and challenges the conceptual frames we use to define ourselves

The Tragic Vision and the Hebrew Tradition W. L. Humphreys, 2003-03-11 In this discerning study of the relationship of the tragic vision to the Hebrew W Lee Humphreys suggests various ways in which Israel confronted the power of the tragic vision at certain points in its tradition Humphreys demonstrates how tragedy the literary genre and the tragic vision maintain a delicate but vital balance between fate and law In conclusion he contends that the tragic vision finds fullest expression at points of radical dislocation in human history At these times the essential questions of existence are reopened rehearsed and relived as the tragic vision questions all previous answers and dogmatic claims to the meaning of life
